K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

May 26, 2023 Page 2 Page 4 APPEARANCES DANIEL WEISS, M.D. (Via Video Conference) 2 the witness herein, having been first duly sworn to tell the truth, the whole truth, and nothing but the truth, was examined and testified as follows: FOR PLAINTIFFS: EXAMINATION. AMERICAN CIVIL LIBERTIES UNION **OUESTIONS BY MR. SELDIN:** 6 Harper Seldin Chase Strangio Q Dr. Weiss, good morning. 7 New York, New York 10004 hseldin@aclu.org A Good morning. 8 cstrangio@aclu.org O My name is Harper Seldin. I'm an attorney for the ACLU OF INDIANA Kenneth J. Falk Gavin M. Rose 1031 East Washington Street Indianapolis, Indiana 46202 kfalk@aclu-in.org plaintiffs. You and I will be doing this 10 deposition today. 11 Just a couple table setting things, have you 12 ever been deposed before? grose@aclu-in.org 13 A I have. 14 Q How many times? FOR THE DEFENDANTS: 15 A Two times. 16 OFFICE OF THE INDIANA ATTORNEY GENERAL Corrine Youngs 302 West Washington Street, 5th Floor Indianapolis, Indiana 46204 corrine.youngs@atg.in.gov O When was that? 17 A That is mentioned in my C.V. The last time was 18 2021. The time before that I believe was 1993, 19 ALSO PRESENT: Zoom Moderator, Erica Harriman but the C.V. will indicate with certainty. 20 Q Great. So when you are referring to your C.V., 21 EXAMINATION INDEX you are referring to the two prior times you 22 Page 23 served as an expert witness in other matters? EXAMINATION OUESTIONS BY MR. SELDIN Yes. 24 Α Q Great. Okay. So some of this will be familiar to Page 3 Page 5 EXHIBIT INDEX you, but we will go over it anyway just so we are 1 Exhibit Description Page on the same page. 2 Exhibit 1 Dr. Weiss Declaration 6 Today I will be asking you questions. You 3 7 Exhibit 2 Dr. Weiss Notice of Deposition will provide answers. Those answers must be 4 Exhibit 3 TransFamily Doctors 106 verbal. Head shakes will not come through. 5 Dr. Weiss Ohio HB 454 Testimony Exhibit 8 66 Uh-huh, huh-uh will not come through. 6 Exhibit 10 Dr. Weiss Utah Testimony Agenda 145 If you answer a question, I will assume that 7 Exhibit 11 Dr. Weiss Florida Comment 58 means that you understood my question. If you 8 Exhibit 12 Clinical Practice Guidelines 159 9 don't understand my question, let me know and we Exhibit 13 Plaintiff Responses to RFP 186 will try again. 10 Exhibit 17 Intermountain Additional Resources 130 Does that sound good to you? Exhibit 18 Intermountain LGBTO+ Patient Care 133 A It does. I understand. 12 Exhibit 19 Office Clinic Notes IUH 821 192 Q Now, is there any reason today, medication or 13 Exhibit 20 Medical Record 198 otherwise, that you would not be able to 14 Exhibit 21 Dr. Weiss Ohio Testimony 148 understand me, understand my questions, and 15 Exhibit 22 147 Montana Senate Minutes provide truthful responses? 16 Exhibit 24 North Dakota Senate Testimony 150 A No. 17 Exhibit 25 HB 1254 Testimony 150 Okay. The only other thing I will say is let's 18 Exhibit 26 Brief of Do No Harm 137 just try not to talk over each other. Even if you 19 Exhibit 27 Do No Harm FAOs 156 anticipate where I'm going, let me finish my 20 Exhibit 28 Protecting Minors From Gender Ideology 155 question. I will try to let you finish your 21 Exhibit 31 CAH Guidelines 160 answer. That way Wendy will not yell at us, which 22 Exhibit 32 Video 67

Exhibit 32C CCV.org Link

23

24

25

71

is always my goal.

The other thing is if you need to take a

break at any time, let me know. I just ask if

Document 58-6

Page 6

2

3

4

5

6

May 26, 2023 Page 8

1	there is a question pending that you answer the
---	---

- question and then we can take a break. 2
- I understand. Α 3

ase 1:23-cv-00595-JPH-KMB

- 4 Q Great. Do you have anyone in the room with you
- today? 5
- A No. 6
- Q Do you have any notes with you today? 7
- 8 A No.
- 9 O Do you have a copy of your declaration in this matter with you? 10
- A I do. 11

13

14

15

Great. That will make it easy. 12 O

> MR. SELDIN: Just for purposes of making sure we have the exhibits right, Erica, would you pull up what is marked as Weiss Exhibit 1. Great.

- Q Does this appear to be the expert declaration that 16 you submitted in this case, or the first page of 17 it? 18
- A It does. 19
- Q You can see this PDF has about 113 pages on it. 20
- Does that sound about right? 21
- A It does. 22
- Q Is this the same document as the one you have in 23
- front of you? 24
- Α Yes. 25

office in connection with this deposition.

If you look midway down the page it says Request for Production of Documents. This is a request from the plaintiff that you produce in connection with this deposition your current C.V. first.

7 Starting there, do you see that request?

- A 8
- 9 You included a C.V. with your declaration. Is that your current C.V.? 10
- Α Yes. 11
- 12 Okay. I believe if you scroll all of the way to the back of your C.V., Page 75 it's dated May 10, 13 2023. 14
- A That is correct. 15
- Q I take it there have been no changes to this in 16 the last sixteen days? 17
- Correct. 18
- Q Great. Then, in addition, you will see back to 19 Exhibit 2 at the bottom of the page it asks that 20 you provide, "The declaration report, and rebuttal 21 report the deponent has most recently submitted as 22 23 an expert witness in any litigation related to the provision of gender-affirming care to minors, if 24 25
 - such a declaration, report or rebuttal report has

Page 9

- Does this declaration contain all of the opinions 1
- that you intend to offer in this case? 2
- A No. 3
- Q What other opinions do you intend to offer in this 4 5
- 6 A Other opinions might arise during the deposition.
- Q Okay. So as of right now, these are all of the 7 opinions that you intend to offer in this case? 8
- 9 A They are.
- Q Okay. So there are no additional opinions in your 10 mind or elsewhere that you intend to offer. As we 11
- talk you may have further opinions? 12
- Α That is correct. 13
- Q Okay. 14
- MR. SELDIN: Could you pull up Exhibit 2. 15
- Q Dr. Weiss, I'm showing you Exhibit 2. You will 16 see it has the case caption and notice of 17
- deposition and request for production of 18
- 19

20

25

- Have you seen this document before?
- A I don't recall receiving this document, seeing 21 this document, no. 22
- 23 Q I will represent to you that it's the notice of deposition and request for production of documents 24
 - that we gave to the State Attorney General's

- ever been submitted; if no such declaration report 1 or rebuttal report has ever been submitted,
- 2 produce any prior reports that have been submitted 3
- on the provision of gender-affirming care 4 generally." 5
 - Do you see where that is?
 - Yes, I do. Α

6

7

- Q So I'm just wanting to confirm, have you ever 8
- 9 issued another declaration or report or rebuttal report in a case involving gender-affirming care? 10
- Not an expert declaration, no. 11
- Have you provided a fact witness declaration of 12 any kind in a case? 13
- I provided written testimony in support of 14 legislation, but not expert declarations. 15
- Okay. Thank you for clarifying. So we will talk 16 about that a little bit later. Thanks so much. 17 18 All right.
 - Dr. Weiss, how did you prepare for today's deposition?
- I read the literature. I read the materials Α 21 provided from the plaintiffs and I read the 22 information available on, actually all of the plaintiffs, the four children, adolescents. And basically that's it. 25

19

Q Okay. Did you speak with any of the other defense 18 experts in this case to prepare for today's 19 deposition? 20

A No. 21

- 22 Q Okay. Did you review the, to prepare for today's
- deposition did you review any of the expert 23
- declarations from the plaintiff experts. 24
- Dr. Shumer, Dr. Karasic, Dr. Turban? 25

conduct and performance of clinical research in 18

children and adults. 19

- Q What is the process for obtaining that 20 certification? 21
- 22 A There is experience and a lengthy exam.
- Q When did you take that exam? 23
- A I don't recall. It might be mentioned in my 24 curriculum vitae. 25

K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

May 26, 2023

Page 16

Document 58-6

- Q Was that towards the beginning of your career?
- A Probably something like five or six years ago. 2
- Q Okay. So within the last five or six years you 3 4 obtained that certification.
- Did you have to take any classes to prepare 5 for this? 6
- A No. 7
- 8 Q Any other certifications or board certifications
- that you have other than the ones we have just 9
- discussed? 10
- A I might have forgotten something. If I can refer 11 to my C.V., is that okay? 12
- If it's fair to say it would be in your C.V., that 13 is fine. 14
- A Yes. It probably would be in my C.V. I think 15
- that is all of them. 16 Great. Who first contacted you about being an 17
- expert in this case? 18
- A Ms. Youngs. 19
- O About when was that? 20
- A Perhaps roughly, I'm not certain, maybe six weeks 21 22
- 23 0 Thank you for that. If you would turn to, I guess Exhibit 1, please. 24
- MR. SELDIN: Would you bring that up, 25

- training as an unnecessary burden and completely
- 2 unrelated to my management of patients.
- Why did you not want to use electronic medical 3 4 records?
- They are detrimental to patient care. 5
- 0 How so? 6
- They are basically a billing software. Most 7 Α people don't know that. 8
- O Is it fair to say you had an ethical objection to 9 being trained on the software? 10
- No, it's not ethical. It's not, it is not, the 11 12 software was not pertinent to my management of patients. 13

In fact, we can get into a tangential discussion on the management, on the etiology or origin, I should say, of electronic medical records.

Basically they are a method to optimize billing. They are not good for patient care.

- Q Were you seeing patients at this time? 20
- A Of course. 21

14

15

16

17

18

19

- 0 Okay. So were you keeping paper records? 22
- I was keeping paper records, yes. 23
- Q Okay. In your current practice how do you keep 24 25 medical records?

Page 15

Page 17

- Erica? 1
- Q We will be at Page 39 of this PDF. That is the 2 start of the C.V. 3

- 6
- Q You will see underneath Section V, Appointments: 7
- Academic and Clinical --8
- A Yes. 9
- Q -- I'm looking at the portion about being a 10 clinical assistant professor at Case Western 11
- Reserve University. Do you see that? 12
- A Not yet. I see it now. 13
- Q It says here that you "resigned after lengthy 14 15 training was demanded for new in-hospital computer
- software." 16
- Is that why you resigned? 17
- A Yes. 18
- Q Were there any other reasons why you resigned? 19
- A None whatsoever. 20
- Q What kind of software was it? 21
- A I don't know. But I was, at that point I was an 22
- 23 independent practitioner. I refused to use
- electronic medical records and I was not doing 24
- inpatient care. I saw that requirement for 25

- A They are electronic medical records. They are a requirement of my employment. 2
- Q Looking lower on your C.V. on that same page you 3
- have several prior positions listed. The first 4 one is as chief of endocrinology at University 5
- 6 Mednet. It looks like you ended your employment
- there in April 2003, is that correct? 7
- A That is correct. 8
- 9 Q What were the circumstances of your departure?
- A This big group was disintegrated. There was poor 10 11 management. There was embezzlement of funds by a physician manager. There was not optimal patient 12
- care. 13
- Q Was there a criminal investigation related to the 14 embezzlement? 15
- A I think University Hospitals dropped the -- this 16 particular physician administrator went to 17
- New York City. They left the area. They only 18 discovered the embezzlement later. He was not a 19
- good actor. 20 21

The whole group disintegrated basically. I left a lot later than many other physicians and I just set up practice in the same area and patients followed me. I was one of 110 doctors in that group. I was the sole endocrinologist managing

22

23

24

ase 1:23-cv-00595-JPH-KMB K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023 Page 20

1

13

1 patients with endocrine disorders in that group before it deteriorated. 2

- Q So after April 2003 that is when you set up an 3 4 independent practice in Ohio?
- A That is correct. I was running my own practice 5 with a staff of thirteen people doing clinical 6 research. I employed other endocrinologists. 7 Then I could not maintain that financially after 8
- 9 seventeen years of independent practice.

That is when I sold to the group Lake Health 10 System. They were eventually bought by University 11 Hospitals and that is when I decided to look 12 elsewhere because then I was, I would then be 13 employed by the same group I had originally left. 14 Q Looking lower on your C.V., just below that it 15 says that until June 2007 you were the medical 16 director at the Joslin Diabetes Center. 17

- That is correct. 18
- Q What were the circumstances of your departure from 19 that role? 20
- A I was the first director of that diabetes center 21 which was in another area of Cleveland, Ohio. I 22 did that along with my role as the director of 23 Your Diabetes Endocrine Nutrition Group, which was 24
 - my independent practice.

opportunities when that became apparent that I

- was, that I would then be an employee of 2
- University Hospitals, which was the group I had 3 4 left in 2003.
- Q You say that was principally the reason you left. 5 Were there any other reasons that you left? 6
- That was the reason really. And I think, I was a 7
- little bit fatigued of the thirty-six years of 8 winters in Cleveland, you know, six months of 9 winters. So a warmer, sunny climate was enticing. 10
- Q So where did you go after that then? 11
- Now I'm in St. George, Utah. I live in 12
 - Santa Clara, which is a suburb of St. George. It
- is a desert environment with no need for a snow 14 15 shovel.
- Q Makes a lot of sense to me. Is that when you 16 became an employee of Intermountain? 17
- Correct. 18
- Q I see here that also in 2022 lower on your C.V. on 19 Page 3 that that is when you stopped being adjunct 20 clinical faculty both at Kent State and Ohio 21 22 University Heritage College of Osteopathic Medicine. 23
- Was that because you moved to Utah? 24 25
 - Yes, that was the reason. Α

Page 19

Is it a sunny day in Utah, dare I ask?

- Almost every day is sunny.
 - Q Good for you. So I'm looking now still on your 3 C.V. on Page 5. You will see that there is a 4
 - Section VII, Major Courses and Meetings; 5
 - 6 Continuing Medical Education.
 - Do you see where I am?
 - Α Yes. 8

7

11

9 Q So this Page 5, VII. We will get to a point where I don't know what the Roman numerals stand for. 10

Dr. Weiss, do you see where I am?

- Α I do. 12
- Q So this list of courses and meetings for 13 continuing medical education, are these classes 14 that you have taken or classes that you have 15

16

- These are classes that I have, courses that I have 17 Α taken or meetings I have attended. 18
- 19 Got it. Okay. And it looks like the first entry begins with "Review of Endocrinology" that took 20 place in October of 1985, is that correct? 21
- Yes. I have been in practice many years. 22 Α
- 23 Q Then by my count, if you flip to Page 10 of your C.V. you will see that the last number is 64 with 24 25 Annals of Internal Medicine review from May 2021,

- And the administrator of the Joslin Diabetes 1
- Center basically thought I was being paid too much 2 and a bunch of us left at the same time. 3
- And so you referred just now to Your Diabetes 4 Endocrine Nutrition Group. That was the name of 5
- 6 your independent practice?
- A Yes. 7

25

- Q I see that at Page 3, from April 2003 to 8
- 9 December 2019. December 2019, is that when you were acquired by Lake Health?
- 10 A I sold to Lake Health, yes. 11
- Q So it was not so much a departure so much as you 12 sold your practice? 13
- A Correct. I sold the practice. 14
- Q Is that the point at which you became an employee 15 of Lake Health Physician Group? 16
- A That is correct. 17
- Okay. I see a little lower on your C.V. it says 18 19 that you were employed there from January of 2020
- to January 2022, is that correct? 20
- A That is correct. 21
- Q Okay. What led to you leaving Lake Health? 22
- 23 A Well, as I said, it was principally that they were 24
- going to be purchased, they were purchased by University Hospitals. Then I looked at other 25

Q Is it fair to say then that this has been a running list of your continuing medical education participation from 1985 to 2021? A It's not complete because there will be continuing medical education I will do but from reading journal articles or from going online, going to an online reference called Up To Date. So this extensive number of so-called category one credits I would obtain from that. I don't list that on the C.V. Q So then is this list of sixty-four classes just ones that you have physically attended as opposed to done online? A That is correct. Basically meetings that might be online meetings or more often in-person meetings. Q Okay. So you may have done additional continuing medical education independently onlineA Correct. Q but that might not be covered here? A Correct. And you will notice it says 2021. That is the time when we happened to have a worldwide pandemic. Q Roundabout then, yes.	euphemistic term that is not appropriate to the interventions that are, that some practitioner apply to these minors. I think it's harmful. Some practitioner apply to these minors. I think it's harmful. Some part of your explanation you said it's harmful to minors. Do you also believe it's harmful to adults Aone Yes. Qoursels Some your explanation you said it's harmful to minors. Do you also believe it's harmful to adults Aone Yes. Qoursels Some your would not use the term gender-affirming care I's referring to in some part the medical procedures that are listed in Senate Enrolled Act 480 in this case. If I refer to that broadly as treating gended dysphoria, would we understand each other Aone I think it is a better term to use the term treating gender dysphoria with hormones, pubert blockers, surgery. I would not call it gender-affirming care. think it is euphemistic and misleading language Qounderstand each other in this deposition, I will likely use the terms gender-affirming care and surged the process of the proces				
	Page 23	Page 2				
1 2 3	A Yeah. Q It seems that these seem to be mostly about diabetes and metabolic disorders. Is that about right?	treating gender dysphoria interchangeably You and I will understand that we are talking about the same kind of care. You just have				

5

6

8

9

10

11

12

13

14

15

21

22

23

24

25

```
Is that about right?
```

- A The broad area of diabetes endocrinology, yes.
- There are other internal medicine related topics. 6 Correct.

7

Q Is any of this continuing medical education 8 9 pertaining to assessing gender dysphoria?

No. Α 10

Q Does any of it pertain to diagnosing gender 11 dysphoria? 12

A No. 13

Q Does any of this pertain to treating gender 14 dysphoria? 15

A No. 16

Q Does any of it pertain to providing 17

gender-affirming care? 18

- A I don't use that term. But treating gender 19 dysphoria does not relate to that. 20
- Q And why don't you use the term gender-affirming 21 22 care?
- 23 A Perhaps we can defer that to later on in the discussion because it's not -- I think it's gender 24 25

harming care. It's person harming care. It is a

different view about whether gender-affirming care is the appropriate way to characterize it, is that fair?

7 A That is a fair statement.

> MS. YOUNGS: And if necessary, can we specify as to what aspect because it is kind of a large umbrella and it might be confusing.

> MR. SELDIN: I think we can figure it out as we go along in the context.

- It's fair to say then that you have had no continuing medical education about treating gender dysphoria since 1985?
- A No, I don't think that is fair. Because 16 continuing medical education includes studying the 17 scientific literature. It may not be category one 18 credit based upon the AME designation of what 19 category one is. 20

But it would be category two credit. I have had extensive category two credits, but I don't list category two credits on this C.V.

What is the difference between category one and category two credits?

10

11

12

13

14

15

16

17

18

K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

A It is a designation that the AMA comes up with. 1 If you are studying a publication, analyzing it 2 2 carefully and reading it, that is considered 3 3 4 category two. 4 But if you are attending a meeting and they 5 5 have certified it as category one, then you get 6 6 7 category one credit. You can click on some sites 7 and get category one credit pretty easily. 8 8 9 9

But category two credit is still very meaningful. Reading journal articles. Reading the scientific literature. I have done extensive reading on gender dysphoria that would be, that would achieve many, many credits in category two. O And in terms of maintaining your medical license, do category two credits count towards that?

A They do, but they are not as important. You have 16 17 to have a minimum of category one for maintaining your license. 18

Q Is there a minimum number for category two? 19

A No. 20

10

11

12

13

14

15

Q So is it fair to say then that you could not 21 maintain your medical license merely by using 22 category two credits? 23

That is correct. 24 Α

Q Okay. I take it then when you have category one

approximately 2003 to 2013. So I read the

May 26, 2023 Page 28

literature during that period of time.

Q So you have been in practice since about 1985, is that right?

Practice outside of Iowa since 1986.

Q Right. So from 1986 to 2002, let's say, you did not have any continuing, any medical education about the treatment of gender dysphoria. That all

began in 2003?

I don't think that is accurate to state that Α because there was some treatment of gender dysphoria during my training in Iowa at the University of Iowa.

There was a physician who was probably the only doctor in the state treating adults with gender dysphoria. I learned aspects of treatment from him. That would have been during my fellowship at the University of Iowa in the 1980s.

Q Who was that doctor? 19

Α Dr. John MacIndoe. 20

I'll claim this is for the court report, but it's 21 for me, can you spell that? 22

M-A-C-I-N-D-O-E. 23

Q Tell me a little bit about this training that you 24 25 received at the University of Iowa with

Page 27

Page 29

credits you receive some kind of a certificate or 1

acknowledgment so when the licensing board asks if 2

you are current you can demonstrate you have 3

attended the requisite number. Is that fair?

A That is correct. 5

6 Q Lawyers have something similar so I'm assuming there are so many ways to track continuing 7 education of any kind. 8

9 Do you receive similar acknowledgments for category two credits? 10

A No. 11

4

12 Q So pardon my ignorance. Is there such a thing as category three? 13

A I have never heard of it. 14

Q Is it fair to say then that you have independently 15 researched and read about the treatment of gender 16 dysphoria which you characterize as category two 17 credits, but you don't have a running list of 18 19 that?

A Correct. 20

Q Do you recall the first time that you pursued any 21 22 continuing medical education about the treatment 23 of gender dysphoria?

I was doing some reading during a period of time 24 when I was treating adults, which was 25

Dr. MacIndoe? 1

So he would see an occasional adult patient with 2 gender dysphoria. I would go into the exam room 3

and assess the patient along with Dr. MacIndoe and 4

talk about hormonal interventions. 5

6 About how many of those patients do you think you encountered with Dr. MacIndoe? 7

Maybe twelve. 8

9 Q Over what period of time?

Α Years. 10

O Two years? Four years? 11

Α Two years. 12

Two years. Was that the length of your fellowship 13 at the University of Iowa? 14

Yes. Α 15

0 Was your fellowship in a particular specialty? 16

Yes. So the training, you know, there's four 17 years of medical school after college. And then 18 there is residency, which is three years. And 19 then two years of fellowship. 20

> So the fellowship, my expertise, my fellowship is in that subspecialty of internal medicine called endocrinology metabolism.

Q So over the course of your two year endocrinology 24 fellowship with Dr. MacIndoe you believe you 25

21

22

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

May 26, 2023

Page 32

Page 33

- 1 encountered about twelve adult patients being
- treated for gender dysphoria? 2
- A Yes. And keep in mind this is the early 1980s. 3 4 So this was before any of the Dutch studies or
- any -- there was really no Endocrine Society 5 guidelines at that point. 6
- 7 There were only occasional patients who expressed what was then called gender identity 8 disorder. 9
- O So with these twelve patients that you saw with 10 Dr. MacIndoe, what was your role in those 11 12 consultations?
- Well, I was a fellow. So I would learn his 13 approach and his management of the patient and 14
- discuss providing consent to the patient, discuss 15
- pros and cons of the treatment and see how he 16 evaluated and treated these adults. 17
- Q Did you make any treatment decisions for these 18 adults? 19
- A I was primarily learning at that point. 20
- Q Is it fair to say then that you did not assess 21
- whether or not these individuals had at that time 22 a gender identity diagnosis? 23
- I don't recall. I would say it's probably 24
- accurate. 25

Q Did you keep in touch with Dr. MacIndoe?

- 2 Α
- Q During your two year fellowship you would see 3 4 these patients as part of learning as a fellow with Dr. MacIndoe. 5
- Did you have any experience treating gender 6 7 dysphoria between the end of your fellowship and 2003? 8
- 9 A I don't recall treating when I was with University Mednet, no. I think I only was treating when I 10 was an independent practice from 2003 on. There 11 were relatively few patients until the last decade 12 or so. Ten, fifteen years. 13
- O Between the end of your fellowship and 2003 did 14 you advertise any clinical expertise in treating 15 gender dysphoria? 16
- I did not advertise at all. I didn't need to. 17 Patients would come to me with their endocrine 18 disorders. I was not promoting myself. I didn't 19 need to. I was a sole endocrinologist in this 20 group of 110 doctors. I didn't speak up or talk 21 about my expertise in that area because there was 22 23 no need to. There were patients sent to me for that.
- Q So you didn't treat any patients' gender dysphoria 25

Page 31

24

1

- Q So you would not have been diagnosing them with --
- A No, I was not. 2
- Q And do you recall what treatments these 3
- approximately twelve adults were provided as a 4
- result of Dr. MacIndoe's care? 5
- 6 A It was opposite sex hormone treatment.
- 7 Q When you say opposite sex hormone treatment, what do you mean? 8
- 9 So biologic males were given estrogen or androgen
- blockers. Biologic females were given 10 testosterone. 11
- And for these twelve patients do you recall how 12 many times you would have seen them? 13
- A Maybe three times for each of the twelve patients. 14
- Q Did Dr. MacIndoe in your presence speak to these 15 patients about how their treatments were working? 16
- A Yes. 17
- Q And what did they tell you and Dr. MacIndoe? 18
- A That was a long time ago so I can't recall 19 specifics on that. 20
- Q Do you recall generally how these twelve adults 21
- 22 faired on this treatment?
- 23 A My recollection from forty years ago is that they
- valued the physical changes that they were 24 experiencing. 25

- from the end of your fellowship until 2003?
- Correct. They were not sent to me. I was not 2 asked to treat them. 3
- Q Did you have any patients who were transgender 4 between the end of your fellowship and 2003? 5
- I don't recall. 6
- Q Looking at your C.V. if you look at Page 16, Roman 7
- Numeral XII, do you see your bibliography? 8
- 9 Α
- Q You will see that this runs through Page 18. 10 There is a Number 26 for the last publication. 11
 - Do you see that as well?
- A I do. 13
- Q Do any of these publications in your bibliography 14 pertain to the treatment of gender dysphoria? 15
- A None. 16
- 17 Do any of them pertain to the assessment or diagnosis of gender dysphoria? 18
- 19 Α
- 20 O Have you ever conducted any original research about gender dysphoria? 21
- 22 Α
- 23 Have you ever conducted any original research about gender identity or transgender people? 24
- No. 25 Α

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023 Page 36 Q Have you published any peer reviewed articles Q So why did you stop listing -- why did you change about the treatment of gender dysphoria? how you listed after June 2007? 2 2 Α No. 3 It makes the C.V. too long and it's unnecessary. 3 4 Q Have you published any not peer reviewed articles 4 Q So can you give me an example of a promotional program that you would not have included? about gender dysphoria? 5 A No. A For example, there is a medication called 6 6 Q Thank you, Dr. Weiss. I'm now going to turn to Mounjaro. That is a one weekly injection for 7 7 Page 20 of your C.V. This is Roman Numeral XIII, Type II diabetes. It is excellent for glucose 8 8 Presentations to Medical Professionals. 9 9 control. A Yes. Most people when they are on it they also 10 10 Q You will see that first presentation is dated tend to lose weight. I'm currently a speaker for 11 11 March 31, 1981, correct? one pharmaceutical company that makes Mounjaro, 12 12 Correct. but I don't list all those presentations. It 13 Α 13 Q Then if we go to Page 62 of your C.V., you will would be too long. 14 14 Q see that the last entry is 564 and is dated Who makes Mounjaro? 15 15 November 9, 2022. A Lilly. Eli Lilly. 16 16 Do you see that? Q Are you compensated for those presentations? 17 17 Say that again. Α 18 18 Q I'm saying do you see the last entry in this Q About how many of them do you do a year? 19 19 It varies. It may be thirty. It may be fifty. section? Α 20 20 564? 0 What was that first number? 21 Α 21 O Yes. It may be thirty. It may be fifty. If the 22 22 A Yes, I see it. product is new they need to -- they want to 23 Q Is it fair to say then this is a complete list of promote it. They want to teach health care 24 24 your presentations from 1981 to 2022? providers about what is available, how good it is. 25 25

Page 35

8

9

Page 37

- That is correct. This is to medical 1 professionals, yes. 2
- Q Are any of these presentations regarding gender 3 dysphoria or its treatment? 4
- A No. 5
- 6 Q On Page 63 of your C.V. it says, "Note, Dr. Weiss continues to be a speaker presenting at programs 7 across the United States. However, as of June 8 9 2007 only programs that were non-promotional in nature are listed above." 10

Did I read that correctly? 11

A You did. 12

18

19

20

21

22

23

24

25

- O What does that mean? 13
- A So I have been a speaker for pharmaceutical 14 companies and those presentations relate to their 15 medications and teaching doctors about these new 16 medications. 17

So I listed some of those. Many of those were listed early on among those presentations to medical professionals.

As of June 2007 only the programs that were not promotional, that were not pharmaceutical related were listed. So those were just didactic in nature without a sponsor by a pharmaceutical company.

- They are not familiar with it so they like to hear 1 from an expert and so I talk to them about it.
- 2 Q And for those thirty to fifty presentations that
- 3 you do a year, how much are you compensated? 4
- A It depends if there is travel involved. If it's a 5 6 web-based or just a remote, so-called remote live through the computer, then it is \$1,100. 7

At this point for travel programs in the area it is about \$3,025.

- Q And so about how much money per year do you think 10 you make doing the promotional presentations all 11 12
- A It really varies a lot from year to year. It may 13 be \$50,000. There are some years over the last 14 fifteen years or so it was \$100,000. 15
- O How much do you make as part of your role at 16 Intermountain currently? 17
- My current salary I think is \$220,000. 18
- Q So would it be fair to say then that the 19
- compensation for these promotional presentations 20 has been a significant part of your income for the 21
- last five to fifteen years? 22
- A For the last probably twenty years it has been, 23 yes. They are all done outside of the workday. 24 25
 - They are evening programs or maybe a lunch hour or

Document 58-6

Page 40

May 26, 2023

- 1 morning programs so they don't interfere with 2 patient care.
- Q And you listed Mouniaro as one of the medications 3 4 that you do promotional presentations for.

Are there other medications that you have done presentations for? That was a bad question.

I'm trying to ask you of the medications that you have made promotional presentations about, have they all related to the treatment of

diabetes? 10

5

6 7

8

9

15

16

17

18

19

- A No. So there have been medications for treating 11 cholesterol. There have been medications for 12 treating osteoporosis. There have been 13 medications for treating diabetes. Medications 14
 - related to obesity. There are so many over the years because I have been in practice for over thirty-five years. I have been doing promotional programs since the 1980s.
- Of the medications that you have done these 20 promotional presentations for, have any of them 21 been for the treatment of gender dysphoria? 22
- 23 A No.

O 1

- Q Okay. 24
- A Let me also spell Mounjaro for the court reporter.

- 1 patients?
- Correct. I think that is accurate. 2
- 3 Q As opposed to like a special seminar where there 4 are no patients, this would be taking folks on rounds with you? 5
- Correct. 6 A

9

13

14

15

16

17

18

19

20

21

22

23

24

25

- Q Would this have taken place from 2003 to 2013? 7
- That is correct. I did teaching before 2003, but 8 I don't recall seeing patients with gender
- dysphoria before I, when I was in practice with 10 11 University Mednet. It was only when I was in independent practice. 12
 - What would you tell these medical students or practitioners about treating gender dysphoria?
 - A I would discuss the, that particular patient and their feelings about their gender and the intervention I was offering to them. Why I was giving the hormonal treatments I was providing.

I was using opposite sex hormones or blockers. Not puberty blockers for a variety of reasons. And I talked to them about seeing the people.

The endocrinology fellows I taught often expressed an unwillingness to be, to take care of those patients when they went into practice.

Page 39

- Thank you. A M-O-U-N-J-A-R-O. 2
- Q I'm turning now -- we are still on Page 63 of your 3 4
- **Outpatient Teaching Of Health Professionals** 5 in Training, do you see where I am? 6
- A I do. 7
- Q Great. And it continues onto the next page 8 9
- Is any of this outpatient teaching pertaining 10 to the treatment of gender dysphoria? 11
- Α Yes. 12
- Q Which of these pertains to the treatment of gender 13 dysphoria? 14
- A So whenever I would teach a medical student or a 15 nurse practitioner or an endocrine fellow in 16 training or internal medicine or a family practice 17
- resident or a medical student. I would have them 18 19 accompany me in my care of patients with gender
- dysphoria in the office so I would teach them 20 about it. 21
- 22 So fair to say then that the teaching that you O 23 were providing on the treatment of gender
- dysphoria would have been the education of medical 24 professionals in the ordinary course of treating 25

- Why was that?
- Most endocrinologists that I have interacted with 2 are not on board with, are not convinced that the 3
- evidence is good or they are uncomfortable 4
- treating with opposite sex hormones for those 5
- 6 people with gender dysphoria so they don't see 7 those people.
- $\boldsymbol{Q}\$ When you say uncomfortable, do you mean because of 8 9 their perception of the evidence base or some other reason? 10
- A I think it's their perception of the evidence 11 base, yes. 12
- What would you say in response to that? 13
- A Now I would support them. I can understand their 14 feeling that the evidence is very weak because it 15 is both for adults and for children. 16

Back then when I was treating, obviously, I was not aware of how weak the evidence was.

I was offering treatment. I was the principal person in northern Ohio treating people with gender dysphoria during that ten years of time I was treating.

- 23 O But at the time you were providing treatment to adults? 24
- A Correct. 25

Page 41

17

21

22

23

24

25

May 26, 2023 Page 44

Document 58-6

- Q And was your perception that the treatment was effective for them? 2
- A I was not sure. There was an evolutionary process 3 4 there with me. I felt, I evolved to the point where I saw that people were really not improving. 5

They had lots of other, lots of other problems. Lots of psychiatric problems. Discord in the family. There were other unresolved issues, anxiety, depression. And I thought they were inadequately evaluated when they were sent to me because they were sent to me having seen a therapist, but often those visits were one or two visits and then they were told that they were good to go. They met the criteria for hormonal interventions.

But I didn't -- so, yes, they had physical changes. But I don't think from a psychological standpoint they really improved. Eventually I, then I started to see more and more and my other patients were not getting care. I could not see new people because my practice is very busy. I declined seeing new patients.

I continued to provide care for those established patients. But as I stated in my declaration, probably seventy percent discontinued

- you were treating for gender dysphoria?
- Around that time. December of 2022. 2
- Q Okay. So in your declaration I think you said 3 4 that you treated approximately one hundred patients for gender dysphoria, is that correct? 5
- Yes. Α 6
- Q Does that hundred patients include the twelve you 7 saw during your fellowship? 8
- 9 Α
- O Okay. Of the hundred patients that you saw, that 10 was from 2003 to really 2020, right? 11
- 12 A
- 0 2022. I apologize. Well, from when you left 13 Ohio? 14
- Yes. 15 Α
- Q Okay. So how many of those patients do you think 16 you treated continually over that period of time? 17
- 18 Well, if seventy percent left that would leave thirty. 19
- Q So when you left Ohio in 2022 you still had thirty 20 patients you were treating for gender dysphoria? 21
- 22
- 23 O Okay. And what did you tell them about why you would be discontinuing care with them? 24
- 25 A Moving to Utah.

Page 43

8

9

10

11

12

13

14

15

Page 45

- their care. Or I should say more specifically, 1
- they didn't follow up with me so I suspect they 2
- discontinued their care because there was no one 3 else who could offer that care in the area. 4
- Q When you say that you stopped seeing new patients, 5
- 6 what year did you stop seeing new patients for the treatment of gender dysphoria? 7
- A 2013. 8
- 9 Q Have you seen any patient for the treatment of gender dysphoria since 2013? 10
- A For the treatment of gender dysphoria, no. 11
- Q Okay. So I want to make sure I have the timeline 12 correct. From 2003 to 2013 you saw patients for 13 the treatment of gender dysphoria. 14
- In 2013 you stopped seeing new patients for 15 the treatment of gender dysphoria. 16
- A Correct. 17
- Q So for the existing patients that you had with 18 gender dysphoria, the last one of those people 19
- that you saw would have also been in 2013? 20 A No. No. I continued seeing them until I left 21
- Ohio. 22
- 23 Q What year was that?
- A I left Ohio in December of last year, 2022.
- Q So when was the last time you saw a patient that

- Did you transfer their care to another practitioner? 2
- A I discussed options with them because I felt bad 3 about leaving. That was not just the patients 4 with gender dysphoria, but all my patients because 5 6 they had seen me for many years. Some of them thirty years. 7

So I offered options and asked the endocrinologist whom I hired years ago if he would continue to manage them. They were on stable hormonal treatment.

Even though he would not see people, new patients, he was willing to continue their care in most cases. I should say in all cases he was willing to continue to manage those people.

- 0 Okay. You believe those thirty people were 16 appropriately continuing to receive care for 17 gender dysphoria at the time that you transferred 18 them to another endocrinologist? 19
- 20 A If I were to see them again I would not offer them opposite sex hormones and all of that treatment 21 that I did then because I learned a lot more than 22 23 I knew back then.

They are on stable regimens. They are doing as best as they can. They are getting

24

Page 48

- 1 psychotherapy and counseling. They are on
- antidepressants. Some of them have had surgical 2
- reassignment and they need their hormones. They 3
- 4 will be maintained on those hormones by Dr. Burtch
- in my practice. 5
- Q Fair to say you think your patients would have 6
- 7 done poorly from a medical perspective if they had not been able to continue receiving the treatment 8
- 9 for the gender dysphoria upon your departure?
- These people who had surgical reassignment 10
- certainly. They don't have their gonads. They 11 need hormones. These are adults, of course, all 12
- of them in their thirties and forties and fifties. 13
- Of those thirty patients, do you recall about how 14
- 15 many of them had surgery to remove their gonads? A I'm thinking here now. I don't recall. 16
- Q Not all of them, fair to say? 17
- A Correct. 18
- Q Even for those who had not had a surgical 19
- intervention related to their gonads you believed 20
- it was appropriate for them to continue to receive 21
- hormones as part of the treatment for their gender 22
- dysphoria? 23
- A I think all those patients that the 24
- 25 endocrinologist that I hired who was going to

- A That is right.
- Earlier you said you don't prescribe GnRH 2 agonists, right? 3
- 4 A Right. Those are not covered by insurance. They
- are very costly. Insurance would not tend to provide those even if we wanted to. 6
- Since these patients were, had already gone 7
- through puberty they would not be candidates for puberty blockers? 9
- Α Correct. 10
- 11 Q But of the seventy patients, it is possible they moved away from the area, right? 12
- That is possible, yes. 13
- Q It's possible that they found another provider to 14 continue prescribing that care? 15
- A Very unlikely. Back in 2013 there were no other 16 providers except the Cleveland Metro General 17 18 Hospital that had a clinic back then and patients preferred not to go there. It was hard to get 19 into there. 20

That was the only other provider in the area. It was fairly far from where I was offering care.

- So you suspect that, but you are not certain. 23 Someone could have made the drive, right? 24
- 25 Α Correct.

Page 47

21

22

Page 49

- assume their care, all of them have had surgical 1 reassignment. I'm just thinking back. Yeah. All 2
- of them did. 3
- Q They would not be producing endogenous hormones? 4
- A That is correct. 5
- Q I take it from a medical perspective it's not 6
- healthy to not have endogenous hormones and also 7 not to receive them --
- 8
- 9 A Correct.
- Q Okay. Now of the seventy -- so we are talking 10 about the hundred folks that you saw between 2003 11 and 2022. 12
- You say by the time you ended your practice 13 there you were only seeing thirty of the hundred? 14
- A Yes. 15
- Q Do you know what happened to the other seventy 16 folks in terms of their care? 17
- A All I know is that they did not return for office 18 visits. So I assume that they no longer, they 19
- discontinued treatment. They were not getting 20
- their opposite sex hormones or their blockers at 21
- all because no one else would be providing it 22 23 around that time.
- When you say blockers, you mean testosterone 24 blockers? 25

- Okay. And in 2013 when you stopped seeing new patients did you tell your existing patients that 2
- you were no longer treating new patients for 3
 - gender dysphoria?
- A No. 5

- Q Okay. Do you think any of them knew that?
- A I don't know. When people would call for a visit, 7
- my office would say he is not seeing new patients 8
- 9 at this time.
- Q Would they specify that you were not seeing new 10 patients for gender dysphoria, or would they say 11 he is not seeing any new patients, period? 12
- No. It was for gender related issues. I was 13 Α seeing other new patients. 14
- Q What I'm saying is if someone called you in 2014 15 and said I would like to make an appointment with 16 Dr. Weiss and they didn't say why, you would take 17
- them because you were seeing new patients? 18
- Correct. The office would ask what it was for. 19 Then they would clarify. If it was a gender 20
- related issue they would say I was not seeing new 21 patients at this point. You can go down to 22
- 23 Cleveland Metro.
- Q Did you notice a drop off in your existing 24 patients after 2013 when you stopped seeing new 25

Page 54 Page 56 1 litigation? A No. Q Okay. Now on Page 75 of your C.V. you will see A No. 2 2 Q Is that something that you are interested in there's a section midway through called Speakers 3 3 4 doing? 4 Bureaus and Advisory Boards. Then you have Lilly A I think it's important to provide the science and on there. 5 5 the facts and provide balance in this because I Earlier you were talking about your 6 6 think a lot of harm is being done to minors. 7 promotional presentations for Mounjaro. Is this 7 On Page 64 of your C.V. it has Participation in the same thing? 8 8 Clinical Trials and then it goes to the next page. Yes. 9 9 Α For these trials what has your role been? 0 Okay. Are there any other -- other than Lilly, 10 10 Are you the principal investigator for all of 11 are there any other Speakers Bureaus or Advisory 11 these? Boards that you are on currently? 12 12 Yes. A I'm a senior fellow with Do No Harm. That is not Α 13 13 listed on my C.V. Many people view it as a Q Okay. So in your declaration you talk about 14 14 having been the principal investigator in about a politically motivated organization. It's not. 15 15 hundred clinical trials. Are you familiar with Do No Harm? 16 16 Those are the ones listed here, is that Why don't you tell me about it? 17 17 correct? So basically it's an organization that attempts to 18 18 A Yes. eliminate ideology out of the practice of medicine 19 19 Q Do any of these pertain to the treatment of gender 20 to try to optimize patient care, what is best for 20 dysphoria? the patient, and leave ideology, politics, 21 21 A No. It would be great if one did because there religion out of practicing medicine. 22 22 So I'm a senior fellow with that 23 are no randomized clinical trials with comparator 23 control groups for the treatment of gender organization. I do occasional, I write occasional 24 24 dysphoria in adults or minors. 25 testimony. I guess it's testimonies that I write 25 Page 55 Page 57 And were all these trials sponsored by in support of legislation related to gender 1 1 pharmaceutical companies? ideology. 2 2 A No. Q When did you first become a senior fellow in Do No 3 3 Q Which ones were not sponsored by pharmaceutical Harm? 4 4 companies? A It was something like March or so of this year. 5 5 6 The second one, the efficacy of fluoxetine. That 6 Early this year. was an investigator initiated trial. I did that Q March of 2023? 7 7 one without funding. There was the ACCORD trial A Correct. 8 8 9 in which I was a principal investigator. That was 9 O And how did you learn about them? A It's a long -- how did I learn about them? That analogous to a health sponsored trial. That 10 10 is a short story. I just saw the, I think I saw should be listed here. That is listed on Page 65. 11 11 That is Action to Control Cardiovascular Risk in something online with regard to what their efforts 12 12 Diabetes. That was a National Institute of Health were. 13 13 sponsored trial. So that was also not a The head of the organization is the former 14 14 pharmaceutical trial. dean of the University of Pennsylvania School of 15 15 Medicine. He is a nephrologist. He is just All of the others were pharmaceutical 16 16 brilliant and articulate. I think his goals are sponsored trials except for Page 72, 2011 to 2012 17 17 Trial-Net was an NIH sponsored trial. wonderful. They are well -- just the motivation 18 18 Q So with the exception of those, the rest of those and the goals are really noble. 19 19 indicate at the end there has been a sponsor. So Q And do you remember where online you learned about

A Correct.

popped up?

I do not remember.

happened next?

I take it the rest of them were sponsored by

Q Have you supervised any clinical research about

the treatment of gender dysphoria?

pharmaceutical companies?

them or what you were doing online when they

Q And so that is how you learned about them. What

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Page 60 A Well, what happened was -- can you clarify that 1 Do No Harm? question? What happened next? I don't think so. 2 2 Α Q Q So you first learned about them. Then suddenly Okay. 3 3 4 you were a senior fellow. What happened in 4 A I don't think so. So -between? Q 5 Wait. Excuse me. A I will explain. So there was an email sent out to Α 6 request support for Florida's legislation related O Yeah. 7 7 to treatment of minors with gender dysphoria. 8 A Yes, I must have known about Do No Harm because, 8 I sent an email to the Florida, I think as I said earlier, Do No Harm said to please send 9 9 legislature's medical board or someone to support comments to Florida if you support this 10 10 Florida's legislation. Then there was a follow-up legislation. 11 11 email from Do No Harm to please send us any That is when I sent this email to Florida. 12 12 communication you wrote in support of the Florida And it was only because of the Do No Harm email 13 13 sent to their members, most of them who are legislation. 14 14 I sent them a copy of my supportive 15 15 physicians I think. testimony. They contacted me. I think that was Q And when did you become a member of Do No Harm 16 16 partly because I'm an endocrinologist who has had separate from being a senior fellow if those are 17 17 a lot of experience treating gender dysphoria and 18 different things? 18 they were interested in my viewpoint. They are different things. I think I became a 19 19 Q And so thank you for that. member sometime last year. I do not recall when. 20 20 MR. SELDIN: Erica, if you could please It may be mentioned on my C.V. I don't think so 21 21 pull up Exhibit 11. though. 22 22 Dr. Weiss, you will see this is an email from a O Just so I understand the timeline, sometime in 23 23 DW, but it's signed by you to the Board of 2022 you are online. You learn about Do No Harm. 24 24 25 Medicine Public Comment. 25 Is that when you became a member? Page 59 Page 61 It's an email dated October 24, 2022. Do you A Yes, when I saw the work they were doing. Yes. 1 see this email? Q And then you start getting Do No Harm's emails. 2 A Yes, I do. One of them was sometime before October 24, 2022 3 3 Q And it says, "Please see my attached comments. I that solicits folks to send comments into Florida. 4 4 strongly support Florida's efforts to protect And that is what prompted this email from you 5 5 6 minors from experimental medical interventions 6 with the attached comments. Is that an accurate such as cross sex hormones, puberty blockers, and 7 sort of summary of what we have been talking 7 surgery to remove normal body parts. Thank you." about? 8 8 9 Did I read that correctly? 9 Α Yes. A You did. Q Okay. And then did you send a copy of this to Do 10 10 Q So is this the email that you sent with respect to No Harm? 11 11 that Florida comment we were just talking about? 12 A Only when asked after. 12 A Well, no. There was probably a two-page 13 Q Okay. So Do No Harm said to send comments. They 13 commentary with references sent to Florida. So 14 say then thank you for sending comments. Please 14 this is -- the attached comments are not shown send us a copy of what you sent? 15 15 Correct. here. Α 16 16 Then you heard back? MR. SELDIN: Erica, if you could scroll Q 17 17 down for us. Α Yes. 18 18 A Very good. Q Do you remember about when between October 24, 19 19

20

21 22

23

24

25

Q Is this the cover email and then the attachments

Q Okay. So in October of 2022 you send this Florida

A It looks familiar, yes.

comment.

that you sent that we were just talking about?

When you sent this comment did you know about

20

22

23 O

24

25

back?

A I don't remember.

2022 and becoming a senior fellow that you heard

Okay. And when you did hear back who reached out

A Kristina Rasmussen, who is their kind of chief

K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

May 26, 2023 Page 62 Page 64 1 administrator. A I think I may have shown it to my wife. She is a Q What did she say to you? retired physician. She is really good with 2 2 A She said something like Dr. Goldfarb and I would grammar and clarity. 3 3 4 be interested in speaking with you about your 4 Q Good to have a copy editor in the house. What kind of physician was your wife? joining Do No Harm or something along those lines. 5 5 Q Did you then meet with Dr. Goldfarb? Nephrology. 6 6 A Yes. It was just online like a Zoom meeting. Q How long did she practice? 7 7 Q What was that conversation like? Oh, she is seven years older than I. She just 8 8 A They discussed their goals and how I might work stopped practicing about five years ago. 9 9 Q Does she also enjoy Utah and the sunshine? with them in achieving their goals specifically 10 10 with focusing on the gender dysphoria issue. A She is. 11 11 12 They work on other matters, too. That was 12 Q Okay. Glad to hear it. not the pursuit at that point. Has she ever treated anyone with gender 13 13 Q So specifically on gender dysphoria what did they dysphoria as far as you know? 14 14 say their goals were? Α No. 15 15 A Well, I think the goal is to protect minors. To Q I want to talk more about your testimony before 16 16 protect really only minors from these harmful and some state legislatures that you talked about. 17 17 experimental interventions. 18 Do you recall what states you offered 18 testimony in either written or oral? Q And is a goal of Do No Harm to end the treatment 19 19 20 of gender dysphoria for adults? A I can check my folders and tell you. From my 20 A No, not at all. memory it would be Indiana, Ohio, Montana, Utah. 21 21 Q Is it your goal to end the treatment of gender I think that is all. That is all that I can 22 22 dysphoria for adults? 23 remember. There are probably some I left out. 23 A I think if adults want to undergo those treatments Is it possible you testified in North Dakota? 24 24 if they have really clear informed consent by the A Wyoming is in there. I think North Dakota also, 25 25 Page 63 Page 65 yes. I think that is right. prescribing physician, I mean, they are welcome to 1 do that. Adults are adults. It's a different Other than the legislative testimony that you 2 2 story. referred to, and you listed some states just now, 3 3 I don't think it's the best treatment for have you ever provided legislative testimony on 4 4 them if they have gender dysphoria. I think there another topic other than the treatment of gender 5 5 6 are better approaches to their dysphoria. But if 6 dysphoria in minors? they seek to have modification in their appearance Another topic outside of gender dysphoria? 7 7 Α to resolve their dysphoria and the prescribing Q Correct. 8 8 A Yes. I have submitted video testimony in Ohio 9 doctor thinks that's the way to go, as long as 9 there is clear and complete consent then that's about not requiring vaccine mandates to people 10 10 fine for adults. before -- it had to do with vaccine mandates. It 11 11 12 This particular testimony that you wrote, did you was that topic. 12 13

- write it yourself? 13
- A Yes. 14
- Q In the legal world it's not nearly as offensive to 15 ask if you wrote it yourself. This was what you 16 wrote before your involvement with Do No Harm? 17
- A What are you referring to? 18
- Q The Florida testimony that we are looking at right 19 now that you submitted to the Board of Medicine, 20
- did you write this yourself? 21
- A Yes. 22
- Q Did you have any assistance writing it? 23
- A No.
- Q Did anyone review it before you sent it in?

- Let's see what else. That was about two years ago I think. I can't recall any other
- testimony.
- O Would that have been vaccine mandates in Ohio? 16
- Α Yes. 17

14

- What was your position on vaccine mandates? 18 O
- They should not be required by the state. 19
- Why was that your position? 20 Q
- MS. YOUNGS: Objection. What is the 21 relevance to the vaccines? 22
- 23 Q Dr. Weiss, what was your position on the vaccines? Why was that your position? 24
- A My position at that point was that there was, it 25

article was that he wrote about gender dysphoria

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Document 58-6

Page 72

May 26, 2023

Page 73

- 1 he contacted me. He said would I be interested in
- 2 just joining the organization. You know, it's
- basically a non-political organization that tries 3
- 4 to provide the best science and the best evidence
- for taking care of people with gender dysphoria. 5 So I joined. 6
 - There's, they have discussions online and so on. They have several physician members that are -- I'm just, I'm just connected to them. I'm really not a member of the group in that sense. They allow me to access their kind of interactive
- Q Do you have to be a member to access the -- are 13 you talking about -- you are on their website? 14
- 15 A Yes, that is all. I'm not even listed. You will not find me, if you go to SEGM you won't see my 16
- name there because I'm just -- I know about them. 17 They have their resources basically. 18
- Q Who was the doctor from SEGM who reached out to 19 20 you about testifying in Ohio?
- A Dr. William Malone. M-A-L-O-N-E. He is an 21 endocrinologist. 22
- 23 Sorry. What was that question? Now repeat the question. 24
- Q You said a doctor had reached out to connect to

- 1 A Okay. Good.
- Q Okay. 2
- 3 A So my recollection was accurate.
- Q We love to hear that in a deposition. So during that testimony you talked about how you estimated 5 that seventy-five percent of your patients failed 6 to persist in their treatment with you. 7

Does that sound about right?

- A I think I modified that to seventy percent in my statements to you earlier and in my declaration. 10
- 11 Q But the word "persist" is the word that you used.
- 12 Α Okay.

8

Q I guess my question will be what does persistence 13 mean? Like we were speaking earlier about your 14 15 patients didn't return to treatment with you.

When you say didn't persist, is that what you 16 17

- Yes. So when they discontinued their care with me 18 I would equate that to lack of persistence in 19 their treatment. Although, accurately as you 20 stated, I can't be sure what happened to those 21 22
- 23 O We have talked about other reasons that people might not have returned to you for care. It could 24 25 have been that they lost their insurance perhaps?

Page 71

- you from SEGM, the organization CCV, is that
- right? 2

1

7

8

9

10

11 12

- A I misspoke. Okay. Right. The doctor who asked 3 me about Ohio is Dr. Beck. 4
- Q Who is Dr. Beck? 5
- 6 A He is actually one of the founding members of 7 SEGM.
- Q You found SEGM because Dr. Malone. Once you were 8 9 part of SEGM Dr. Beck got in touch and asked you
- about supporting this bill in Ohio? 10
- A Correct. 11
- Q Okay. And then the organization that was 12
- supporting the bill in Ohio that you were involved 13 with related to your testimony was CCV, is that 14 right? 15
- A I think that is what it's called. There are many 16 organizations supporting the bill. CCV was the 17
- one that reached out to me and gave me a copy of 18 the bill. They communicated with me. 19
- 20 Q You will see actually we have up on the screen the Exhibit 32-C which is from CCV.org. 21
- 22 A Okay.
- 23 Q I take it that was the organization you are talking about there. I think they have a 24
- recording of your testimony online. 25

- A Correct. Many of those people were on Medicaid.
- That is possible. Sure. 2
- Q It could have been possible they were happy with 3
- the results they got and didn't feel the need for 4
- further treatment? 5
- 6 That would be, that would be desistance if they
- stopped. They would not have discontinued 7 hormonal, you know, to say -- well, then they 8
- 9 would basically desist. They would say I don't
 - really need this any more and they would stop hormonal treatments.
- Well, I think I'm asking a different question. 12
- There are some treatments that, I mean, someone 13 might say I want to take testosterone because I 14
- want my voice to be lower. Once their voice 15 achieved that pitch, they might say I have 16
- achieved what I desired and I don't need more. 17
- 18 That would not be the case in these people because 19 they are all adults who have their voices. Their 20 vocal cords will not change after the treatment.
- They are all post puberty. 21
- 22 As part of your testimony you have talked about a 23 patient who had regretted the removal of their testicles. 24
 - Does that sound familiar?

25

6

7

8

9

10

11

12

13

14

15

16

17

18

- Q Do you recall approximately how old they were? 7
- A One was in his thirties. The other was about 8 9 forty-five.
- Q And were those surgeries as part of their 10 treatment for gender dysphoria or for some other 11 12 reason?
- The man in his thirties was treatment of gender 13 dysphoria. Surgery was done in Philadelphia. He 14 came to me for care after that. 15

The man in his forties was -- he should never have had that done. I was treating him for gender dysphoria. He was -- it's a complicated story. He was really autogynephilic. He basically wanted some feminine characteristics. He was married to a biologic female and sexually active with his wife. He was living as a man with long hair.

And he went -- I was seeing him for years. And he was, he seemed happy with his hair on low dose estrogen. And then I didn't see him for 1 to you and have some regret or complications from 2 surgeries?

Α Right. But the distinction is hardly analogous 3 because these are people who have healthy body parts and then they are being removed. They clearly don't -- they don't clearly have informed consent. When people have knee and hip and shoulder surgery they have severe pain. They have deranged, abnormal joints or breasts. They might have breast cancer.

> So all these people have a disease state that can only be corrected by surgery. There is no other intervention that would be appropriate. It's quite different from people with gender dysphoria.

- Q So I take it then your concern is not the regret. It is the surgery operated on what you think is healthy tissue?
- A That the surgery was not the best intervention for 19 these people's distress. There was, you know, 20 there were interventions that they could have been 21 22 offered that might have resolved their distress and they actually did not get resolution of their 23 distress and they had worsening with the surgery 24 25 in these cases of gender dysphoria.

Page 75

Page 77

several months. He ended up going to a urologist for orchiectomy. He was evaluated by a psychologist that cleared him for surgery. He came back to see me saying I'm having problems with erections since my surgery. I said, What surgery? Because they never contacted me for his, they never contacted me before his surgery.

Then he wanted testosterone for his erections. I called the urologist. I said, How come you didn't contact me? What happened there? They said, We had a psychologist. He thought he was fine to have surgery. This just shows if two adult men can have regret it would not be surprising there would be many minors who would regret having interventions if two adult men who obviously failed to understand what they were having done to them.

That is the story on those.

- Q Have you had other patients who regretted 19 surgeries they have gotten, any kind of patient 20 for any treatment? 21
- A Yes. I have had patients who had complications 22 23 after breast surgery. Patients who had
- complications after knee and hip surgeries. Yes. 24
- Q This was not the first time you had patients come

- So based on those anecdotal experiences with those two patients, that is why you support laws like 2 Senate Enrolled Act 480 which bans this care for 3 minors, right? 4
- A No. No. That is a terrible oversimplification. 5 6 I think the evidence base is pitiful to support these interventions. It's not just my experience. 7 It's the experience that the people didn't improve 8 9 from a dysphoric standpoint, even those who did 10 not regret their surgery.

But also the evidence base is very poor. It is really low quality. And even those -- the Endocrine Society -- that's why four, five countries have said this is not, this is not the way to go. They really should have psychological support.

And some countries have said they should only be offered -- medical interventions should only be offered in a research setting because the evidence is so poor to support it. It is not just simply my experience.

- We will talk about the countries in a minute. I 22 0 23 think I was asking a different question.
- 24
- Q Even though you had two adult patients who 25

- 1 regretted their surgeries, you do not support a
- ban on the treatment of gender dysphoria for 2
- adults? You just support bans on the treatment of 3
- 4 gender dysphoria for children, for minors?
- That is correct. A 5
- Q Okay. That is what I was getting at. 6
- A I'm sorry if I misunderstood. 7
- Q Not at all. Do you support bans on orthopaedic 8 surgeries for minors? 9
- A I think there needs to be informed consent for all 10 surgeries on children. That means that informed 11 consent involves the pros and cons, risks and 12 benefits, alternative treatment and the parents 13
- need to be involved in the decision making process 14 15 and sign off on that.
- Q There are circumstances in which minors you 16 believe can provide assent to certain types of 17 medical care with the consent of their parents and 18 that kind of care should be provided? 19
- A Absolutely. 20
- Q Okay. 21

22

23

24

25

1

2

7

8 9

MR. SELDIN: I saw a note from Erica about the video. Thank you. Can you pop that up real quick. All this for one question. Would you play the first thirty seconds or so.

the treating physicians. I think if you see what others have said in other clinics, the affidavit of Jamie Reed at the Gender Clinic in Washington, the stories of what happened at the Gender Identity Center in the U.K. and experiences from other parents of children with gender dysphoria, they will also describe the lack of exploration, investigation and psychological counseling that their children go through basically, or fail to have when they are treated.

I mean, if you just look at M.R., one of the plaintiffs, in the hospital with suicidal ideation, I think this is correct. Then a week later gets testosterone. Where is the, where is the biopsychosocial evaluation over months? Q So based on reports from parents and other news

- 16 articles, that is your basis for believing that 17 18 there are minors who are being provided treatment for gender dysphoria without a gender dysphoria 19 diagnosis? 20 21
 - A Well, I think, I think it's more accurate to say that there is inadequate exploration of other co-morbidities and the family dynamics and their social situation and why that child has come to reject their natal sex.

Page 79

(Video Playing.)

MR. SELDIN: You can pause it.

- That is me. 3
- Q Not the other Dr. Daniel Weiss, M.D. testifying in 4 Ohio. Great. Thank you. Thank you for 5 6 confirming that.

So during that testimony you criticized some doctors as delegating diagnosis to a minor.

Do you recall that part of your testimony?

- A I don't recall the exact words, but I think 10 there's, I think that approach is accurate. 11
- 12 Do you have any examples of a doctor failing to independently diagnose a minor with gender 13 dysphoria before providing care? 14
- A I think it happens all of the time in gender 15 clinics. 16
- Q Why do you think that? 17
- A Well, I have heard that from parents who attended 18 gender clinics in Ohio with their child and they 19 are -- basically the child will just say I was 20 born in the wrong body or I don't like my breasts 21 and they will diagnose them with gender dysphoria 22 23 and not explore any other issues.

So the person, the child comes in with this sense of what they have and that is accepted by Page 81

And that is what happens in many of these clinics. And it's not just, it's not news articles. I mean, the affidavit of Jamie Reed is not a news article. The book Time to Think, which is an exploration of the very thorough evaluation of the Gender Identity Center in the U.K., that is not a news article. Also, reports from parents who, that is very powerful, very meaningful. Some of that was presented in Ohio. We hear that repeatedly.

Why are all these D tran sites coming up? There are many of them. Those people have had experiences where they were basically affirmed with minimal evaluation under two visits.

14 O So it's not that you think there is not an 15 evaluation taking place that is leading to an 16 independent diagnosis of gender dysphoria. 17

> It is that you believe that they should be exploring other co-morbidities?

- A I think for many cases there is virtually no evaluation.
- 22 Q You said that, you know, you found compelling some of the testimony of parents.

Do you find the testimony of the parents in this case about how their children have improved

to be compelling? 1

- A I didn't see clear evidence that the children were 2 improving. 3
- 4 Q Do you have any firsthand knowledge of a minor being provided with treatment for gender dysphoria 5 without parental consent? 6
- What do you mean by firsthand knowledge? 7
- Q Well, we talked earlier about how there are 8 circumstances you believe where children can 9 assent to medical treatment and their parents can 10 consent and the provision of that treatment is 11 appropriate based on that informed consent 12 process. 13

Are you personally aware of a minor receiving treatment for their gender dysphoria where that didn't happen? Are you personally aware of that?

I know of circumstances in which minors have gotten hormones through Planned Parenthood without parental consent.

Personally knowing them as someone I've taken care of or in my, that lives in Ohio nearby, a neighbor, no. I don't have that kind of personal awareness.

You said during your testimony in Ohio that it was 24 25 immaterial that you had not visited any

United States, and the affidavit of Jamie Reed.

And I think there will be many coming out along with many, many parental testimonies that describe how minimal the evaluation is.

And we just see the plaintiffs. We don't see extensive evaluation of these children. I mean, look at these sad stories of these children who felt terribly traumatized and they are treating them with hormones.

There was one that was physically and sexually abused by the father. Another one who has two biologic male parents. One of whom is transgender.

You wonder how much of this is pressure on the child to have hormonal treatment. That all needs to be explored. It's just not being done.

Dr. Weiss, I'm sorry to cut you off. 0

MR. SELDIN: Ms. Youngs, we will designate parts of this testimony regarding the medical records of the minor plaintiffs as confidential.

MS. YOUNGS: Certainly.

MR. SELDIN: Ms. Youngs, I believe in Dr. Weiss' declaration he has several paragraphs that we would like those designated as confidential and redacted. I just wanted to flag

Page 83

those for the court reporter and for you that that

not going to be a problem? 3

multi-disciplinary clinics in Ohio that were 1 treating pediatric patients. 2

Do you recall saying that? 3

- O Do you still believe that to be true that it's 5 immaterial? 6
- Yeah, I think it does not matter. 7 A
- O Okay. So you are comfortable relying on 8 9 secondhand reports to describe what you believe is happening in that --10
- A They are very powerful statements by parents who 11 attend with their child at the clinic. So when 12 people say they have a very thorough evaluation, 13 they do not do any of that. They don't do this. 14 They will evaluate the child from a psychological 15 standpoint over months and really address all of 16 their other problems, that does not happen. 17

I don't believe it happens. I never hear that it happens. With my experience with adults it didn't happen. The parents don't say that it happens. The comments from the extensive evaluation, extensive interviews in Time to Think that I've referenced in my bibliography at the Gender Identity Development Center in the U.K. that has decades more experience than we do in the is how we would like to proceed. I assume that is

MS. YOUNGS: No.

Q Sorry for that little bit of housekeeping. 5

6 Do you think that there are any minors who 7 are properly evaluated for gender dysphoria?

A I hope so. 8

- 9 For those minors who are properly evaluated, do you still oppose the treatment for gender 10 dysphoria? 11
- 12 Α The hormonal, or what you might call 13 gender-affirming care, yes, because I think it is personally harmful and it does not help. There 14 are safer less harmful interventions like 15 supportive exploratory psychotherapy. 16
 - So it's not just the evaluations, because even if a minor were appropriately evaluated, thoroughly had a diagnosis of gender dysphoria and you agreed with that, you would still oppose the provision of the treatment of their gender dysphoria either through puberty blockers or hormones, is that correct?
- A I would be more clear in stating that a thorough 24 25 proper evaluation would very, very likely reveal

1 factors in the family dynamics, history, sexual abuse, physical trauma, bullying, social 2 isolation, autism spectrum disorder or depression, 3 4 anxiety.

> That all could be addressed and there would be no need for hormonal interventions that would be not helpful and likely harmful.

- Q Do you think it's possible that there are minors who do not have any history of trauma, do not have any co-morbid conditions, do not have any social or familial pressure and, nonetheless, had gender dysphoria that would benefit from treatment?
- A I think they may benefit from treatment. But the 13 treatment is best hormonal or hormonal 14 interventions. 15

So even if such children did exist and, of course, in the Dutch study they found not very many of them. They had no other significant psyhosocial issues, they treat them with these hormonal interventions and I don't think they helped them as we will discuss.

Q So you don't believe that there are any minors who 22 23 had gender dysphoria period, or who have gender dysphoria? 24

Well, first question, do you believe there

only one.

Q Let's say I have a three year old child who has no history of trauma, no co-morbid conditions, nothing else going on except for gender dysphoria.

Do you believe that that child is a candidate for medical treatment of their gender dysphoria as they get older?

A So I think the diagnosis of gender dysphoria in a three year old is extraordinarily difficult. What is a three year old's understanding of gender?

If you have had kids you know that boys like to put on mommy's shoes. Girls like to wear, you know, daddy's glasses. I mean, boys have, there is just exploration and children do these things.

They might say they -- are they going to say they don't like their penis. They don't know what gender is at the age of three or four. I think that is frankly absurd, most of that.

And we know, we talk about this later, those kids, that resolves over time in most of those children. If it does not, then they need supportive therapy to help them out.

You can't imagine a circumstance in which a child could be accurately diagnosed with gender dysphoria?

Page 87

are any minors who have gender dysphoria?

Α Sure. 2

Q And just gender dysphoria, no co-morbid 3 conditions? 4

A Well, I think there is an explanation. They may 5 6 not have obvious co-morbidities. I think with supportive therapy, one would be able to identify 7 reasons why they have rejected their natal sex. 8

> And those children, their dysphoria would likely resolve with that therapy. Because really what the goal is, the goal of treatment for gender dysphoria is not to make the person look like another sex. That is not the goal.

> The goal is to resolve the dysphoria, the distress. Right? So if you can resolve the distress with really safe reversible interventions to addressing the biopsychosocial issues, that is what should be done.

- Q So you believe there is no way to resolve gender 19 dysphoria through physical changes, is that what 20 I'm hearing you say? 21
- 22 A I don't think physical changes are helpful. This 23 would be the only disorder listed in the DSM for which there is an intervention to modify 24 appearance to fix the mental disorder. It's the 25

Page 89

In the absence of all other psychiatric or family 1 dynamics, social causes, bullying, social 2 isolation, influences of other children, no, I 3 think there are other factors that explain it. 4

It's a symptom of something else that is

- You said they should receive supportive therapy. 7 What do you think the goal of that therapy 8 9
 - A I think to resolve their dysphoria and to address their anxiety, depression. How they feel about themselves. Because it's not -- the child might come and say I really want to be a girl. Okay. Tell me more about that.

This is not conversion therapy. We are talking about just helping them out to feel less distress, less anxiety. What is going on in your life? What's happening at home? Does your dad beat your mom up? Is there alcoholism?

I mean, in the four plaintiffs we see a lot of that going on. None of these four children would have qualified for treatment based upon the only solid evidence that's claimed to be solid, it's really weak, which is the Dutch protocol.

Because the Dutch excluded those people with

May 26, 2023 Page 92

1 any significant psychosocial issues. All four of

- the plaintiffs have major psychosocial issues. 2
- They would never have been treated per the 3
- 4 evidence that we have, which is the Dutch protocol. 5
- Q So earlier you said that, you know, the resolution 6 7 of the gender dysphoria was not going to come from changing physical characteristics. 8

9 So the goal of that supportive exploratory therapy would be to be at peace with one's 10 assigned sex, is that right? 11

12 A Correct. I think that being at peace would come not with a focus on you have to accept your sex. 13 Not with something that might be called conversion 14 15 therapy. But really with exploring everything that is going on in the child's life. 16

> What has happened here? What happened? How were they raised? What is going on? Have you been abused? Have you been -- how safe are you at home? What is going on at school? Do you feel isolated? Do you have friends?

> All of those issues. We know that social media for all these girls has a powerful impact on their reasons for all of a sudden now when they are adolescents deciding they want to be boys.

- Ohio? 1
- A Yes. 2
- Q The term weight affirming care, does that come 3 4 from somewhere or did you make it up for your testimony?
- A I made it up. 6
- 7 Okay. You talked about how you provide promotional presentations for Mounjaro. That's, 8 is that Tirzepatide? 9
- A Yes, it is. Does Wendy know how to spell that? 10 It's T-I-R-Z-E-P-A-T-I-D-E. 11
- 12 So my understanding is that Mounjaro has some profound weight loss side effects, is that 13 correct? 14
- Yes. 15 Α

Q What about a patient who came to you in your 16 practice and said, I'm very overweight. I don't 17 18 want to go outside because I'm so overweight. I don't want to see my friends because I'm so 19 overweight. I feel like this body is preventing 20 me from participating in society. 21

> Do you think it would be appropriate to treat that person with weight loss drugs?

So I, as I said, I'm a diplomatic of the American Board of Obesity Medicine. I'm very knowledgeable

Page 91

Page 93

- You believe that once all those issues have been 1 fully explored and addressed if they exist, 2
- nonetheless, it's not appropriate to provide 3
- gender-affirming, to provide treatment of gender 4 dysphoria to minors? 5
- 6 A To provide -- nonetheless, it would not be appropriate to provide hormonal treatment, either 7 puberty blockers, opposite sex hormones, surgical 8 9 reassignment to minors, correct. That would not be appropriate. 10
- O If you believe it or not, we started by talking 11 about your testimony in Ohio. I will now turn 12 back to that. 13

During that testimony in May of 2022 you were 14 still seeing patients, adult patients who you were 15 treating for gender dysphoria, is that right? 16

- A Correct. Those would have been follow-up 17 patients, but not new ones. 18
- Q Was your provision of treatment for gender 19 dysphoria to adults particularly lucrative? 20 A No. 21
- Q During your testimony in Ohio you compared 22 23 gender-affirming care to providing weight affirming care with an eating disorder. 24
 - Do you recall that part of your testimony in

about treating obesity.

Obesity has many adverse consequences. We want to help people as best we can to help them lose weight. There are medications approved for the obesity. Yes, I treat those people.

Most of them are not dissatisfied with their, well, their appearance, but they are really struggling with knee pain, with sleep apnea and other adverse consequences, medical consequences, that derive from their weight. There is medications approved for treating weight.

Mounjaro has been studied. It works really well, but it's not yet approved for weight loss. I would not give Mounjaro to those people. I would offer them other medications which are approved for weight loss by the FDA.

I'm not surprised. But you could imagine a patient who said in addition to my knee pain and my sleep apnea, I want to lose weight for that, but I want to look thinner because I want to be thinner in society.

Would that be an okay reason to provide someone with a weight loss drug?

- It would depend on their body mass index. 24 25
 - Q Assuming it was not unsafe for them to lose

25

17

18

19

20

21

22

23

24

Page 96

Page 94

weight?

A If their body mass index is above thirty and that is one of their concerns, sure, I would do that.

My example with the weight affirming intervention was related to a minor, a seventeen year old, who came in and said I'm too fat. And she has anorexia nervosa. Okay? That is a condition which children eat very little. It's usually females. They eat very little. They have no, their menstrual periods stop. They are really underweight, but they still see them, they see themselves as too fat.

They want to have a, they feel bad about their body. They feel they are too fat and so they want to lose weight.

So if they came to a physician and said I'm really fat. I feel bloated. I am really fat. We don't give them medication to lose weight when we as physicians judge them to be underweight.

So we would not do that. We would not affirm their self-diagnosis. Which is what is happening with gender-affirming care. The child says I want hormones. Oh, okay. I want to be the opposite sex. We will take care of that.

You just basically affirm them instead of

weight and, therefore, change their body and it
was not medically contraindicated for them to lose
weight. So if their primary reason for wanting a
drug was they wanted to lose weight, you could see
that that would be acceptable medical practice?

6 A Yes. Weight loss in people who are obese is7 medically beneficial. No question.

8 Q So in your testimony in Ohio you had some
9 criticism for advocacy groups and activist
10 positions.

I believe you said "Most of these societies are heavily influenced and swayed by activists and by physicians who run transgender clinics who have a profit motive."

Does that sound like something you said in your testimony?

17 A It does.

Q Okay. I think you also said that medicalsocieties have been co-opted by these activists.

Does that sound like something that you said in your testimony?

A It does.

Q Do you think that physicians who treat patients at clinics in academic institutions are profit motivated?

Page 95

Page 97

having the physician make the diagnosis. In the case of anorexia you are underweight. You have a psychiatric disorder -- this may not be the way we say it -- but we will try to help you out. Let's talk about it. What's going on? What's going on at home? I will send you to a therapist.

at home? I will send you to a therapist.

Q So in your weight loss example, the reason that you think that that would be problematic, this prescribing a weight loss medication to a minor who was underweight and also had anorexia would be one, primarily, because it would be unsafe for that person physically to lose weight?

A There are a few reasons. One is that it's not appropriate. The person, the patient made the wrong diagnosis. I make the right diagnosis. I'm the physician. You are underweight. Your problem is not your weight problem. It's something else going on. That is why you are not eating.

The best treatment for you is not a change in your body appearance. It is therapy. We need to figure out what is going on here. Why are you not eating?

Q But to go to the other side, there are
 circumstances in which someone who had a BMI that
 was higher than it should be who wanted to lose

A Some of them might be. I think the academic centers make money off certainly the surgeries and the patients. I think the physicians themselves who are treating are probably uninformed about the evidence base and how weak it is.

If they really would honestly and objectively look at the evidence base, they would see that they are really harming these children rather than helping them and they would not treat.

- Q But it was your experience in providing treatment for gender dysphoria to adults in your private practice that was not particularly lucrative?
- A No. I had not many patients. I think there is more -- I was not running a transgender clinic like some physicians. I think there is more money in the surgeries than there is in just prescribing medications.

But I'm not sure I -- if you have a gender clinic and that is mostly what you do, you do not want to lose those patients.

Q So when we were talking earlier about Do No Harm, you said that you didn't include it on your C.V. attached to your declaration because some people think it's a politically motivated organization.

Do you remember that we were talking about

May 26, 2023

ase 1:23-cy-00595-JPH-KMB Document 58-6 K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD Page 98 Page 100 that? 1 1 in the health care field." A Yes. Do you see that? 2 2 Q So do you think that being involved in a Α 3 3 Yes. 4 politically motivated organization is detrimental 4 Q So later on in your declaration in Paragraph 70, to credibility? you say that doctors, like all groups, are 5 A I don't think it is politically motivated. I susceptible to group think and social contagion. 6 6 think this organization is really for quality care Do you see that? 7 7 of patients and to remove ideology from the 8 8 Α I do. practice of medicine. Okay. So there is a list of organizations that 9 9 Just do what is best for the patient in front have endorsed or approved the treatment of gender 10 10 of you. So I don't view it that way. People, you dysphoria for minors. 11 11 One of them is the American Medical 12 know, unfortunately this whole area of transgender 12 has gotten, outside of medicine and science it has Association which, I assume, you are familiar 13 13 with? become like a right and left thing and Republican 14 14 and Democrat. 15 15 A Sure. There are about thirty, twenty-five or It should be what is best for the patient. thirty percent of doctors who are members of that. 16 16 We are talking about children here. It distresses So the vast majority of doctors are not a member. 17 17 me to see that it's, you know, there's politics in 18 Q Do you think that the AMA, the American Medical 18 there. There should not be. You can't, you can't Association, do you think of that as a politically 19 19 stop people from, I mean, from their perceptions. motivated organization? 20 20 I leave that out because I don't want to have that Yes. 21 21 Α as a factor. I don't know if I answered your O Do you think that that is an organization that has 22 22 23 question. 23 been overtaken by group think and social contagion? Q No. You said you leave it out. Just to make sure 24 24 25 I heard you correctly, you said you leave it off 25 A Yes. Page 99 Page 101 For the American Academy of Pediatrics, are you your C.V. because you don't want your position as 1 familiar with them? a senior fellow in the organization Do No Harm to 2 2

be a factor in evaluating your opinions? 3 A Right. Yeah. I think because of people's 4 perception of Do No Harm. Because their 5 6 perception would be, I don't know, they might perceive it as a right wing or something like 7 that. It's really what is best for patients. 8

9 MR. SELDIN: So Erica, if you could bring up Exhibit 1, please. 10

O In Paragraph 40 of your declaration you talk 11 about -- I will wait for it to come up. You 12 probably have it in front of you as well. 13

A This is in my declaration. 14

Q Yes. Paragraph 40. I think is on Page 9. You 15 will see that you talk about WPATH as a U.S. based 16 advocacy group. 17

Do you see that, Dr. Weiss?

A Yes. 19

18

Q Then do you see where it says that? 20

A Yes. 21

22 Q Okay. Then if you go to Paragraph 42 -- I'm 23 sorry. Go back to 40.

In Paragraph 40 you say that the WPATH 24 "guidelines have been adopted and endorsed by many 25

- Yes. 3 Α
- Q Is that an organization that you think is a 4 political advocacy organization? 5
- 6 Not entirely. It has many political advocacy positions. I think they have adopted viewpoints 7 that are not based upon good evidence in many 8 9 respects. And gender is one of them.
- Q So you think that that, in that respect that is 10 subject, it has been overtaken by group think and 11 social contagion? 12
- Absolutely. 13 Α
- Q I am going to ask similar questions for another 14 couple organizations. 15

The American Psychiatric Association, do you 16 consider that a political advocacy organization? 17

So I would not use -- I think that it's not a Α political advocacy organization, but they failed to carefully look at the evidence in the treatment of gender dysphoria.

And so they have been swayed by the position that the transgender activists take in that regard. I think that is a clear way of stating it. So it's not entirely a political advocacy

18

19

20

21

22

23

24

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Document 58-6

Page 104

and their positions fail to address the science 2

group. They have been affected by these activists

- and the evidence. 3
- 4 Q Do you feel the same about the American
- Psychological Association? 5
- A Yes. 6

1

- 7 Q Do you feel the same way about the American
- Academy of Family Physicians? 8
- A Yes. 9
- Q And in that same regard, do you consider them as 10
- having been overtaken by group think and social 11 contagion? 12
- Yes. Α 13

24

25

5

6

- O So that I understand, the organization Do No Harm 14
- that you belong to, you do not think of that as a 15
- political advocacy organization? 16
- A No. It is very difficult for people to be 17 outspoken and take positions that are not so 18
- popular especially when there is -- I think one 19 can be labeled a transphobe. And, you know, you 20
- can be accused and there is a tendency of threats 21
- and violence from the other side. 22 23
 - So I think there are complex reasons why people might take a stance in this regard. Many of these people that are thinking the same are

- (AT THIS TIME A SHORT RECESS WAS HELD OFF
- 2 THE RECORD AFTER WHICH THE FOLLOWING PROCEEDINGS
 - WERE HAD:)
- 4 (ON RECORD AT 12:07 P.M.)
- BY MR. SELDIN:

1

3

9

10

18

- Q Dr. Weiss, I want to talk a little bit about your time in independent practice between 2003 and when 7 you left in 2022. 8
 - During that time about how many patients did you see per year for all conditions?
- A I have to do the math on that. That's -- I don't 11 know the answer. I had thousands and thousands of 12 patients I was seeing over the years, of course. 13
- I would see, let's see, I would see fifteen 14 patients a day roughly five days a week. 15
- So that is seventy-five times probably about, 16 including vacation, forty-five weeks. 17
 - Seventy-five times forty-five.
- Q I will get my calculator out. So 3,375 a year. I 19 assume some of these were repeat customers? 20
- Yes. 21 Α
- 22 You would call them something different. Patients 23 that had continuing care with you?
- Yes. 24 Α
- Q So thousands, if not tens of thousands, over the 25

Page 103

Page 105

- coming out and saying the same viewpoint. But 1
- group think and social contagion, fear, many 2
- people are not members of these groups. They do 3
- not want to get involved. 4
 - The Endocrine Society, which you will ask me about, a lot of the endocrinologists are not
- 7 members. My group, most of them don't treat
- gender. They don't want to treat them. That is, 8
- 9 you know, they just are not, they don't buy into
- the WPATH approach. 10
- Q I take it then that you also think that Do No 11 Harm has not been subjected to the same kind of 12 group think and social contagion as these other 13 groups? 14
- A Correct.
- O Okay. 16

17

18

19

20

24

- MR. SELDIN: So I see that it's 12:01 East Coast time. I know it's bright and early in Utah.
- Ms. Youngs, how do you feel about taking a break now? Do you want to take a short break and
- then go another hour before lunch. What would you 21 like to do? 22
- 23
 - THE WITNESS: We can take a short break and then take another break in other hour.
 - (OFF RECORD AT 12:01 P.M.)

- course of your almost twenty years in Ohio? 1
 - I was in Ohio since --
- Q I asked that poorly. From 2003 to 2022 during
- your independent practice, you saw thousands of patients? 5
- A Okay. To clarify, my independent practice was stopped when I was employed by Lake Health. That 7
- was the end of 2019. 8
- 9 Q Okay.
- A So 2003 to 2019 I was independent. Then I was 10 employed. You know, if you do multiply those 11
- 12 years times the 3,000 you will get that. That is
- 13 a lot of patients.
- And so of that large number, about one hundred 14 during that whole time you treated for gender 15 dysphoria? 16
- Correct. A 17
- 0 So a very small part of your overall practice? 18
- Α Correct. 19
- Q And I believe in your declaration you describe 20
- yourself as the principal physician in northern 21 Ohio offering hormonal treatment for adults with 22
- 23 gender dysphoria, is that correct?
- Correct. 24
- Q And that was based on those patients during that 25

Case 1:23-cv-00595-JPH-KMB K.C., et al VS Document 58-6 Filed 06/12/23 Page 28 of 122 PageID THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023 Page 108 1 time? A A letter from a therapist. A It was, that statement derives from not the number Did you require the therapist to have any 2 2 particular kind of background or licensure? of patients I was treating, but that during that 3 3 4 period of time up until 2013 the patients who came Well, they had to be a licensed therapist. to me indicated, and the website that was Okay. You didn't require a psychiatrist, for 5 5 example? available as a resource as to what physician they 6 6 7 could go to for their gender-affirming care, as Α No. 7 you put it, was me. Q A letter from a therapist. What would you look 8 8 So I was the principal physician on that Be for in that letter? 9 9 All website. Essentially that is what it was A I would look for a statement that that person met 10 10 criteria for gender identity disorder, which was a called. That website indicated that I was the 11 11 doctor in northern Ohio to see for hormonal 12 12 DSM criterion or term at that point. And that treatment. they were an appropriate candidate for hormonal 13 13 O That was the basis of that statement, was your intervention. 14 14 15 inclusion and description? Q You would require a letter from a therapist saying 15 A Correct. that they had been diagnosed with gender identity 16 16 Q Not the number you were seeing? disorder in the DSM 4? 17 17 A Correct. Right. 18 18 MR. SELDIN: Erica, could you pull up Q And that they were an appropriate candidate for 19 19 Exhibit 3, please. treatment for their gender dysphoria using 20 20 Q Doctor, Exhibit 3 is a printout from the website hormones, correct? 21 21 22

- called TransFamily. I know you said the website 22 was called Be All, but does this bear any 23
- resemblance to the website? 24
- A This is along the same lines. So the doctor there 25

Α

- 23 O Okay. And did you require anything else in the letter? 24
- 25 A No.

Page 107

Page 109

- that is mentioned, Thomas Murphy, that was the 1 site that, that was the other location that was 2 doing hormonal treatment during that period of 3 time that I was treating. 4
- Q If you look down it says the LGBT Pride Clinic. 5 6 That was the Pride Clinic that some of your patients didn't want to go to? 7
- A Correct. 8
- 9 Q Why didn't they want to go there?
- A I don't know the specifics. That particular 10 patient or a couple of patients who expressed 11 that, they didn't like the way they were treated 12 there. I can't give you details on that. 13
- Q For those hundred people that you treated did you 14 treat other conditions for them other than their 15 gender dysphoria? 16
- A Occasionally. I might do, I might have treated on 17 a few of them high blood pressure. Most of them 18 they were just seeing their primary care provider 19
- for their other care. 20
- Q When patients would come to you for treatment for 21 their gender dysphoria, did you ask them to 22 23
 - provide a diagnosis prior to you providing care?
- Yes. 24
- Q What did you require?

- Did someone ever give you a letter and you said this is not enough, I need something different? 2
- A Some patients came without a letter. I asked them 3
- for a letter. But they would, all those patients 4 I treated did have some confirmation by a 5
- therapist that they were appropriate candidates 6
- for treatment. 7
- Q You stopped seeing new patients in 2013, is that 8 9

You stopped seeing new patients for the 10 treatment of gender dysphoria in 2013, is that 11 correct? 12

- Α Correct. 13
- Q I believe that is right when the DSM 5 came out 14 about that time, is that your recollection? 15
- A Yes. 16
- Q Did you ever treat anyone who had come to you with 17 a letter with gender dysphoria? 18
- Oh. Based upon the DSM 5, no. 19
- Q Okay. 20
- A You know, they are basically, I mean, the 21 22 distinction between the two is really not a major
- 23 distinction. One is they have to have dysphoria.
- They would like -- the goal has been to 24
- demythologize this disorder. 25

Page 112

Page 113

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Page 110

So there is movement towards changing the terminology. But in gender dysphoria they have to have significant distress associated with the gender identity.

In either case, the people who would come to me wanted hormonal treatment. Whatever you called it, gender identity, gender dysphoria, they wanted hormonal treatment to modify their appearance so they would feel better.

- 10 Q Did the move from the DSM 4 to the DSM 5 have any bearing on your decision to stop seeing new patients?
- 13 A No, it did not.

12

13

17

18

19

25

- Q Did you do any independent evaluation of the diagnosis for, at the time, gender identity disorder in your patients?
- 17 A Yes, I would question what their story was on their feelings about their gender. When did it start? What else was going on?

I was not treating depression, anxiety. I did not address, you know, their childhood upbringing and whether they were abused sexually and those kinds of things, you know.

My hope was that the therapist would be providing that.

have been able to evaluate her for quite some timeafter.

So I said I don't feel comfortable giving you hormones at this time. I think you need to come back. She was one I declined to prescribe. I didn't really feel that she was adequately evaluated.

- 8 Q Did that patient come back to you for treatment or did you see that patient?
- 10 A I did not see her again. That was around probably 2012, 2013.
- 12 Q So right when you were going to stop seeing new patients anyway?
- 14 A Yes.
- 15 Q And were there any other patients who you did 16 not treat in a similar way based on your 17 assessment?
- 18 A There were a few people that I wanted to have come
 19 back and discuss further. But most people I would
 20 initiate therapy on the first or second visit in
 21 these adults.
- Q Were there any patients -- what was the youngestpatient who you prescribed hormones or othermedication to?
- 25 A Probably twenty-one, twenty-two.

Page 111

- Q Did you have a particular evaluation or set of
 questions or was this more general patient
 history?
- 4 A There would be questions. I would ask about the onset of their symptoms. I would go through the whole history of when they started to reject their natal sex.

It kind of went -- it was open with no, you know, it was with open-ended questions so they can talk to me about that like a therapist might but, you know, in a forty-five minute session. I would explore again on the next visit how they were doing emotionally.

14 Q So someone comes to your office. They have a letter. You have an initial appointment of forty-five minutes.

At the end of that appointment would you prescribe any medical treatment or would you require them to come back?

She wanted to have -- and I would not, I would not

A In most cases I would prescribe in these adults.
 Occasionally I would ask them to come back. One
 person who was eighteen who had a letter, but I
 was really uncomfortable, there was a lot of stuff
 going on with her. She was going off to college.

- Q So you saw one potential patient who was eighteen
 and you ended up not providing treatment.
- Then the next youngest patient you actually prescribed to you believe was twenty-one or twenty-two, is that accurate?
- 6 A Yes.
- Q For the folks that came to you with a letter, were
 most of them just starting hormones or had they
 been getting hormones from someone else?
- been getting normones from someone else
- A Most of them had not been on any hormones at all.O So you would have been starting them on hormonal
 - treatment?
- 13 A Yes.

- 14 Q Of the hundred patients that you saw, what 15 percentage do you think you were starting new as 16 opposed to continuing someone else's 17 prescriptions?
- 18 A Probably ninety-five percent.
- 19 Q Typically what medications would you prescribe?
- A So I would give testosterone to females. I wouldgive spironolactone, which blocks androgen action.
- I would give estrogen along with that to those
- males, biologic males. So biologic males would get spironolactone and estrogen. It was Estradiol
- usually.

May 26, 2023

Page 116

Page 114

Document 58-6

1 And biologic females would get testosterone --2

- Q Did you ever refer patients for surgery? 3
- 4 A I had patients that had surgery. I did not direct them to a surgeon. In the patients that sought 5 out surgeons on their own some went to Thailand. 6
- 7 Some went to a surgeon at Metro. Some went elsewhere for surgery for mastectomy, genital 8

9 reconstruction.

10

11

12

In terms of referring a person, directing them to a particular surgeon, patients would often seek those surgeons out on their own.

- O Did you ever write letters for them to bring to 13 their surgeons? 14
- 15 A I probably did. I have been seeing this person for so long and they have been on this therapy. 16 17
- Q Do you recall of the hundred patients about how 18 many of those letters you may have written? 19
- A Maybe five. Something like that. 20
- Q Earlier we talked about which of your patients had 21 had a hysterectomy or had gonads removed. 22

In terms of the timeline of care, do you 23 think most, maybe ninety-five percent of the 24 people who came to you had not been on hormones 25

- A Probably about maybe fifteen or so. Fifteen to twenty. Something like that. 2
- Had had surgery of any kind? Q 3
- 4 Α
- Q Of those fifteen to twenty do you recall which 5 surgeries they had? 6
- Most of them had mastectomies. Bilateral 7 mastectomies. 8
- Q You said most of those fifteen to twenty. Do you 9 have an estimate of --10
- A So I would say -- yeah. So maybe five or so had 11 12 other surgeries besides mastectomies. So general reconstruction or augmentation, mammaplasty. That 13 kind of thing. Breast implants. 14
- 15 Q Did you follow any guidelines or standards of care in your practice regarding the treatment of gender 16 dysphoria? 17
- During that period of time I was following 18 Endocrine Society guidelines. 19
- Q Do you recall which ones? 20
- A Well, it would not have been 2017 because I 21 stopped in 2013. So it was 2009. 22
- 23 Okay. And then did you use the WPATH guidelines at all? 24
- 25 Α No.

2

- before, right? 1
- Α Correct. 2

13

14

15

16

17

18

19

20

21

- Q So had any of your patients when they started care 3 with you already had some kind of surgery to treat 4 their gender dysphoria? 5
- 6 A No. No one.
- Q Okay. They would have had those surgeries while 7 you were treating them, right? 8
- 9 A Let me clarify that. There was one person who had the orchidectomy who I saw last year who had had 10 his treatment, all of his treatment, hormonal and 11 other stuff, before he came to me. 12

I saw him because the office didn't know what he was coming from. He was one who had the orchidectomy in Philadelphia after being evaluated there.

When he came to me as a new patient, he wanted testosterone. He was one of the two who had an orchidectomy that regretted it. Otherwise, no one else had had surgery before they came to

So then I guess of the ninety-nine remaining 22 Q 23 patients, how many of them during the course of your treatment of them do you think had surgery of 24 any kind? Then we will talk about which kind. 25

So we talked earlier about your fellowship with 1 those twelve patients that you had seen with the supervising physician.

Then after that you think the next patient that you saw would have been in 2003 when you started your independent practice.

How did it come to be that you were providing treatment for gender dysphoria in 2003?

9 Well, I wanted to help people. People called my office. I wanted to relieve their distress and do 10 what is best. 11

> I mean, the goal, the reason I went into medicine, I like to help patients. So they would call my office. And I thought -- and there was no one else treating in the area during that time or they chose not to go to Metro. There were closer to my office or they were unhappy with Cleveland Metro.

> And so I said okay. I will treat you. I looked at the Endocrine Society guidelines. I did what I thought was best for them at the time.

Q In terms of how you then went from no patients to one hundred over the course of your time in independent practice, was that primarily through word of mouth and your presence on that website?

Page 120

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Document 58-6

A Yes. 1

- Okay. Did you independently advertise that you 2 provided these services? Or no? 3
- 4 Α

14

15

16

17

18

19

20

21

22

23

24

25

- Q What prompted you to stop seeing new patients in 5
- 2013 for the treatment of gender dysphoria? 6
- A Well, I had a gradual realization that I was 7 really not helping people. Yes, they had these 8 physical changes, but they still had a lot of 9 psychiatric stuff going on. 10

Lots of them had anxiety and distress and depression and sleep problems. They felt bad. They were -- I was urging them to follow up more regularly with a therapist. And there was an increasing number coming out. I should not say --I should say calling the office to be seen.

I would give priority over the years to get those people in promptly to the practice even though there was a delay, you know, my next opening might be three months and I would try to find a spot for the people with gender dysphoria. I felt then that my other patients were suffering.

So the combination of that and what I was doing was not helpful and my other patients were losing out. I said that's okay. I'm not going to A It was really just from an open dialogue

- 2 discussion with the patients when they come back.
- How are they doing? Asking what their emotional 3
- 4 state is. Mood. Are they feeling down or sad?
- Have they lost pleasure in things? You know, are 5
- they nervous or anxious a lot? How is their 6
- sleep? So on. 7
- Did you encourage those folks to seek other 8 additional medical treatment when you were here 9 about this? 10
- 11 Yes. Therapists. Α

14

15

17

18

19

20

21

22

23

24

25

11

12

13

14

15

16

Q In the same paragraph you talk about the potential 12 13

What do you mean by potential harm?

- Well, I think I detail that in my declaration. Α
- I mean, specifically with the adult patients that 16 you were treating from 2003 to 2013, what potential harm were you talking about?
 - A Well, so given that the lack of long-term evidence of benefit, even in adults, and the potential harm with these opposite sex hormone treatments, I didn't -- and I was not apparently achieving the goal of relieving their distress, and potentially these were -- giving estrogen to a man might be harmful.

Page 119

Page 121

- be seeing new people. I will take care of the 1 patients that I have. Those other patients can go 2 down to Metro. 3
- Eventually other centers emerged. University 4 Hospitals started providing care. 5
- 6 Cleveland Clinic opened up a transgender clinic. 7 They promote theirs. Both of them are promoting their practices. 8
- 9 So I think in your declaration you said you realized the lack of benefits and the potential 10 harm these treatments caused, is that correct? 11

MS. YOUNGS: Can you point to where that 12 is? 13

Q Yes. 14

MR. SELDIN: Erica, can you bring up 15 Exhibit 1. 16

In Paragraph 8 you will see in the last two or 17 three lines, "I stopped seeing new patients with 18 gender incongruence when I realized the lack of 19 benefit and the potential harm these treatments 20 caused." 21

Did I read that correctly?

23 A Yes.

22

Q Okay. Great. And how were you measuring or 24 observing this lack of benefit? 25

- There is thrombotic risk with it. You know, 1 clots in the veins and arteries. What harm am I 2 doing by giving testosterone to a female? So 3 there were a lot of unknowns and potential harms. 4
- Q You said potential harms. Did anything bad happen 5 to one of your patients in that regard, or were 6 you concerned it might in the future? 7
- A There were some concerns with some treatment. 8 9 There is some evidence that there is worsening in 10 a condition called sleep apnea.

There was a person I was giving -- a biologic female I was giving testosterone to. That person's sleep apnea got worse. That was a potential harm. That is one that comes to mind.

The others might have been apparent with longer follow-up. Not that I saw.

- Did you treat any patients from 2003 to 2022? Did 17 you have any that you saw that whole time? 18
- With gender dysphoria? 19
- Q Yes. 20
- A From 2003 to 2013 was a period of ten years of 21 when I was treating the hundred patients. 22
- 23 I'm asking you a different question. Is there any patient who you treated for gender dysphoria that 24 you saw in the first, you know, one or two years 25

May 26, 2023

Page 124

9

13

14

15

16

- 1 of your practice who you then treated for the next twenty years? 2
- A Oh, yes. There is one that comes to mind. There 3 4 may have been others.
- Q So you think you had one patient that you treated 5 for possibly that whole range of time? 6
- Yes. 7 Α

24

3

4

- Q Okay. 8
- 9 A Probably longer actually. Maybe I treated him even before. Well, at least during that period of 10 time. 11
- 12 Over those twenty years did you see any of these potential harms come to fruition? 13
- A Yes. That person with the perhaps worsening sleep 14 15 apnea given testosterone, yes.
- Q So that sleep apnea person is the same person? 16
- A No. That is a different person. That was not 17 twenty years. That person I treated for probably, 18
- actually I was seeing that person even in 2022. 19
- 20 That person, that was a follow-up person. That person I probably treated for ten years. 21
- Q What I'm trying to get at is you had at least one 22 23 patient that you saw for twenty years and other
- patients that you saw for ten or more. 25 Did you see any of these sort of long-term

- A I would say long-term exploratory supportive psychotherapy. 2
- Q How long-term? 3
- A As long as necessary to really sort out and help the person with their psychic distress. It varies 5 with the individual. No time limit. 6
- I want to talk about your current role at 7 Intermountain Health. 8

What do you do there?

A I'm an endocrinologist seeing adults and 10 adolescents with endocrine, diabetes, metabolic 11 disorders. 12

> And because I'm board certified in internal medicine I will address internal medicine related issues outside of the purview of an endocrinologist.

- What are those things that you see that are 17 18 outside of the purview of an endocrinologist?
- It might be hypertension. It might be high blood 19 pressure. It might be fungal infections. It 20 might be kidney stone prevention. Things like 21 22
- 23 0 Is that because folks come to you for that? Or is it, hey, Doctor, I know I'm here for my diabetes, 24 25 but I've also got this foot thing?

Page 123

Page 125

- potential harms come to fruition in those 1 patients? 2
 - MS. YOUNGS: For clarity, that's gender dysphoria?
- Q Yes. Just for gender dysphoria treatment. 5
- 6 A I would say no.
- Q You also said in Paragraph 8, the last sentence, 7
- "I also found that these persons had minimal 8
- 9 psychological evaluation for their psychic distress." 10
- Did I read that correctly? 11
- A You did. 12
- Q So when you say that do you mean -- what do you 13 14
- Do you mean prior to them initiating 15 treatment with you? 16
- A Prior and even after. 17
- Q But at the time that you provided treatment you 18 thought their evaluation had been sufficient for 19 you to start them on hormones? 20
- A That is what I thought at the time. In retrospect 21
- 22 I would say no, that it was inaccurate.
- 23 O Today what would you consider an appropriate psychological evaluation for an adult prior to 24
- providing treatment for gender dysphoria? 25

- A Yes. It's usually the latter.
- Q Not to put too fine a point on it. I'm not saying that's what I say to my doctor, but it has been 3
- known to happen?
- A Absolutely. No. I like to look at the whole 5 picture. Oh, what's going on? Okay. You're 6 having problems with hives. Has your doctor tried 7 this? You might consider that. Here, I will send 8 9 him a note.

How about your high cholesterol? Well, I know I am asked to address your thyroid, but here is a medication for your cholesterol you might try because these others didn't work.

- You said you treat adolescents. Do you see anyone 14 under eighteen? 15
- Α Yes. 16

10

11

12

- What percent is your practice of people under 17 eighteen? 18
- About five percent. 19
- O How old are they generally? 20
- Sixteen. Seventeen. A 21
- Do you see anyone fifteen or younger? 22 O
- 23 A Sure. I'm open to that. So my practice is open.
- I only really started seeing people February 1. 24 So but the office knows I will see those people. 25

19	Q	I know you have been seeing patients since	19		Logan. That's something, like, four hours away.

I know you have been seeing patients since February. 20

A February. Yes. 21

Q Is it a couple hundred? Is it dozens? How many 22

people --23

A A few hundred.

Q Do you prescribe puberty blockers in your current

Logan. That's something, like, four hours away.

20 Q All right. So Intermountain has a pediatric endocrinology practice, but it's not in 21 22

st. George. It's some distance from you?

23 A Correct.

Q And in the pediatric endocrinology practice at 24 25 Intermountain's other locations, do you know if

May 26, 2023

Page 132

Page 133

Document 58-6 K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD they treat early onset puberty? A No. A Central precocious puberty, it's very likely I'm 2 2 3 sure. 4 Q Delayed puberty, would they treat that? 4 worker who was hired to run some of their things. A Very likely. 5 5 Q Turner Syndrome? no reason to. 6 6 A Sure. 7

Q And how about growth hormone deficiency or short 8 9 stature?

A Yes. 10

Q Would you agree that those are conditions that 11 should be treated by a pediatric endocrinologist 12 when available? 13

A Yes. 14

17

18

Q Dr. Weiss, this is a page from Exhibit 17. This 15 is from Intermountain called Additional Resources. 16

MR. SELDIN: Erica, could you scroll down a little bit for the text.

Q Have you seen this website page before? 19

A I don't recall. 20

Q You will see -- in the Transgender Care Section do 21 you see where I am in the middle of the page? 22

Yes. 23 Α

Q Do you see that it links to the UCSF Primary Care 24

Guidelines for Transgender Individuals? 25

Q Have you spoken to him? Do you know who he is?

A I'm not sure whether he is -- there's a social

That may be him. I've not spoken to him. I see

Do you think it would be relevant to tell him that 7 you think it's a mistake to link to these 8

9 resources?

Absolutely not. Α 10

Q Why not? 11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

6

7

8

9

10

11

18

19

23

Α Because I think most people have a viewpoint that is fairly -- in this area they are not open minded. They are not interested in seeing the evidence.

They made their -- they have confirmation bias. So by confirmation bias I mean that anything that they see that challenges their strongly held belief, they are not interested in seeing or they dismiss.

And if I brought this up, they would call me transphobic. They are not interested in seeing what is best for them based upon the evidence because they made their decision. They hire people based on their viewpoint in promoting the

Page 131

WPATH approach. 1

All these resources are affected by activists 2 and it's not scientifically based. It's not based 3 upon really good evidence. It's based upon their 4 conviction that this is the way to go. 5

As I have stated in my declaration, I think the evidence and the science does not support hormonal interventions for minors, nor does it support it for adults.

They give you these resources that this is the way to go.

Just to circle back to something we talked about 12 earlier. Not withstanding your feelings about the 13 evidence, you don't support banning care for 14 gender dysphoria in adults? 15

A No, not at all. If adults want to do it, that is 16 up to them. They are free to do so. 17

> MR. SELDIN: Can you pull up Exhibit 18, please, Erica.

Q You will see this is another page from 20 Intermountain on the telehealth services offered 21 to LGBTQ+ Patient Care. 22

Do you see that?

24 Yes.

Q Have you seen this page before?

A Yes. 1

O Do you see a little bit down it links to WPATH? 2 Do you see that? 3

Yes. Α 4

Q It also links to the Endocrine Society guidelines? 5

6 A Yes.

Q As well as the Report for the U.S. Transgender 7

Survey in 2015? 8

A Yes. 9

Q Have you spoken to your employer about their link 10 to these resources? 11

A No. 12

Q Do you think it is a mistake they link to these 13

resources? 14

A Yes. 15

Q Do you think it's ill advised? 16

A Yes. 17

Q If you scroll all of the way down you will see 18 under Referrals it says, "Please direct any

19 questions or comments to Associate Medical 20

Director of LGBTQ Health, Matt Bryan." Then there 21

22 is an email.

Do you see that?

Yes.

23

Q Have you ever reached out to Matt Bryan?

Document 58-6

Page 136

Page 134

A I don't think so.

- Okay. You will see on this page there are several 2 sessions on various topics that are offered. 3
- 4 Did you attend any of these?
- Α 5
- Q Okay. And I take it you didn't present at any of 6 these? 7
- That would not be taken well if I did. Α 8
- Q And I take it that is because of your position on 9 this care? 10
- A Because of what I previously stated, I think this 11 is not people -- they throw out science and 12 thinking when they have their strongly held 13
- beliefs and they fail to see the evidence that 14 kind of challenges that belief. 15
- Q There is an expert clinical panel listed here at 16 the bottom. There are several various names of 17 practitioners. 18
- Have you spoken to any of these 19 practitioners? 20
- A No. This is -- the second person, Ejay Jack, he 21 is the social worker who I think runs the 22
- 23 transgender program. You know, I have not spoken to him. 24
- Q You don't know any of the other providers that are 25

- to lesbian, gay, bisexual and transgender people?
- A 2

11

12

13

5

6

- Q Would you consider Senate Enrolled Act 480 to be 3 4 such a marginalizing law or policy?
- Not at all. 5
- Q Why not? 6
- A I think it's a policy that aims to protect minors 7 from harmful interventions, such as one might have 8 9 laws to protect or exclude minors from, you know, we don't let thirteen year olds drive. 10

We don't want them to smoke, to use tobacco. We don't want them to use alcohol. It's along the same lines, but it's protecting them.

The medical community has failed to do so and has continued to promote harmful interventions. And they are not stopping. It's just increasing for whatever reason even though in our countries they have realized these are harmful interventions. We need to hold off here. We need to stop. Let's go back. Let's see what is the best approach to treating minors with gender dysphoria.

So it's really the state trying to protect minors because these other institutions, which ought to have done that, are not. They are just

Page 135

Page 137

- there either? 1
- Α No. 2
- MR. SELDIN: Can you scroll up to the top 3 again, Erica. 4
- Q Dr. Weiss, you will see under LGBTQ+ Patient Care 5 6 a block of text. I'm going to skip straight to
- the acronym. It says, "LGBTQ individuals often 7
- experience disparities in health care access and 8 9 outcomes due to several factors, including social
- issues such as bias and prejudice, marginalizing 10
- laws and policies, and a lack of LGBTQ+ friendly 11 practices in all areas of care." 12
- Did I read that correctly? 13
- A Yes. 14
- Q Do you agree with that statement? 15
- A I think we are talking mostly about T here now. 16
- Not all of the other stuff, all of the other 17
- letters or the plus. I'm not sure what the plus 18 19
- But I think there is truth to that statement. 20 But I think we are focusing on transgender 21 dysphoria issues right now. 22
- 23 Q You would generally agree with that statement?
- Yes. 24 Α
- Q You would generally agree with that statement as

- increasing their number of children they are 1
- harming. 2
- Q Dr. Weiss, you have referred to other countries 3 and what they are doing. 4
 - MR. SELDIN: Erica, can you pull up Exhibit 26, please.
- A Florida is not another country. 7
- O We will get there. 8
- 9 A Okay.
- Q Dr. Weiss, this is an Amicus brief that Do No 10 Harm, your organization, filed in a case called 11 Dekker v. Weida. 12
- Do you see the document that I'm looking at? 13
- A I do. 14
- Q Have you seen this brief before? 15
- Α No. 16
- Q Did you work on this brief? 17
- Α 18
- O Were you asked about this brief? 19
- 20 Α No.
- Q And were you aware that Do No Harm filed this 21 22 brief?
- 23 Α No.
- Q Okay. 24
 - MR. SELDIN: So Erica, if you can scroll

Α

Yes.

21

22

23

24

25

A I just have all my references. That's all. They

9

12

13

17

O Okay. 13

MR. SELDIN: So Ms. Youngs, I would like 14 to request that we have the -- we don't need the book, but the title of the book, and then copies 16 of whatever is in front of him as they sit on his desk. We don't need them today, but we will need them.

- A The title of the book is in one of my references. 20
- Q Great. 21
- MS. YOUNGS: Okay. 22

MR. SELDIN: We have been going about an 23 hour. I'm just going to finish up this line. 24

25 Then we will go for lunch if that works for you?

- A An hourly rate.
- Q What is that hourly rate? 2
- A I think \$325. 3
- 4 Q What activities are you compensated for?
- A For my efforts to prepare expert testimony for those legislative bodies. 6
- 0 You became a senior fellow in March 2023, this 7 year? 8
- Approximately early this year. 9
- So we will talk through the testimonies since 10 then. But fair to say you believe Do No Harm 11
- would have compensated you for your time involved 12 in some of that? 13
- Yes. Α 14
- Q Do you receive compensation from Do No Harm for 15 16 any other activities?
- 17 Α
- 18 O Do you know who provides the funding for Do No Harm? 19
- A No. 20
- Q Have you discussed this case with anyone at Do No 21 Harm? 22
- No. 23 A
- Q Have you discussed your declaration with anyone at 24
- 25 Do No Harm?

Page 143

MS. YOUNGS: That would be great. Do you have any indication on how long we will be going

MR. SELDIN: I think we might go the full seven hours.

MS. YOUNGS: Okay.

MR. SELDIN: I will know more after the break for lunch. Let's finish this line real quick. Actually, you know what, now is probably a good time to break.

10 Does that work for you? 11

today?

MS. YOUNGS: Yes.

(OFF RECORD AT 1:05 P.M.)

(AT THIS TIME A SHORT RECESS WAS HELD OFF 14 THE RECORD AFTER WHICH THE FOLLOWING PROCEEDINGS 15 WERE HAD:) 16

(ON RECORD AT 1:45 P.M.)

BY MR. SELDIN: 18

- Q Dr. Weiss, I want to ask you about your position 19 as a senior fellow at Do No Harm. We were talking 20 about that a little earlier today. 21
- Do you receive any compensation as part of 22 23 being a senior fellow?
- Yes. 24
- Q What is that compensation?

A No.

- O Is Do No Harm aware that you are an expert in this 2
- case? 3
- A Part of my knowledge has been what has accrued 4
- over the years and more recently, which was 5 6 writing testimony for my statement in Ohio and
- subsequently for the statements in affiliation 7
- with Do No Harm. 8
- 9 I'm sorry. I must have misspoken.

Is Do No Harm aware that the state of Indiana 10 has employed you as an expert in this particular 11 case? 12

- A I do not think so. 13
- Q All right. We talked earlier about your testimony 14 in Ohio. That was before you became a senior 15
- fellow at Do No Harm, correct? 16
- 17 A Correct.
- 18 I think earlier you said that you testified in Utah, is that correct? 19
- A Yes. 20
- Q Dr. Weiss, this Exhibit 10 is the minutes of the 21 22
 - House Health and Human Services Standing
- 23 Committee. It is a long agenda for Tuesday, January 4, 2023. 24
 - Is that the date that you testified in Utah?

Case 1:23-cv-00595-JPH-KMB Document 58-6 Filed 06/12/ K.C., et al VS #: 3454 THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Page 148 A I don't remember. A Correct. Q Who asked you to testify at that hearing? Q On Page 2 you will see midway through there is an 2 2 A Likely Do No Harm. Agenda Item 3.1st Sub S.B. 16, Transgender Medical 3 3 4 Treatments and Procedures Amendments. Q Were you compensated for your testimony at that Do you see that, Dr. Weiss? hearing? 5 A I do. Yes. 6 6 Α Q Do you see the second name is "Dr. Daniel Weiss, Q Did you have to travel? 7 7 M.D., Do No Harm, spoke in favor to the bill"? 8 8 A A Yes. O Did you testify live or was it just written 9 9 Q Based on this agenda, is it fair to say you spoke remarks? 10 10 on or about January 24. Α I don't remember. 11 11 Q Did you write your remarks? 12 A Yes. My recollection of when I became a senior 12 fellow with Do No Harm was off a bit. My A I did. 13 13 Q Did anyone other than your wife review them? recollection of when I started with Do No Harm, I 14 14 could not recall with certainty and it was 15 15 Α No. obviously before this date of January of this Q Would Do No Harm have read them before you gave 16 16 them? 17 17 Q So you would think then that sometime in 2022 you Α No. 18 18 became affiliated with Do No Harm? Q Would they have read them after? 19 19 A I'm sure after they were submitted. A Must have been. Yeah. 20 20 Q And who asked you to testify at that hearing in Q Then we will pull up Exhibit 21. 21 21 Utah? Dr. Weiss, in addition to your testimony in 22 22 A I don't recall. 23 2022 did you testify again this year in support of a bill to ban care? Q Were you compensated for your testimony at that 24 24 hearing? For minors with gender dysphoria? 25 Page 147 Page 149 A If I was with Do No Harm, yes. 0 Yes. Q And did you have to travel to testify at that A Can you clarify your question? 2 Q Sure. I have up here remarks that appear to be hearing? 3 A No. from you. We will scroll down to the end and it 4 4 Q Who wrote your remarks for that hearing? ends with, "Please help protect the children of 5 5 Ohio" on Page 4 of the PDF. 6 A Daniel Weiss. Me. 6 Q Did anyone review them other than your wife maybe You will see right above your signature, 7 7 for grammar? Dr. Weiss, it says "Please protect the children of 8 8 9 A No. 9 Ohio" and your name and the date. Yes. Q And would anyone at Do No Harm ever have read Α 10 10 O them? Was this written testimony in support of House 11 11 A Only after they were submitted. Bill 68 in Ohio? 12 12 Q I think you mentioned earlier that you testified A I don't recall the number of the House bill. 13 13 in Montana, is that correct? There was the Safe Act Save Adolescents from 14 14 A I believe that is correct. Experimentation Act this year. I submitted 15 15 MR. SELDIN: Erica, could you pull up written testimony in support of that. 16 16 Q Did you testify live or provide oral remarks? Exhibit 22. 17 17 O These are minutes from the Montana Senate. If you A No. It was only written testimony. 18 18 will scroll down to Page 3, the third from the 19 Q Were you compensated for providing that written 19 bottom you will see your name, Dr. Daniel Weiss, testimony? 20 20 Do No Harm. A I don't recall. 21 21 Do you see that? 22 Q If you had been, would anyone other than Do No 22 23 A Yes. 23 Harm have compensated you?

24

25

Q Would this have been the January 27, 2023 hearing

that you testified at in Montana?

24

25

O

Then did you write these remarks yourself?

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD Page 152 A I did. 1 I think Ms. Youngs is trying to jump in. MS. YOUNGS: Dr. Weiss was just trying to Would anyone have reviewed them other than your 2 2 clarify that by treatment you mean certain, what 3 3 4 Α No. 4 procedure -- can you say what you mean? Dr. Weiss is not against treatment. MR. SELDIN: Erica, take us to Exhibit 24, 5 5 For all of these bills, Dr. Weiss, that we have 6 please. 6 Q Do you recognize this document? 7 been talking about, these are all bills that would 7 A Yes. ban medical care that treated gender dysphoria in 8 8 Q Is this your testimony in North Dakota in support minors. Is that your understanding as well? 9 9 of House Bill 1254? These bills would ban interventions that were Α 10 10 Α Yes. medications, hormonal interventions and surgery as 11 11 proposed treatment for gender dysphoria. 12 Do you recall whether you provided these remarks 12 live or just submitted them in written form? Not any treatment. Not medical care. But 13 13 A I believe it was just submitted in written form. only treatment that was intended to improve the 14 14 MR. SELDIN: Erica, could you pull up 15 15 dysphoria and that treatment that would be banned Exhibit 25, please. would be hormonal interventions and surgery. 16 16 Dr. Weiss, on Page 6 of this document all of the In the states in which you provided such testimony 17 17 way at the bottom you will see there is a line 18 were Ohio, Utah, North Dakota and Montana, is that 18 that says 3/28, 11:30 a.m. and then Daniel Weiss. correct? 19 19 A It must have been live. Α Sounds correct. 20 20 Q Okay. I will represent the link is to your You also submitted the letter we spoke about to 21 21 written testimony. I was not sure if you the Florida Board of Medicine, is that correct? 22 22 testified or not. That was correct. That was an email. 23 23 A I don't remember. To my surprise, if you have a Right. And earlier when we were chatting I think Q 24 24 video then it was live. 25 you had mentioned that you thought you had 25 Page 151 Page 153 This was not a gotcha. I was really asking for testified in Indiana and Wyoming. 1 1 the answer on this one. It was not a trap. Did you testify in those places? 2 2 A I believe so. You provided testimony in support of this 3 3 bill in North Dakota, right? Q Okay. Do you recall anything about your testimony 4 4 Yes. in Wyoming? 5 Α 5 6 0 And were you compensated for providing this 6 Just it was similar written testimony. I think testimony? that was live in Wyoming. I'm pretty sure it was 7 7 A I believe so, yes. live. I'm pretty sure. 8 8 9 Q Would that have been by Do No Harm? 9 Do you recall when? A Sometime this year. This spring. Α Yes. 10 10 Q And then, again, did you write these remarks? Q Did Do No Harm compensate you for that testimony? 11 11 A I did. Α I believe so. 12 12 Q Yourself? 0 Did you testify in support of Senate Enrolled Act 13 13 480 in Indiana? A Yes. 14 14 Q Okay. I believe that we have talked about your There was a bill in Indiana that I did support. I 15 15 submitted written testimony. It was not in testimony in Ohio twice. 16 16 Dr. Weiss, when I say testimony, I mean live person. I don't remember the bill number. It had 17 17 or written remarks. You have provided testimony to do with gender dysphoria care in minors. 18 18 Do you recall when that was? in some form in support of bills that would ban 19 19 the treatment of gender dysphoria in minors in A I think it was sometime this spring. 20 20 Q You don't think it was Senate Enrolled Act 480? Ohio, Utah, North Dakota, Montana, and earlier we 21 21 spoke about your letter to the Florida Board of I don't know. I don't recall. 22 22 Α

Medicine.

Does that all sound correct to you?

A That treatment we are talking about is -- sorry.

23

24

23 O

24

25

Are there any other states where you provided testimony on this or a similar topic that we have

not talked about?

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023 Page 156 A Not that I recall. Q This is from the Do No Harm website. It says, "Protecting Minors from Gender Ideology." 2 Q Dr. Weiss, do you keep a running list anywhere of 2 Is that the ideology that you believe is the places in which you have provided this kind of 3 3 4 testimony? 4 being referenced there? A Yeah. I have a list of folders that have A Yes. 5 5 testimony that I submitted. I have one for the MR. SELDIN: Erica, can you please pull up 6 6 different states. Exhibit 27. 7 7 Q That would be the list that you would refer to Q Dr. Weiss, these are the FAQs from Do No Harm's 8 8 in trying to determine where all you have website. You will see that the first two are 9 9 testified? "What is Critical Race Theory?" and "What is 10 10 A That would be the closest to a list, correct. 11 anti-racism?" 11 Do you see those two? 12 Q Roughly do you know how much in total Do No Harm 12 has compensated you for all of your legislative Α 13 13 Yes. testimony? O Do you do any work for Do No Harm regarding 14 14 A Maybe about \$8,000. critical race theory and anti-racism? 15 15 Q Earlier we talked about why you don't include A No. 16 16 Do No Harm on your C.V. as one of your 17 17 So your sole focus in your work with Do No Harm is affiliations. 18 gender ideology? 18 Yes. I'm curious why you don't include any of your Α 19 19 legislative testimony on there either? Q Are you on social media? 20 20 MS. YOUNGS: Can you clarify? Don't A No. 21 21 include what where? O No Twitter? No Facebook? 22 22 A I don't understand. A None at all. In fact, I eliminated a Facebook 23 Q The legislative testimony that we just spoke account about a decade ago. Never used Twitter. 24 24 about, that does not appear on your C.V., is that 25 They are dangerous. 25 Page 155 Page 157 Have you given any media interviews of any kind 1 regarding your work with Do No Harm? Correct. I don't see any reason to mention that 2 2 No. on a C.V. 3 3 Α MR. SELDIN: Erica, could you pull up Q Have you spoken at any conferences? 4 4 A No. On this topic? Exhibit 26. 5 6 Q We will look at Page 2 of the document or Page 8 6 Q On this topic? of the PDF. If you go to 8 of 25, that is where 7 A No. 7 it is. MR. SELDIN: Erica, can you pull up 8 8 9 Dr. Weiss, do you see that? 9 Exhibit 1. Q I'm going to look at Paragraph 6 of your A Yes. 10 10 declaration on Page 2. Q Do you see where I am at the top? I will just 11 11 read this. Let me know if you can see that? 12 12 "Amicus Do No Harm is a diverse group of 13 Α Yes. 13 physicians, health care professionals, medical 14 Q Do you see you say, "I have been a member of the 14 students, patients, and policymakers whose goal is Endocrine Society since 1990 but I canceled my 15 15 to protect health care from a radical, divisive, membership in 2022 after the repeated failure to 16 16 and discriminatory ideology." respond to my concerns about its promotion of 17 17 A Yes. hormonal interventions in children with possible 18 18 gender-related distress." 19

O Did I read it correctly? 19

A Yes. 20

- Q And what is that ideology, do you know? 21
- A Well, I would consult the Do No Harm website in 22
- 23 that regard. My focus is on gender dysphoria.
- MR. SELDIN: Erica, could you please pull 24 up Exhibit 28. 25

Did I read that correctly?

21

Q When you say "repeated failure to respond to my 22 concerns," how did you indicate your concerns to 23

the Endocrine Society? 24

A Emails. 25

Min-U-Script®

Case 1:23-cv-00595-JPH-KMB K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Page 160 Q About how many emails did you send? A Yes. A Four. Q Okay. Then just looking through the rest of this, 2 2 Q Do you remember to whom you sent them? you will see there are several other conditions 3 3 4 A I sent them to the president of the Endocrine 4 Society, a couple of committee people, and someone How about for bone health and osteoporosis? 5 5 else that I don't remember. I treat that. 6 6 Α Did you do that in your personal capacity or as Q Do you use these guidelines? 7 7 part of your membership in Do No Harm? Some of them. 8 Α 8 Q And then for male reproductive endocrinology? 9 A This was well before Do No Harm. It was in my 9 personal capacity. Α Yes. 10 10 Q When about do you think you sent these emails? Q Are you a reproductive endocrinologist? 11 11 A Well, probably early 2022. 12 12 A Q Did you ever hear back? O How about for diabetes, mellitus and glucose 13 13 A No. metabolism, do you use the guidelines? 14 14 15 Q The substance of these emails, would they have A I don't know what they are. I don't tend to refer 15 been similar to your legislative testimony? to them because I'm an expert. They are probably 16 16 A It was really more brief and focused on my outdated by the time they are written. I see so 17 17 concerns about their promoting this practice with much diabetes and I'm very current on the 18 18 little evidence. literature on that. 19 19 It was not as extensive with references. I I treat many people with diabetes. I don't 20 20 also directed it to a person who was in a care about the Endocrine Society guidelines for 21 21 fellowship with me, a year behind me at the 22 22 University of Iowa so I knew her. I still know 23 23 MR. SELDIN: Erica, could you pull up Exhibit 31? her. And there was no response. 24 24 Q Do you still use the Endocrine Society Clinical Q Dr. Weiss, this is clinical guidelines from the 25 25 Page 159 Page 161 Practice Guidelines in your practice? Endocrine Society on the Management of Individuals 1 1 On what particular disorder? Α With Diabetes at High Risk for Hypoglycemia: An 2 2 Q Any disorder? Endocrine Society Clinical Practice Guideline. 3 3 A Some of them. Do you see what I'm referring to? 4 4 Q Okay. Yes. 5 5 Α 6 MR. SELDIN: Erica, could you pull up 6 0 Is this a clinical practice guideline that you Exhibit 12. have used? 7 7 A I don't refer to it because I'm so knowledgeable Q Dr. Weiss, what I'm about to show you is from the 8 8 9 Endocrine Society website. It's a list of their 9 in this area. By the time it's written -- it was clinic guides by topic area. I'm going to ask you published in 2022. We have actually enhanced 10 10 for these topics that are listed, whether you knowledge from that time. 11 11 practice in this space and whether you use any So it's, these are often outdated by the time 12 12 guidelines. they were written. These are usually fairly well 13 13 So going from the top, do you treat adrenal evidence based when they do come out. They get 14 14 conditions? outdated shortly thereafter. 15 15 A Yes. But I follow, when I do check these 16 16 Q Do you use the Endocrine Society guidelines to guidelines I'm doing -- my care is consistent with 17 17 treat those? them. 18 18 A Some of them. 19 O And so we will scroll down to the section that 19

does not stop when the person turns 18."

Do you see where you said that?

with type I diabetes receiving multiple daily

injections (MDIs)." 4 Do you see that? 5

6

1

2

3

Q Do you agree with that recommendation? 7

A Yes. 8

9 Q Is that something that you use in your practice?

A Absolutely. 10

MR. SELDIN: Erica, can you take us to 11 Page 11. 12

Q You will see where it says Justification For The 13 Recommendation. 14

Do you see that?

A Yes. 16

15

Q It says there, "The panel justified a strong 17

recommendation despite the low quality of 18 evidence, based on recognition that iatrogenic

19 hypoglycemia is the limiting factor in the 20

glycemic managment of diabetes and is a major 21

concern for individuals with diabetes and for 22

23 their family members."

Do you see that? 24

A I do. 25

1 2

3 Α Yes.

Q I take it that is because you generally treat 4 patients that are over eighteen so they don't age 5

out of your practice, right? 6

A Pediatricians stop care for people when they are 7 eighteen. For example, people with Type I 8

9 diabetes who might have hypoglycemia related to

that guideline, the pediatrician stops seeing them 10 when they are eighteen and they turn them over to 11

12

Q Do you know pediatricians who will see patients 13 after they turn eighteen? 14

Very few. Α 15

Q Generally or in pediatric endocrinology? 16

A Both. There are a few disorders where they might 17 see them beyond eighteen like cystic fibrosis. 18 19 Like most disorders, chronic conditions, they turn them over to a person who is board certified in 20 internal medicine. 21

And in the case of endocrine disorders, an endocrinologist.

And that is because pediatric medicine is Q 24 different from adult medicine, right? 25

22

23

Page 165

Page 168

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

A I think it's, a lot of it is tradition. I think

- there are a number of reasons. 2
- Q Well, they are different specialities, though, 3 4 right?
- A They are. 5
- Q So there are differences in how to treat pediatric 6
- patients versus adult patients? 7
- True. Α 8
- Q And how do you know that most pediatricians stop 9 care at eighteen? 10
- Thirty-six years of practice. 11 Α
- Q Then, Dr. Weiss, in Paragraph 10 of your 12
- declaration you say that you have training in 13
- diagnosis and treating patients with some mental 14
- health disorders including depression. 15
- Do you see that? 16
- 17 A Yes.
- Q What training have you received in diagnosing and 18
- treating patients with some mental health 19
- disorders? 20
- A Some of it is from during residency in internal 21
- medicine. Some of it is from reading. Some of it 22
- is from online conferences. Some of it is from 23 in-person conferences. 24
- Q And depression is a DSM 5 diagnosis, is that 25

- WPATH recommends that primary care people do it.
- WPATH even excludes, does not, it states that you 2
 - don't even need dysphoria now.
- 4 Q Dr. Weiss, in Paragraph 17 of your declaration you say, "Any well-trained" -- let me know when you 5
- are there. 6
- I am. 7 Α

3

13

19

20

21

22

23

24

25

Q You say, "Any well-trained practicing physician 8 must be able to analyze evidence with a careful 9 reading of published literature. Doctors who are 10 unable to do so cannot provide good care for their 11 patients." 12

Did I read that correctly?

- You did. Α 14
- Q What is a well-trained practicing physician? 15
- A That is a good question. One of the criterion are 16 to be able to analyze evidence with a careful 17 reading of the published literature. 18

And many physicians don't have that. They just look at guidelines. They say okay. They don't critically think about it. They don't look and do literature searches. They don't analyze the methodology of studies.

They say I will follow the guidelines. That is why there are now more and more physician

Page 167

Page 169

- right? 1
- Yes. Α 2
- Q Is that a diagnosis that you make in your 3
- practice? 4
- A Yes. Depression is common with diabetes, for 5
- 6 example.
- Q Why is that? 7
- A It's not known. 8
- 9 Q Do you have a theory?
- A No. 10
- Q So endocrinologists can sometimes be qualified to 11
- make a mental health diagnosis then? 12
- A Absolutely. 13
- Q So not just psychiatrists can make these kind of 14
- diagnoses, but other clinicians can? 15
- A Most people who treat depression are primary care 16 people. 17
- Q Have you ever received any training in diagnosing 18 gender dysphoria using the DSM 5? 19
- A The DSM 5 came out in 2013 and that's when I 20 stopped treating. 21
- 22 So you would not have received training in Q
- specifically how to use those criteria to 23
- diagnose? 24
- A It does not take a lot of training. That is why 25

- assistants and nurse practitioners doing care. 1
- They can just simply follow the guidelines without 2 much thought or critical analysis. 3
- Do you consider yourself to have expertise above that of a well-trained practicing physician? 5
- 6 It depends on the area you are referring to.
- 7 With respect to the treatment of gender dysphoria in minors? 8
- 9 A Yes, I do think I am more knowledgeable in that area. Most physicians have actually not, have 10 studied the literature in this regard. They are 11
- not knowledgeable and they are not interested in 12 treating. 13
- So you believe that your expertise in that regard 14 comes from your ability to read the studies that 15 are used behind the guidelines, is that accurate? 16
 - That is part of it, yes. Α
- O Dr. Weiss, go to Paragraph 21 of your declaration 18 19

You say, "While hormonal and surgical procedures may enable some individuals to appear to others as the opposite sex during some of their lives, no procedures can enable an individual to perform the reproductive role of the opposite sex."

17

20

21

22

23

24

Page 172

Page 170

Did I read that correctly? 1

Yes. 2 Α

15

16

17

18

19

20

21

1

2

3

10

11

12

13

14

15

16

17

18

19

20

21

22

23

- Q So if someone cannot perform the reproductive role 3 4 of being male you would consider them not to be 5
- A There might be exceptions with intrasex --6 7 disorders of sexual differentiation, which are exceedingly rare. 8
- Q But you believe there could be some males who 9 cannot perform their reproductive role because of 10 an intrasex condition, but are nonetheless male? 11
- Right. If someone was born without testes, but is 12 XY and otherwise a male, he is still a male, but 13 he is born without testes. 14

There are women that are born without uteruses. They have disorders where that is how they are born.

So those are really rare exceptions and that would be a person that would still be that same biologic sex. Otherwise, no. I'm not talking about these people here though.

- Would you consider chromosomes to be definitive in 22 determining sex? 23
- A Examine the external genitalia. And then if there 24 25 is a question, chromosomes.

- 1 men who are born infertile, but are nonetheless
- still men, right? 2 Correct. Α 3
- 4 O There are some women who are born infertile, but are nonetheless still women, correct?
- A Correct. 6
- Q In Paragraph 24 you have a quote from Dr. Levine 7 about twelve year olds. Then you make some 8 reference to the plaintiffs in this age when they 9 were four. 10

My question is just, have you ever done a biopsychosocial assessment of a child of any age?

Α

11

12

13

23

1

2

6

7

8

9

10

11

12

13

14

15

16

17

18

- Q So for that statement about four year olds and 14 twelve year olds are you just relying on your 15 common sense there? 16
- Common sense and being a father. 17
- 18 Then in Paragraph 25 you say, in the second sentence you are talking about adolescents. You 19 20 say, "One series of 1,655 youth, mean age of 15.7 years, reported that 55% had friends who also 21 22 'came out' as transgender around the same time."

Do you see that?

- Α Yes. 24
- As a general matter does it surprise you that 25

Page 171

So you agree that a visual inspection of an infant's external genitalia does not provide information about the reproductive capacity as an

adult, right? 4

A It does in almost all instances. There are very 5 few instances in which it does not. So we don't 6 have to assign sex at birth. You examine the 7 child and you can determine what their sex is in 8 9 all likelihood.

> Unless they have some unusual disorder, they will be -- they might be infertile. Yes, there are some infertile people, but otherwise they would have the potential for reproductive capacity. But that is not all it is.

I think you are kind of changing the wording of this because we are changing the topic because what I have said here was that those changes, those hormonal changes to a person with gender dysphoria do not enable them to have reproductive capacity.

And now you are asking what is a boy or a girl? What is a male or female? That is a different question.

Q And so using your definition of men and women or 24 boys and girls, you believe that there are some 25

Page 173

adolescents would go online and find people with whom they had common traits or interests?

A This is not speaking to that. It's not that they, 3 they said they were gender dysphoric or 4 transgender and then they found the people. 5

> It's that they found these people online and then they came out. Or they found these, they had these friends and they all came out and said that they were transgender at the same time.

That should raise concerns that that might be some element of social contagion or peer influence.

- Q So imagine an adolescent who has never been on the internet. They have parents that keep them away from screens entirely. They come to believe or realize that they are transgender. would it surprise you when they went online and they would look for other people who were transgender?
- That would not surprise me at all. But there are 19 no adolescents that don't go online. 20
- Dr. Weiss, in Paragraph 26 of your declaration in Q 21 the third sentence, second line, you say, "There 22 are no standards of care accepted by most 23 practitioners, either internationally or within 24 the United States." 25

7

8

9

10

11

Page 174 Do you see where you said that?

Α I do. 2

1

15

16

17

18

19

20

21

22

23

24

8 9

10

11

- Q What do you mean when you say "most 3 4 'practitioners"?
- That is what I said. Most practitioners. 5
- Q How do you know that most practitioners don't 6 accept those guidelines? 7
- A During my thirty-five years of experience of 8 teaching many of those in the health care field 9 and interacting with hundreds and hundreds of 10 physicians, I know that most are not supportive of 11 the so-called WPATH or Endocrine Society 12 guidelines. And for that reason they chose not to 13 treat. 14

From seeing the statements and evaluation by other countries they don't endorse the treatment that we are doing in the U.S. These other countries have had many years of experience above and beyond the United States.

So it's not, it's kind of -- it is a fiction that it's some kind of universal, you know, or that it's endorsed around the world, this particular approach to care. There's a lot of disagreement.

Q You believe that based on your conversations over 25

Q What is that statement based on?

A Well, it would be based upon the approach of most 2 physicians including Dr. Shumer and Dr. DeVries 3 4 and Dr. Cohen-Kettenis, the people who started the Dutch protocol, and other treating 5 physicians. 6

> The goal is not to modify the appearance of the body. The goal is to relieve the psychic distress related to the gender incongruence. That is what they say. That is what -- the Dutch protocol initially started with that goal in mind.

- So when you say that the goal is of relieving, 12 resolving gender related distress, you are 13 referring to resolution through non-hormonal 14 15 interventions?
 - A No. That should be the goal. That should be the goal of all treatments. The goal, the reason that hormonal treatments have been implemented is not because they want to create these people who are looking like the opposite sex, but really to help the child's psychic distress.

That is the initial reason for the whole Dutch protocol. That is the basis -- that is the best evidence that the Endocrine Society invoked for the management of children and adolescents

Page 175

Page 177

- your career with folks about this topic that you 1
- have accurately ascertained that most of them do 2
- not agree, not withstanding what the major medical 3
- associations have said? 4
- A Some of those organizations have made those 5 statements and many physicians are not members of 6 those organizations. 7

And it's not just my conversations with physicians. It is also what is seen and what other countries have concluded, as we will talk about I'm sure.

Q Then, Dr. Weiss, in Paragraph 26 you say, "The 12 goal of treating children with gender dysphoria is 13 to resolve their gender related distress." 14

Do you see that, the first sentence of 15 Paragraph 26? 16

- A Yes. 17
- Q When you say that, do you mean pre-puberty 18 children? 19
- A All children. 20
- Q How are you defining children? 21
- A Anyone under eighteen. 22
- 23 So you mean both children who have not hit puberty and children who have hit puberty? 24
- A Correct. 25

with gender dysphoria, is the Dutch protocol. 1

The Dutch said the reason to treat these 2 children and to treat early is to relieve their 3 gender related distress.

- Q You believe that relief should not come in the 5 form of bodily changes? 6
- That is correct, because it does not work. 7
- O In paragraph, that same Paragraph 26, you say at 8
- 9 the very end, "Psychotherapy can be very
- beneficial in patients with gender dysphoria and 10 lead to their desistance." 11

Do you see where you said that?

13 Α

12

20

21

23

24

- Q Based on your prior statement do you mean patients 14 of all ages? 15
- Yes. A 16
- Q What is desistance? 17
- A Desistance would be, could be defined -- people 18 define it differently. 19

I would define it as no longer rejecting your natal sex.

- Is that a term that you would use for both 22 children who have not hit puberty and also adolescents?
- A Yes. 25

Page 180

24

25

Document 58-6

Q Okay. Is detransition a term that you are familiar with? 2

Α Yes. 3

natal sex.

19

- Q What does that term mean to you? 4
- A That term relates to those who took therapies, 5
- hormonal therapies, blockers, or opposite sex 6
- hormonal therapies, to appear as the opposite sex 7
- and after a period of time decide -- or maybe even 8
- 9 surgery, underwent surgery -- then changed their mind and wanted to return to their natal sex. 10
- O What is the difference then between desistance and 11 detransition? 12
- A Desistance is just discontinuing the efforts to 13 appear as the opposite sex. Detransition is 14 15 already, those children or adolescents or adults who made the change to the opposite sex, the 16 change in the appearance, took those therapies or 17 interventions and now they want to return to their 18
- O So when you say desistance, do you mean the 20 resolution of gender dysphoria, or an 21
- identification to the sex assigned at birth? 22
- It would be the identification with the sex 23 assigned at birth. What their psychic state is, 24 25 that does not speak to that other than they are

- A I think it's never appropriate.
- Is that true, it's never appropriate for a person 2 of any age? 3
- 4 A We are talking about children and adolescents right now. I don't think it is appropriate for 5 any age because I don't think any evidence 6 supports those hormonal interventions as being 7 beneficial. 8
 - O So, Dr. Weiss, say that you have a patient who has gender dysphoria and receives the interventions that we have been talking about to treat that in the form of hormones and that fully resolves their gender dysphoria.

They are back to zero gender dysphoria. Would you consider that a successful outcome?

A I think that hypothetical case is merely hypothetical. It just does not happen. You are implying causation from the intervention. I think there is no convincing evidence that those hormonal interventions are the key to, or are causal in improving any gender dysphoria.

I think it is very unclear and it actually may worsen it. And, remember, so are you going to -- are you telling me that that child has no psychotherapeutic intervention during that period

Page 179

returning to their, accepting their natal sex. 1

They might have depression, anxiety, who 2 3 knows.

- Q So in your mind, desistence then is the resolution 4 of gender dysphoria by identification with the sex 5 6 assigned at birth, is that what you mean by desistence? 7
- A There is more work that needs to be done in this 8 9 area to study this. Unfortunately, little has been done. 10

Desistence would be defined as no longer 11 having dysphoria related to your gender. 12

- Q Okay. And is that different from identifying with 13 your sex assigned at birth? 14
- A No, I would say it was the same. You are now 15 returning and identifying with your natal sex. 16
- If a patient is receiving psychotherapy but 17 continues to have severe gender dysphoria, do you 18 think medical intervention is ever appropriate? 19
- 20 A No. By medical intervention you are talking about to change the appearance of the child and giving 21 them opposite sex hormones? Is that what you are 22 23 referring to?
- We have been talking about treatment with Q 24 25 hormones ---

of time?

You are just applying hormonal intervention and then they get better? I think that is very interesting. I've not seen any reports of that. And I don't think that exists. I would wonder whether the child would have desisted otherwise without your harmful interventions.

O So let's say you have two patients. One who receives both psychotherapy and the medical interventions that we have been talking about in the form of hormones. That completely resolves their gender dysphoria.

Then you have another patient who only receives psychotherapy and their gender dysphoria resolves because they desist and begin to identify with their sex assigned at birth.

Do you think one outcome is better than the other?

Yeah. I think the intervention that is least invasive, least potentially harmful is always the best intervention.

So not giving hormonal treatments to these children with normal bodies that might lead to irreversible effects is always best to minimize harm. The harm is minimized if it's just a

Page 181

Document 58-6

1 supportive psychotherapeutic intervention.

- Q So you think that desistance is the better 2 outcome? 3
- 4 A Oh, sure. Because that means the child is no longer dysphoric and that is the goal. The goal 5 is not to modify their body. We want to help them 6 7 so they are no longer in distress.

So the goal should be relieving their distress with the least harmful intervention. Q Is there any point at which you would agree that

- 10 11 medical intervention would be warranted? A For? 12
- Q Well, for an adolescent. Let's say we have an 13 adolescent who has been in therapy since they were 14 15 three and their gender dysphoria has not improved. It's now thirteen years later. They are sixteen. 16

Do you think that that person is a candidate 17 for hormonal treatment? 18

A If that hormonal treatment is intended to improve 19 their gender dysphoria, absolutely not. It would 20 likely worsen. 21

> That child has been gender dysphoric since the age of three. What else is going on with that child? Do they have autism spectrum disorder? Are they feeling -- do they have a family

Q In Paragraph 27 of your declaration you say in the second sentence, "But Clinicians who without 2 question 'affirm' the child's self-diagnosis will 3 4 fail to address psychiatric co-morbidities that may underlie the rejection of their sex." 5

Do you see where you say that?

A 7 Yes.

6

16

17

- Q Do you have any examples of a clinician failing to 8 use the DSM 5 criteria to diagnose gender 9 dysphoria? 10
- A How is that related to that statement? I don't 11 know why you are asking me that in reference to 12 this statement. 13
- Q Regardless of that statement, do you have an 14 example of that? 15

MS. YOUNGS: Does he have an example of? State that again.

- 18 I'm asking, Dr. Weiss, do you have an example of a clinician who failed to use the DSM 5 criteria to 19 diagnose gender dysphoria in a minor? 20
- Let me give that some thought. No. 21
- 22 Q Do you have an example where a clinician declined to treat a co-morbidity once they found a gender 23 dysphoria diagnosis? 24
- 25 A I think there are examples in these plaintiffs,

Page 183

Page 185

environment that is really in chaos? 1

> There are other things going on. Hormones will not help that child with gender dysphoria.

Q Let's say you have someone who is forty years old. They have been in some kind of psychotherapy for twelve years for their gender dysphoria. It has not abated.

Do you think that person at forty or -- I can't do math -- let's say they are thirty. So it's eighteen plus twenty-two. Do you think that person is a good candidate for a medical intervention like hormones?

A I don't think any person is a good candidate. And if they had not improved with psychotherapy, maybe they need to find a different therapist.

You know, there are good mechanics and bad mechanics. The same thing with therapists. There are different therapeutic approaches, you know. And some people have serious psychiatric problems that may not be remedied with therapy.

But you can make them much worse if you start giving them hormones that are not going to help them. There may be doctors who will be willing to treat that person, that adult, but it would not be me because I don't want to hurt them.

1

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

Q Other than the plaintiffs, do you have an example? 2

A Yes. The patients I was seeing, I think some of those adults had co-morbidities that I was not 4 treating. I was giving them these opposite sex 5 6 hormonal interventions that were not helpful.

They needed really primarily psychotherapy. I would say also if you read Jamie Reed's affidavit from the Washington University Gender Center it seemed to be the pattern, the consistent pattern that they ignored all other co-morbidities and just focused on gender.

Q Let's go to Paragraph 28 of your declaration. MR. SELDIN: Ms. Youngs, I know we talked about this earlier, but I want to confirm about designating the portions of the deposition pertaining to the plaintiffs' medical records, we will treat those as confidential?

MS. YOUNGS: Yes.

Q So in that respect, Dr. Weiss, in Paragraph 28 you said that, "I reviewed the records of A.M., K.C. and M.W., all plaintiffs in this case. All had multiple serious psychiatric co-morbidities including anxiety, depression, and self-harm behavior. The health care providers did not

Page 188

Page 189

Document 58-6

1 address these problems. All care has been focused on gender affirmation." 2

Do you see that?

4 Α Yes.

3

- Q What do you mean by gender affirmation here? 5
- A Hormonal interventions, either puberty blockers or 6 opposite sex hormones. 7
- Q What do you base that definition on? 8
- A So-called gender-affirming care is hormone 9 interventions, either blockers or opposite sex 10 hormones. Some people call them cross hormones. 11

Then surgery after that as so-called 12 gender-affirming care or gender affirmation. 13 O So I'm showing you a document, Exhibit 13, with 14

the caption to this case. It says Plaintiff's 15 Responses and Objections to Defendant's First 16 Requests for Production to Plaintiffs. 17

Do you see that?

A Yes. 19

18

- 20 Q Have you seen this document before?
- A I don't remember. Scroll further. That looks 21
- familiar. That came along with the records. 22
- Right? Is that correct that it came with the 23 records? 24
- Q I will represent this was a document provided by

A Yes.

3

5

7

12

13

14

15

16

17

18

19

20

21

22

23

24

25

2

- Q So you see where it says, "Moreover, this request 2
 - is vague, overboard, and unduly burdensome to the
- 4 extent it requests records for 'a related
 - condition' because there are no conditions
- inherently related to gender dysphoria." 6
 - Did I read that correctly?
- Α Yes. 8
- Q Would it surprise you to learn that the medical 9 records that have been produced in this case all 10 pertain to the treatment of gender dysphoria? 11
 - I think that statement that there are no conditions inherently related to gender dysphoria is ridiculous. It's absurd.

The whole patient psychiatric psychosocial status is related to gender dysphoria. Their family situation. Whether they were sexually abused. That is related to gender dysphoria. Whether they are physically abused. Were they bullied. All those.

So there are no conditions related to gender dysphoria, that is a ridiculous remark. It's antithetical to any psychological care that that person might require.

Q Earlier we were talking about diabetes. You said

Page 187

- plaintiff's counsel to counsel for Indiana in 1
- connection with the discovery in this case. I 2
- don't want to hear what your counsel gave you. We 3
- will represent that is what the document is. 4
- A Understood. I believe I saw this, yes. 5
- 6 Q Okay. I will head that problem off at the pass.
- You believe you may have reviewed this document in 7
- connection with that? 8
- A Yes. 9
- Q On Page 5, Dr. Weiss, do you see there is 10
- Request 1 and the response. At the end it says, 11
- "Moreover, this request is vague, overbroad, and 12
- unduly burdensome to the extent it requests 13 records for 'a related condition' because there 14
- are no conditions inherently related to gender 15
- dysphoria." 16
 - Do you see that?
- A No. I don't see it yet. Where? 18
- Q So do you see Request Number 1? 19
- A Yes. 20

- Q Then you see Response? 21
- MS. YOUNGS: Can you zoom in? Do you see 22
- it? 23
- Okay. Α
- Q That is four lines down.

- a lot of your patients with diabetes also have 1
 - depression, correct?
- Yes. A 3
- Q Do you consider depression and diabetes to be 4
- related conditions? 5
- There is more depression in people with diabetes 6
- and that is perhaps in part because of the burden 7
- of the diabetes care. But that is just an 8
- 9 association.
- Q Other than that case, have you ever evaluated the 10 medical records of a minor? 11
- 12 Α Yes.
- 13 Q When?
- A Over my thirty-five years of practice I have. I 14 took care of children down to the age of five. 15
- We talked about you thought that was less than one 16 percent of your practice overall, correct? 17
- Maybe a little more earlier then and then it 18
- became less later. Yes. 19
- Q You have interacted with the records of your minor 20 patients, correct? 21
- What is the question? 22 Α
- 23 Q I'm asking, we are talking about when you treated minor patients as a small part of your practice 24 25
 - you interacted with their medical records as their

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023 Page 190 Page 192 1 physician? Q What was your basis for saying that that A Yes. I also would have reviewed previous records plaintiff's parents are biological males, one of 2 2 when I was assuming care for that child. whom identifies as transgender? 3 3 4 Q How long did your review of the medical records 4 A It was in the records. take in this case? MR. SELDIN: Erica, can you pull up 5 5 A I don't remember. Hours. Exhibit 19. 6 6 Q Can you estimate approximately how many hours you Ms. Youngs, this is a medical record. 7 7 spent reviewing the medical records in this case? Again, we will talk about how to designate this as 8 8 A The medical records of the four plaintiffs, maybe confidential. I took the one page as opposed to a 9 9 five hours. whole set so we don't have a larger number of 10 10 Q Who did you discuss your review with, if anyone? documents to deal with. 11 11 A I just reviewed them on my own. MS. YOUNGS: Okay. 12 12 Q Did you discuss, this is a yes or no question, did MR. SELDIN: Can you scroll down to the 13 13 bottom of this document, please. It is IUH821. I you discuss your review with the attorneys for the 14 14 state of Indiana? didn't think it was necessary or appropriate to 15 15 A Yes. 16 bring in the entire medical record from IU Health 16 Q Did you discuss your review of the medical records given what we are dealing with. 17 17 with any other physician? MS. YOUNGS: We will reserve the ability 18 18 to object if there is more information that we A No. 19 19 Q Did you discuss them with your wife? need to review to answer the question. 20 20 A No. MR. SELDIN: Of course. 21 21 Q Then I assume I know the answer to this, have you So, Dr. Weiss, I want to direct you to the bottom. 22 22 Or rather I'm sorry. Scroll up. You will see at shared those medical records with anyone else? 23 A Absolutely not. the top right there is a name which I will not say 24 24 Q In Paragraph 29 you say one of the plaintiffs had 25 so we don't have to redact it from the record from Page 191 Page 193 been abused and that "Puberty blockers are not a the persons whose medical record this is. 1 1 The first initial is K and the last is a C. treatment for post-traumatic stress disorder." 2 2 Do you see that? Do you see that? 3 3 A Yes. A Yes. 4 4 Q Do you recall a physician prescribing blockers to That is the K.C. you are referring to in 5 5 Paragraph 30? 6 treat PTSD in that plaintiff's medical records? 6 A I recall puberty blockers being prescribed. The Α Yes. 7 7 prescription was for gender dysphoria, but the Q We will scroll down to the bottom. Dr. Weiss, in 8 8 9 gender dysphoria diagnosis was made in the context 9 the bottom left do you see under Social History of major psychosocial factors that ought to have where I am? 10 10 Yes. been addressed. Α 11 11 And per the Dutch protocol guidelines or the 12 Q Then Home/Environment. Lives with parents. And I 12 Endocrine Society guidelines, those should have 13 will skip the names and ages of the siblings. It 13 been addressed. Failing to address those is not 14 says, "Mom had menarche at 11 and Dad was shaving 14 optimal care if you just jump to treating and in the sixth grade." 15 15 introducing a new problem like treating with Do you see that? 16 16 puberty blockers. A I do. 17 17

puberty blockers.
In Paragraph 30 you are talking about a different plaintiff here.
You say that another child was socially

You say that another child was socially transitioned at age four by the parents, both of whom are biologic males and one who identifies as transgender.

Do you see that?

25 A Yes.

21

22

23

Q Do you recall where in the record?
 A No. Also, I believe this was K.C. who there was a restraining order from the biologic father to

K.C.'s parents are biologic males?

restraining order from the biologic father to stay -- I believe that is correct -- to stay away

Is that consistent with your statement that both

That is not consistent. There is elsewhere in the

record that I derived that statement from.

18

19

20 A

21

3

4

5

15

16

17

22

23

24

25

With K.C. there is somewhere in the record where that was apparent about a transgender parent. I don't recall.

- Q If it's not K.C.'s parents would you need to 6 7 revise your declaration?
- A It's possible I am mistaken with regard to that. 8 That is what I saw, that there was a parent who 9 identified as transgender and was a biologic male. 10
- Q And why was the sex of the parents notable to you? 11
- How they identify is notable because I would be 12 curious as to whether there was pressure on the 13 child from the age of four to socially transition. 14

That is unusual. So that ought to have been explored by any biopsychosocial evaluation in this child who has multiple medical problems.

Q In Paragraph 31 of your declaration you say, "The 18 mother of M.W. questioned the rapid onset of 19 gender dysphoria in her," you use the term 20 "daughter.' 21

> You said, "However, after a telephone call with a health care provider, she no longer expressed concern, though the file does not explain."

1 settings. I don't know. I wonder about that

- because this later onset expression of gender 2
 - dysphoria in this sixteen year old suggests it has
- 4 not been an ongoing gender issue for years with
- the child.
- Q So it raises concerns in your mind when gender 6 7 dysphoria begins to appear in a later adolescent, is that what I'm hearing you say? 8
- Yes. 9 Α

3

- O You also don't believe that a three year old can 10 accurately express gender dysphoria, is that 11 12 right?
- Yes. Α 13
- O So there is no age between three and sixteen where 14 you think a child can accurately report gender 15 dysphoria? 16
- A Well, they can mistakenly report it, but that does 17 18 not mean there are not co-morbidities or reasons why they are feeling dysphoria that could be 19 addressed without hormonal interventions. 20

They can be dysphoric and attribute it to their gender. But especially for a new, rapid onset in this setting there is usually factors. Like I think she had just broken, she had a relationship that just broke up. She had a bad

Page 195

21

22

23

24

25

experience in school. Yes, that was M.W.

1 So there was a stabbing at the school. So 2 that needed to have been explored. This feeling 3 of gender incongruence, why did it come up all of 4 a sudden? But it is not clear to me from the 5 6 records that there was any exploration of that and they moved right onto testosterone at the second 7 visit with the first visit being a video visit. 8

- 9 In your practice do you do telehealth visits?
- Yes. That is with established patients. 10
- During the pandemic did you have any new patients 11 12 that started with telehealth?
- 13 Α No.
- Q Were there doctors in your practice who did? 14
- A Not new patients, no. We only did televisits for 15 a short period of time. Then we were seeing them 16 in the office. 17
- Q In Paragraph 32 of your declaration you are 18 discussing an informed consent sheet. In the last 19 two lines you said, "Among the potential 20 undisclosed harms are infertility, baldness, and 21 an increased risk of heart attacks and stroke." 22

Do you see that?

- I do. A 24
- O This was for M.R. 25

Do you see that? 1

- Yes. Α 2
- Q Why was it notable to you that the clinicians 3 addressed the mother's concerns? 4
- That is not what was notable. What was notable 5 6 was the mother had those concerns. What happened 7
- to those concerns? How were they addressed? Q I mean, in general it's a good thing when 8
- 9 clinicians express concerns of parents in the care of their children, right? 10
- A Yes. 11
- O Doesn't that mean there was not immediate 12 affirmation here if, in fact, the mother had 13 questions that were strong enough that she 14 followed up with the clinician? 15
- A They rate parents on their degree to which they 16 affirm. You know, so they are really evaluating 17 parents on an ongoing basis if they do any 18 questioning of them, of the gender issues that the 19 child has. 20

So I would wonder what happened here. We don't know what the conversation was and whether was the parent told if you don't affirm M.W. she will kill herself. Was it that kind of a threat which we often hear occurs in these kind of

21

Case 1:23-cv-00595-JPH-KMB K.C., et al VS Document 58-6 THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023 Page 200 1 MR. SELDIN: Erica, can you please pull up permanent)" as a potential side effect? Exhibit 20. A 2 Yes. 2 O This is another medical record where I have the O And so that would be a disclosed harm, is that 3 3 4 one page. 4 right? Dr. Weiss, do you see this says, "Informed A It is expressed hair loss on head. I call it 5 5 baldness. It's a different way of expressing it. Consent for balancing hormones in Gender Diverse 6 6 7 people" with the Mosaic logo in the top right and 7 Q the plaintiff's name in the top left? And then do you see at the bottom of this sheet it 8 8 A Yes. says "What we don't know." 9 9 The second bullet point is, "What Q Is this the informed consent sheet that you are 10 10 talking about in Paragraph 32 of your declaration? testosterone does to fertility." 11 11 Do you see that part? 12 Α 12 Q Okay. And your question about this form is that Α 13 13 Yes. there are undisclosed harms of infertility, Q So, in fact, concerns about fertility are 14 14 baldness, and increased risk of heart attacks and disclosed on this form. 15 15 strokes, is that right? MS. YOUNGS: Was there a question? 16 16 A Yes. Undisclosed or minimized. Potential fertility issues is a disclosed 17 17 O To read back the sentence from your declaration potential risk on this form, is that correct? 18 18 you said, "Unknowns and potential harms were A Maybe. What we don't know is what testosterone 19 19 minimized on this form. Among the potential does to fertility. 20 20 undisclosed harms are infertility, baldness, and Q Well, then it says, "Some trans men come off T and 21 21 an increased risk of heart attacks and strokes." get pregnant and birth babies, have no long-term 22 22 data on these humans." 23 Do you see that? 23 All together would you agree that is a Α Yes. 24 24 Q So do you see on this form the part where it says disclosure of some risk to fertility? 25 Page 199 Page 201 midway through, "People whose bodies are at higher Yes, I would agree. 1 concentration of testosterone have higher risk of MR. SELDIN: We have been going for a 2 2 heart disease, high cholesterol and high blood little bit. Is now a good time for a five minute 3 3 pressure." break? 4 4 Do you see that? MS. YOUNGS: Thank you. 5 5 6 A Yes. It's followed by the sentence, "These are 6 (OFF RECORD AT 3:12 P.M.)

all modifiable by diet, exercise and medications." 7 8

Q It would be fair to say this was a risk that was 9 disclosed, but you believe minimized?

A Correct. 10

Q So it is not an undisclosed harm? 11

A I agree. 12

Q And then if you move up a little bit you will see 13 under Not Permanent changes it says, "Hair loss on 14 head (sometimes permanent)." 15

Do you see that? 16

A I will follow up on the statement I said, 17

increased risk of strokes. She does not mention 18 and this form does not mention strokes. So that 19

is not disclosed. 20

Q Heart disease, high cholesterol, and high blood 21 pressure are? 22

A Yes. 23

Q Now, do you see the part on this form where it 24 discloses, "Hair loss on head (sometimes 25

(AT THIS TIME A SHORT RECESS WAS HELD OFF 7 THE RECORD AFTER WHICH THE FOLLOWING PROCEEDINGS 8 9

WERE HAD:)

(ON RECORD AT 3:17 P.M.)

BY MR. SELDIN:

Q Dr. Weiss, I'm on Exhibit 1, your declaration. 12 13 Paragraph 34.

Do you see that?

Α Yes. 15

10

14

20

Q In Paragraph 34 you say, "With gender identity 16 issues, open, exploratory supportive psychotherapy 17 or talk therapy is too often dispensed with 18 entirely." 19

Do you see that?

A Yes. 21

There is no citation for that, is that correct? 22 Q

23 Α Correct.

Q Do you have any examples of children or 24 adolescents who were not offered therapy as part 25

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Page 202

May 26, 2023 Page 204

1 of their treatment for gender dysphoria?

- Just in speaking with parents and hearing of 2
- cases. Not patients under my care. I was not 3
- 4 treating minors.
- Q Dr. Weiss, what do you mean when you say open 5
- exploratory supportive psychotherapy? 6
- A It's talk therapy without the goal of changing the 7
- child's view on their gender. It's really 8
- 9 exploring their whole family dynamics. What's
- going on. How is school. Just trying to 10
- understand what, how the child feels overall. 11
- Their mood. Their outlook. Their interest in 12 things. That kind of approach. 13
- Q How is that different from a gender-affirming 14
- 15 approach? A A gender-affirming approach would be an approach 16
- that says, okay, your problem is you are not the 17 right -- you don't appear the right gender. We 18
- are going to give you hormones and we will give 19
- you -- or puberty blockers -- and we will fix your 20 appearance and you will feel better. 21
- Q So you would agree that pre-pubertal children who 22
- 23 have not yet hit puberty are not offered medical
- interventions in forms of blockers or hormones, 24 25 correct?

- Q And what does institutional social transition 2 mean?
- Α It means that the child adopts a different name 3 4
- and pronoun and lives as the opposite gender. So you don't think that is an appropriate 5
- intervention? 6
- Correct. 7 Α
- 8 And in your view of gender-affirming therapy, is
- the therapist pushing that or just merely not 9 opposing it? 10
- Α The therapist would push it. 11
- What about a therapist that does not push it, but 12 says this is an option. How do you feel about it? 13
- I think that hypothetical situation is not one 14 that is realistic or meaningful. 15
- Q So in your open exploratory supportive 16
- psychotherapy would social transition be discussed 17 18 at all?
- It might come up. 19
- Q What do you think the therapist's response should 20 be when it comes up? 21
- 22 It really depends on the situation and the child.
 - It's so complex. It is an interplay of so many
- factors. 24

23

25 Q Do you think there is ever a situation where the

Page 203

Page 205

- A What is the question?
- Q For the treatment of gender dysphoria that we have 2
- been discussing in minors, that treatment is not 3
- even on the table until a minor hits puberty and 4
- the -- right? Because puberty blocker, by 5
- definition you have to be going through puberty? 6
- A Right. They would initiate a puberty blocker at 7 stage two, which is early onset puberty. 8
- 9 Q When you say stage two you mean Tanner Stage Two, is that correct? 10
- A Yes. 11
- Q So for a child who has not yet hit puberty, what 12
- is the difference between the open exploratory 13
- supportive psychotherapy that you just described 14 and the gender-affirming that you just described 15
- since there is no medicine on the table? 16
- A Well, gender-affirming therapy might be, okay, 17 your main problem is your gender dysphoria. They 18
- might institute social transition at that point, 19
- 20 which is a treatment.
- Q So your open exploratory supportive psychotherapy 21
- 22 would not include social transition?
- 23 A Correct. Because there is evidence that social transition is a powerful intervention that may 24
- change outcomes. 25

- therapist and patient might come to the conclusion 1
- that that would be helpful to socially transition? 2
- A Not a therapist who knows the evidence base. 3
- And so in your mind, open exploratory supportive 4 psychotherapy, is the goal of that therapy 5
- identification with the sex assigned at birth? 6
- The goal is to help the child's distress. 7
- O How do you believe that that distress can be 8
- 9 ameliorated using that kind of psychotherapy?
- A That is how therapy often works. There is no age 10
- below which you can't have that kind of therapy 11 for children. So five year olds, six year olds, 12
- 13 four year olds can all benefit from those kinds of
- therapies without drugs. 14
- Q So the goal of that open exploratory supportive 15 psychotherapy that you feel is not being provided 16
- is resolving the gender dysphoria because the 17 patient comes to identify or be at peace with 18
- their sex assigned at birth, is that right? 19
- A I think the goal is to really relieve their 20
- anxiety and depressed co-morbidities. And if 21 gender dysphoria is part of that, that hopefully 22 23 will resolve, too.
- Q Is there any evidence for the open explorative 24 supportive psychotherapy that you are talking 25

ase 1:23-cy-00595-JPH-KMB Document 58-6 K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023

Page 206

about?

- A Yes. I referenced some papers. 2
- Q Is there anything other than the papers that you 3 4 reference in your complaint -- I'm sorry -- in

your declaration? 5

A Yes. Yes. There are therapists who use it all of 6 the time and children and adolescents benefit from 7

8

1

- 9 Q Which therapists do you know that are providing
- the kind of open explorative supportive 10
- psychotherapy that you are talking about? 11
- A What do you mean by "know"? 12
- Q You said you know there are therapists that 13 provide this kind of therapy. I am asking who is 14
- 15
- A Someone like Dr. Kenneth Zucker. Dr. Steven 16 Levine. Dr. Cantor. James Cantor. Dr. Marcus 17
- Evans. There are others. 18
- Q The same Dr. James Cantor who is a witness for 19
- Indiana in this case? 20
- A Yes. 21
- Q Were you aware that both Dr. Zucker and Dr. Levine 22
- 23 have treated adolescent patients with
- gender-affirming care? 24
- A I'm not aware that they prescribed hormonal 25

Q So I will represent to you that Dr. Zucker's clinic did treat adolescents with hormones. 2

Page 208

Page 209

- Does that give you pause as to the 3
- 4 psychotherapy that he is providing?
- No. A 5
- Q So you think it's possible to provide the kind of 6 psychotherapy you think is appropriate while also 7
- prescribing hormones to adolescents? 8
- 9 I don't think it's appropriate to prescribe the hormones. 10
- Q In Paragraph 39 of your declaration, I believe 11 12 that takes us to Page 9, you say, "No other mental disorders listed in the DSM are treated with 13 medication or surgery with the goal of altering 14 body appearance or function." 15

Do you see that?

A I do. 17

16

2

10

17

18

19

20

21

22

23

24

25

- 0 There is no citation for that, correct? 18
- A Correct. 19
- Q 20 Would you agree the brain is part of the body?
- Yes. 21 Α
- Q So psychotropic meds do change bodily function to 22 23
 - the extent that they change brain function. Would
- you agree with that? 24
- 25 A I agree that they do change brain function. Yes.

Page 207

- Psychotropic medications are not intended to 1
 - change body appearance.
- Q Would you want to revise that statement to say 3
- that the goal is altering body appearance then as 4
- opposed to function? 5
- A That might be better.
- Q Dr. Weiss, in Paragraph 58 of your declaration, 7
- which takes us to Page 13 -- the heading is Gender 8
- Dysphoria and Associated Psychosocial Conditions. 9

Do you see where that is?

- 11
- 12 Q What is a psychosocial condition?
- 13 Α What is the question?
- Q What is a psychosocial condition? 14
- A Social conditions would be the environment the 15 child is living in. So that is the family, 16
 - friends, school.

The psychological status has to do with their mood, their interest in things, their sleep. Are they anxious. All those factors.

So in Paragraph 58 say, "Most current data show Q that 70% of children with gender dysphoria have had recent trauma, history of abuse, autism spectrum disorder, homosexual orientation, depression, anxiety, or bullying."

therapy for those people. 1

- Are you aware of whether or not they recommended 2
- hormone therapy for those people? 3
- A No. 4
- Q Would your view of their practice change if you 5
- 6 learned they had, in fact, prescribed
- gender-affirming care in the form of hormones for 7 these patients? 8
- 9 A What was the question again?
- Q Well, you told me that you think Dr. Cantor and 10 Dr. Zucker were providing the kind of open 11
- exploratory supportive psychotherapy that you 12
- think should be happening. Right? 13
- A Right. 14
- Q And I asked were you aware that they prescribe or 15 have recommended the prescription of hormones for 16
- their patients with gender dysphoria. You said 17
- you were not sure. Is that correct? 18
- A I'm not aware that they, themselves, prescribed it 19 or that they recommended it. 20
- If they did recommend it or prescribed it I 21 22 think they were doing, that recommendation was 23 inappropriate and not based upon good evidence.
- Maybe they were not aware of the evidence at that 24 point when they prescribed it. 25

Document 58-6

Do you see where you said that?

I do. 2 Α

1

19

20

21

22

7

- Q Why is homosexual orientation worth remarking on 3 4 here?
- A It is really important. If a parent has expressed 5 or discussed an objection to be homosexual and the 6 child has some homosexual orientation, that child 7 might find it more acceptable to identify as 8
- transgender than to express their homosexual 9 sexual orientation. That would be one example. 10
- Q Are there other examples where homosexual 11 orientation would be notable? 12
- Well, there might be some so-called internalized 13 homophobia if the child feels bad about being gay 14 or lesbian. But it's more acceptable and it is 15 kind of considered cool to be transgender. They 16 come out as transgender, but they really have a 17 homosexual orientation, gay or lesbian. 18

That is apparent with some of those people who end up detransitioning. They really realize they were gay or lesbian and that it was a mistake for them to transition.

Do you think as a general matter it's more 23 socially acceptable to be transgender than it is 24 25 to be gay currently?

And for some of these children it's a homosexual orientation that needs to be explored. They need to be accepted and affirmed that if they are gay or lesbian that that is okay. That is good. We don't have to give you hormones and blockers and all this stuff.

It is not for them. We can be treating their condition with the wrong intervention if we give them gender-affirming care.

0 So from your perspective, it is preferable for an individual to be gay or lesbian as opposed to transgender?

MS. YOUNGS: I think that is a mischaracterization of his testimony.

I would agree with that. I'm not placing any Α judgment on it. I'm saying that from the standpoint of what we are talking about here, which is treatment of gender dysphoria, that it's important to understand the basis for that child's feelings.

And for some of those children it's a homosexual orientation. They need to be affirmed from that standpoint and that will help them. It will be really -- that will come out with open exploratory supportive psychotherapy and you don't

Page 211

Page 213

- A Yes. 1
- Q Why?
- A I don't know. Mores and cultural. Things change.
- Q So it's your belief that currently in the 4
- United States it is more socially acceptable to 5 express being transgender than to express being 6

gay, lesbian, or bisexual?

- A In many environments, yes, I do believe that. And 8 9 really, it's really the child's perception. It's not what I think. It's what the child perceives. 10 If the child perceives that it's more, that it's 11 12 more acceptable in his or her environment to be trans rather than to be gay or lesbian, they may 13 kind of reject their homosexual sexual orientation 14 and express a transgender identity. 15
- Q I guess we are talking about two different things. 16 One is your perception and then a child's 17 perception. So it's your perception that it's 18 more socially acceptable to be transgender than it 19 is to be gay, is that correct? 20
- A Yes. But I don't think that is important. What 21 is important is the child's. We need to evaluate 22 23 each child to see what is going on from an intrapsychic standpoint that leads them to feel 24 dysphoric, have gender dysphoria.

- need to give them hormones.
- So in your view then after a period of open 2 exploratory supportive psychotherapy, as you have 3 defined it in your declaration, you think as a 4 medical outcome it would be better if the patient 5 6 subjected to that therapy concluded that they were, in fact, gay or lesbian as opposed to 7 suffering from gender dysphoria that required 8 9 treatment through hormones?
- A Well, hormones are not required. And I would not 10 use the word "subjected." It is not a harmful 11 12 intervention, talk therapy. It is kind and caring 13 and supportive and open. And, you know, it's everything that children should be getting that 14 they might not get from mom or dad. It depends on 15 the household. 16

The outcome would be wonderful if they could avoid irreversible harm from hormonal interventions or even surgical reassignment.

You expressed concern earlier that co-morbid conditions were not being adequately addressed in minors with gender dysphoria.

Is that a fair characterization of what we have been talking about?

Yes. 25 Α

25

17

18

19

Q Are there other medical treatments that you think are inappropriate for adolescents who are 2 currently experiencing depression or anxiety? 3 4 A Not that I can think of. Q Are there other medical treatments that you think 5 should not be provided to adolescents because they 6

have been bullied or have experienced trauma or 7 abuse? 8

A Medical treatments other than hormonal 9 interventions for gender dysphoria? 10

Q Other than that? 11

A No. 12

Q Would you agree that someone can have more than 13 one condition that might require two different 14 kinds of treatment? 15

A Yes. 16

Q But it is your position that even if an adolescent 17 has no other diagnosis other than gender dysphoria 18 they are still not a candidate for hormonal 19 intervention or puberty blockers? 20

A That is my view because there, because the 21 evidence does not support benefit from those 22 23 interventions.

O So in that case it would not be the existence of 24 co-morbidities. It would be your view of the 25

1 that?

Α An example of what? 2

Q A place where the GRADE score on research is low 3 4 and so the true effect is likely to be markedly different from the estimated effect? 5

The hormonal treatment for gender dysphoria. 6

Any other treatment other than that where you 7 believe that applies? 8

The GRADE score. 9 Α

0 Okav. 10

A I don't -- not that comes to mind. 11

12 So earlier today we were talking glycemia and we were looking at the Endocrine Society guideline. 13 It talked about the recommendation for continuous 14 15 monitoring versus fingerstick.

> It said we recommend this even though it's low quality GRADE score.

Do you recall that?

Α Oh, yes. 19

0 So do you have the same concerns about that 20 intervention as you do with gender-affirming 21 22

A Oh, my goodness. Absolutely not. It is so different. We see immediate real time ongoing clear-cut evidence of benefit with continuous

Page 215

Page 216

evidence base that would cause you to believe 1 2

3 A Right. The evidence does not support benefit from hormonal interventions for gender dysphoria even 4

in the absence of major co-morbidities. 5

6 Q In Paragraph 60 of your declaration you say at the 7 end, "When the GRADE score is 'low,' the true effect is likely to be markedly different from the 8 9 estimated effect."

Do you see that?

11

10

18

12 Q Can you give me an example of that?

A Can you be a little more specific in what you are 13 14

Q Sure. You say when the GRADE score is low that 15 the true effect is likely to be markedly different 16 from the estimated effect. 17

And there is no citation there, right?

A Well, the citation relates to GRADE. That is what 19 GRADE, that is what -- the citation still relates 20 to citation 42, which is on GRADE. 21

Okay. So that is how you believe GRADE 22 23

characterizes low in terms of quality? A Yes. That is right out of the GRADE criteria.

Q All right. And can you give me an example of

glucose monitoring daily, multiple times a day. 1 We see evidence for that even though there might 2

not be a study, you see that the patient has --3 you are preventing a serious outcome every day, 4

which is hypoglycemia. That is easily measurable 5 6 and people get alerts from their continuous 7

glucose monitoring system.

There is no parallel. There is no comparison to an intervention for hormone therapy for gender dysphoria.

So I will represent to you in this case and in 11 other places there have been self-reports from 12 minors with gender dysphoria that have received 13 gender-affirming care that they on a daily basis 14 feel better psychologically. They are more 15 comfortable in their bodies. They are better able 16 to participate in society. 17

> You would not consider that self-report to be credible in this instance?

A It's worthless. It means that there are so many confounders. That is an anecdote from one or two people. But what else is going on in that patient's life? Have they had psychotherapy? You know, it could be the placebo affect.

It's nothing like continuous glucose

Document 58-6

- 1 monitoring in patients with diabetes. There's just no comparison whatsoever. 2
- Q Is that because you don't believe we should give 3 4 credence to the self-report of the minors who receive this care who say this is making me feel 5
- better on a daily basis? 6
- A I think the patients can't diagnose themselves. 7
- Glucose measurements on a continuous glucose 8
- monitoring reader or an iPhone app, glucose 9
- measurements are very different from, I feel 10 better and I think it's from that shot. There is 11
- 12 no comparison.
- Q You have patients with diabetes. 13
- A Yes. 14
- 15 Q Are they able to tell based on how they feel in their body that maybe their blood sugar is getting 16 low? 17
- A Often no. 18
- Q Is there a point at which they can? 19
- A Sometimes. But often no. They need a measurement 20 tool. 21
- Q If you had a patient who came in and said I just, 22
- 23 I'm not feeling particularly well. Would that be
- something that you would want to explore further 24 25 in your treatment of them with diabetes?

Page 220

Page 221

- A How well the informed consent process is. And I think if people were clearly informed of the 2
- weakness of the evidence for hormonal 3 4 interventions and the potential harm, they might
- sign up for it. It might be difficult to do the 5 study. 6
- 0 You think that the low quality evidence for the 7 supportive psychotherapy that you are talking 8 about, there is a form of informed consent that 9 could be sufficient that you could ethnically sign 10 11 people up for that group?
 - A For that group and the comparative group, it might be this would be an experiment, a clinical research trial where people were fully informed.

As you know, I'm an expert in clinical research. They would be fully informed from the outset with what is called equipoise. Not the doctor convinced that the best approach is hormones. But the doctor unsure of what the best approach is.

And then be able to convey that to the person who signed up and say these are your two options. We can see how you do. Then they randomly are assigned to one group or the other.

So the other group in your study, they would be

Page 219

receiving hormones, is that right? 1

That is part of clinical research. 2

Q So you think this kind of study would be a good 3 4

A Well, if the physicians in the United States 5 6 continue to push these interventions which are so,

I think, unhelpful and potentially harmful, 7

perhaps this would get them to back down and say, 8 9 look, this is what needs to be done and this is

what is recommended.

Some other countries have said we need to put a stop to this right now. We need to evaluate it further. This would be a means to evaluate it.

- You are aware that Senate Enrolled Act 480 bans 14 care all together even in a research setting, 15 correct? 16
- Α No, I was not aware of that. 17
- Are you in favor of a law that bans care entirely 18 without a research exception? 19
- A I think I would have to see how -- what the 20 research would be. You can call it research and 21 have no control group. We are doing research. 22

There are publications where they call it research and I don't think it adds meaningfully to the evidence base. So it has to be a really well

A Sure. Why are they not feeling well? 1

So you do believe that patient's self-report has 2 some role in medical diagnosis? 3

A Oh, of course. Part of that, the most important 4 part of the engagement is the history, what is 5

going on. The patient can't diagnose their own 6 condition. They can't -- they will come in and 7

say I think that pill is giving me this problem, 8

9 but they are on twelve pills. 10

Well, how do we know which pill? We can't rely on the patient to make the diagnosis.

In Paragraph 64 of your declaration you talk 12 about, you know, essentially what would be a 13 randomized control study. 14

Is that a fair summary of what you are talking about in Paragraph 64?

A Yes. 17

11

15

16

24

Q Is there any evidence that supportive 18 psychotherapy alone can treat gender dysphoria? 19

Yes. It's low quality evidence, but there is. 20

Q Would you expect people to sign up for a study 21 where the intervention only had low quality 22

23 evidence?

Q What does it depend on?

It depends.

23

24

May 26, 2023 Page 224

Page 225

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

- 1 designed study prospective, randomized with a good comparator group. 2
- Q So that kind of study then, the one you just 3 4 described, you would be in favor of that kind of study taking place? 5
- A I would. 6
- 7 Q In Paragraph 69 of your declaration, it says in the second sentence, "A Cochrane Review was 8 performed of hormonal interventions in females 9 with gender dysphoria. They found 'insufficient 10 evidence to determine the efficacy or safety of 11 12 hormonal treatment approaches in transgender women in transition." 13

Do you see where that is? 14

15 A Yes.

19

20

21

1

2

Q I'm a little confused. Is this review that you 16 are talking about, was it addressing transgender 17 men or transgender women? 18

MS. YOUNGS: Can he refresh his memory by looking at the study? Do you have the review of the study?

Before we get there, Dr. Weiss, do you know just 22 23 from reading this whether the study was about being assigned male at birth or people assigned 24 25 female at birth?

- 1 studies, is that fair to say?
- A 2
- Q Okay. In Paragraph 78 of your declaration you 3 4 say, "At a minimum, one must conclude from these studies that persons with gender dysphoria 5 continue to have significant psychiatric issues 6 7 despite hormonal and surgical interventions."

Do you see that?

Α 9 Yes.

8

14

15

16

17

18

19

20

21

22

23

24

25

12

13

14

15

16

17

- Q For people who have gender dysphoria, if they have 10 11 other co-morbidities, why not treat all of the conditions as opposed to stopping the treatment 12 for gender dysphoria? 13
 - A So one of the principles of treatment is to initiate treatment that is least harmful. And so the least harmful interventions would -- a harmful intervention, potentially irreversible, or definitely irreversible if surgery is involved, would be hormonal interventions for those persons.

So you could treat depression through various approaches and maybe the gender dysphoria would resolve. But if you are doing multiple interventions at one time you will not know what is helping.

Clearly in these citations in these reports

Page 223

- A Let me look at the reference. This was biologic focusing on treatment of gender dysphoria, it 1
- Q Thank you. Then in Paragraph 70 in the second 3 3 sentence you say, "Doctors, like all groups, are 4 4 susceptible to group think and social contagion." 5
- 6 Do you see that?
- A Yes. 7

males.

- Q Other than the treatments for gender dysphoria 8 9 that we have been discussing can you give me another example of that? 10
- A The treatment of post-menopausal women with 11 estrogen and progestin in the hope that it would 12 reduce heart attacks. The treatment of primary 13 aldosteronism with surgical intervention. The 14 treatment of high blood pressure in persons with 15 Type II diabetes. I can go on and on. 16
- Q And for all of those you believe that is group 17
- think and social contagion that were at fault? 18 I think much of that is group think and doctors
- 19 not thinking for themselves and not critically 20 questioning the evidence. 21
- 22 In those cases was it further research that turned
- 23 the tide?
- Yes. 24 Α
- Q So it was not debate. It was new research

- didn't seem to really help much in terms of the 2 suicide and depression and so on.
- Q Okay. So if someone has both diabetes and a heart condition and you are treating their diabetes and 5 it is being effectively treated but their heart 6 7 condition does not improve, do you stop treating the diabetes? 8
- 9 A So we are talking about mental disorders when we talk about gender dysphoria. So not chronic 10 medical conditions that are outside of the brain. 11

So people can have multiple sclerosis and depression and you can treat both. You can treat both of those. But multiple sclerosis is not thought to be a psychiatric disorder.

So you are mixing apples and oranges, I think.

- Q What if someone has depression and ADHD and you 18 19 are effectively treating their ADHD but they 20 continue to be depressed, would you stop treating the ADHD because the depression did not resolve? 21
- 22 A So I don't know that much about ADHD, but it may 23 be that when you are treating the depression they will have less in the way of ADHD. 24
 - But, no. I think the psychiatrist who is

Case 1:23-cv-00595-JPH-KMB K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

1 treating needs to know the interaction between 2 those two and treat both of them and maybe taper off on one of those medications. Your depression 3 4 is much better. Maybe we can drop back on your meds for your ADHD or vice versa. 5 You can't do that if you were doing hormonal 6 7 interventions and you have already transitioned the person. That is not something that you can go 8 up and down on.

9 Q In Paragraph 80 of your declaration you are 10 talking about a quote and then you say at the end, 11 "Elsewhere this author writes that there are 12

'numerous gaps in knowledge' in transgender 13 medicine." 14

Do you see that?

A Yes. 16

15

1

Are there gaps in knowledge in other areas of 17 medicine? 18

A Not as much as in transgender medicine. And the 19 gaps are so large in transgender medicine that 20 practitioners are inclined to treat with these 21 interventions that I think are harmful. 22

23 O So when there are gaps in knowledge in medicine do you believe that we should withhold care? 24

A No. The care just continues to improve and change 25

Q In Paragraph 90 of your declaration you say, "Seizures have been reported in children receiving

May 26, 2023 Page 228

Page 229

puberty blockers."

4 There is no citation to that sentence. Do vou see that?

The citation comes in the next sentence. 6

Okay. So you believe that footnote 60 applies to 7 both those sentences? 8

A I think so. Let me check. Yes, it does apply to 9 both sentences. 10

11 Q So is that the Bangalore Krishna study?

12 A

2

3

0 Okay. Was that study in children who are being 13 treated for precocious puberty? 14

Yes. There is very little data on children 15 treated with puberty blockers for gender 16 dysphoria. Very little published data. 17

18 So because central precocious puberty can only be treated with GnRH agonists or puberty blockers, 19 even though there are some rare side effects it's 20 still an appropriate treatment in your mind? 21

22 A

23 O So you would agree that medical interventions can always have rare side effects? 24

25 A They can always have side effects. We don't know

Page 227

over time. But we always want to have the care be 1

the least harmful possible. 2 Q And so you would agree then that the way you close 3

those gaps to get to a place of care that is more 4 effective and less harmful is through research? 5

6 A Correct.

7 Q In Paragraph 86 of your declaration you say that GnRH analogs are approved for use in children with 8

9 a relatively rare disorder called central precocious puberty. 10

Do you see that? 11

Α Yes. 12

Q So would you agree that for children experiencing 13

that condition GnRH analogs are safe to use? 14

They appear to be. And there is no other 15 treatment for those children. 16

Q What about a child who has both precocious puberty 17 and gender dysphoria, would you consider GnRH 18 analogs to be an appropriate treatment? 19

A Yes, for the precocious puberty. Not for the 20 gender dysphoria. 21

22 But if they had both, you would still find it 23 appropriate to use the GnRH analog to treat them?

For the precocious puberty. I've not seen a 24 single report of a child who has both though. 25

how rare these are in their use with children with

gender dysphoria because the data are not there. 2

These children -- there is no reporting. There is 3 no collection of data. They are just being 4

treated. 5

6 I'm asking you a broader question. Generally 7 speaking, medical interventions can have side

effects and some are more common, some are more 8 9

rare?

Correct. Α 10

And even for medications or treatments where there 11 are those side effects, if the treatment on 12 balance benefits the majority of patients they 13 will continue to be prescribed, is that fair to 14

say? 15

A Yes, as long as the person knows the risk versus 16 benefit and gets full informed consent. 17

In Paragraph 96 of your declaration you say: 18 19 "Children who fail to progress through puberty are infertile." 20

Do you see that?

22 Α Yes.

23 Okay. So puberty blockers themselves don't cause infertility though, right? 24

They should not if we look at the data on 25 Α

THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD

Page 232 1 precocious puberty. There is no good published A Yes. data in the treatment of children with gender 2 2 Is that statement generally true of all pediatric interventions? dysphoria. 3 3 4 Q Would you agree once the puberty blockers stop and 4 Α Yes. Q the child progresses through endogenous puberty we So it's not specific to the provision to treating 5 5 have no reason to believe that blockers have a gender dysphoria in minors? 6 6 7 negative effect on fertility? Correct. A They should not. Although, there is not data Q So you were talking earlier about the treatment of 8 8 published for those with gender dysphoria. 9 9 Type I diabetes in minors and their transition to O You would agree with that statement when it is adult endocrinologists. 10 10 used for precocious puberty? Α Yes. 11 11 Q Do you believe that, generally speaking, pediatric 12 Yes, it appears that it does not impair fertility. 12 But the data that is published in the children endocrinologists do understand the long-term 13 13 with precocious puberty is primarily biologic effects of treating Type I diabetes in children? 14 14 15 females usually. Α Yes. 15 Q Then in Paragraph 109 of your declaration you say, We have very, very little data on biologic 16 16 boys and their ability to conceive when puberty "Short-term effects of testosterone given to natal 17 17 blockers are stopped in them. 18 females include acne, baldness, facial hair, 18 Q And that is something that you probably would want clitoral enlargement and pelvic pain. There may 19 19 be deepening of the voice." more data on, right? 20 20 A Yes. Do you see that? 21 21 Q Can you think of other medical treatments that can Α Yes. 22 22 cause infertility in children that are minors? 23 Q And so for a person whose goal it is is to reduce their gender dysphoria, would you agree that some Chemotherapy. 24 24 Q You believe there are circumstances in which 25 of those side effects are actually intended 25 Page 231 Page 233 children and their parents can consent to the results? 1 1 receipt of that treatment, correct? A No. 2 2 A Well, that is pretty clear. If they have cancer You don't believe facial hair is an intended 3 3 they might be infertile, but they won't die of result of the testosterone to treat gender 4 4 dysphoria? their cancer hopefully. 5 5 6 Q You would agree that there are medical outcomes 6 A Well, acne is not. Pelvic pain is not. Clitoral 7 that are more important than fertility, or parents enlargement may be painful. That is not really 7 and their minor children can weigh whether the goal. Maybe facial hair. 8 8 9 fertility is important to them relative to the 9 O So at least one of those might be an intended result? other potential conditions or side effects? 10 10 A That is the importance of the full informed People don't usually want to go bald. 11 11 consent by the parents and the assent by the Would you agree if your goal was to appear more 12 12 child. Children have, they don't have long-term 13 masculine then being bald might, in fact, help you 13 perspective often. But, yes. in that effort? 14 14 It might. I agree. Q We may have covered this. Have you ever 15 15 O Not to put too fine a point on it. prescribed puberty blockers for any condition? 16 16 A Not that I recall. A Correct. 17 17 Q In Paragraph 106 of your declaration you are 0 In Paragraph 110 you talk about infertility or 18 18 talking about hormones. rather you say, "Infertility is frequent in those 19 19 You say in the third sentence, "Pediatricians females treated with testosterone even if not 20 20 and pediatric endocrinologists would fail to given puberty blockers." 21 21 recognize any of these long-term harms because Do you see where you wrote that? 22 22

the age of 18."

they usually do not provide care to persons after

Is that what you said there?

23

24

25

23 Α

24

25

Yes.

infertility?

Q Have you ever treated a transgender man for

May 26, 2023

Case 1:23-cv-00595-JPH-KMB K.C., et al VS THE INDIVIDUAL MEMBERS OF THE MEDICAL LICENSING BOARD May 26, 2023 Page 236 A Not for their infertility. 1 Is it your understanding that the treatment And you are not a reproductive endocrinologist, 2 2 of gender dysphoria using blockers and hormones is still being provided in the U.K. in some form? correct? 3 3 4 Α No. 4 That is still an option. Q Or by practice, I guess? Q Then in Paragraph 132 you discuss Sweden. In the 5 5 A No. Reproductive endocrinologists are trained second sentence you talk about, "Its new 6 initially as obstetricians gynecologists. They guidelines stated that the risks of hormonal 7 7 really just mostly focus on infertility in interventions outweighed benefits and that 8 8 biologic females. hormonal interventions in minors can only be used 9 9 Q In Paragraph 126 you talk in the second sentence, as part of a research protocol." 10 10 "Bilateral mastectomy has been euphemistically Did I read that correctly? 11 11 called 'top surgery' and 'chest contouring'." 12 12 Α Yes. So in Sweden they are still providing care, but Do you see that? O 13 13 limited to research studies? A I do. 14 14 A They are providing care, but it's hormonal 15 Q Do you think that anyone who gets that medical 15 procedure fails to understand that breast tissue interventions that are limited to research 16 16 will be removed? protocols. 17 17 A I think actually they don't, a lot of them don't 18 Yes. So you would agree then that hormonal care 18 understand it. So there are instances in which is still being provided to adolescents in Sweden 19 19 young women have had their breasts removed and in the context of research protocols? 20 20 then they regret it and they want to have them put Yes. 21 21 Α 0 Okay. Which in your view might be beneficial in 22 22 the United States as well in the context of a 23 O Well, I'm asking a different question. The 23 question is not about that, but do you think that randomized control trial? 24 24 25 the fact that a surgery is called top surgery or 25 A Right. Carefully designed randomized control Page 235 Page 237 1

- chest contouring obscures the fact to the patient 1 that what is going to happen is they are going to 2 have breast tissue removed bilaterally? 3
- A I think it's inappropriate and it is obscuring. I 4 think it is misleading and it minimizes what they 5 6 are doing.
- Q Would you be more supportive of that as a medical 7 intervention if everyone agreed we will only call 8 9 it bilateral mastectomy? We will not use the terms top surgery and chest contouring. 10
- Yes. Call it what it is. 11 Α
- Q Okay. 12

13

14

15

16

17

21

little under an hour. Is now a good time to take maybe a five minute break?

(AT THIS TIME A SHORT RECESS WAS HELD OFF 18 THE RECORD AFTER WHICH THE FOLLOWING PROCEEDINGS 19

20 WERE HAD:)

(ON RECORD AT 4:15 P.M.)

22 BY MR. SELDIN:

- 23 Q Dr. Weiss, in Paragraph 131 of your declaration, which is Exhibit 1, you talk about clinics in the 24 U.K. 25
- MR. SELDIN: So we have been going for a MS. YOUNGS: Sure. (OFF RECORD AT 4:09 P.M.)
 - psychological support. 14 Q Which in your view, that would be if you were 15 going to provide hormonal care to adolescents for 16 gender dysphoria, that would be the correct 17 protocol after an extended period of therapy? 18 To evaluate all co-morbidities, evaluate the child 19 very thoroughly and only in the setting of the 20
 - research protocol. 21 Is it your understanding then with respect to 22 Q 23 Paragraphs 134 and 135 that similarly Norway and Finland are also providing hormonal treatment for 24

gender dysphoria to adolescents in some form?

trial. Yes.

7

12

13

In Paragraph 133 of your declaration you talk 2 about France. 3

Is it your understanding that care is being 4 provided in France under some restrictions related 5 to research?

- Specifically what do you mean by "care"?
- O Hormonal treatments for the gender dysphoria in 8 9 adolescents?
- "They advised 'the greatest reserve' in the use of A 10 hormonal treatments." 11

That should be not an initial treatment. It's an option, but only after extended

How are you characterizing them? Are you a member of any other organizations that take a position on the provision of treatment for gender dysphoria? No. Are you a member of any other organization that takes the position on gender ideology as to how Do No Harm uses that term? I will correct that statement. The answer is yes, there is one other organization. They take a position on treatment of gender dysphoria. That organization is AAPS, American Association of	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Page 244 follow-up questions from any questions Ms. Youngs might ask, I have nothing further for you today. Thank you for your time. MS. YOUNGS: I have no rebuttal questions. (OFF RECORD AT 4:41 P.M.) AND FURTHER THE DEPONENT SAITH NOT. (Signature waived.) DANIEL WEISS, M.D.
18 19 20 21 22 23 24 25	Q A	Physicians and Surgeons. They have been around since the 1950s. They also have a view that is similar to Do No Harm's view. And what was the extent of your involvement with AAPS? I'm just a member. Do they have a newsletter that you read? Do you	17 18 19 20 21 22 23 24 25

I get a regular mailing and newsletter. They have, they have been involved in I think they filed some Amicus briefs in various cases. I don't know about gender cases. And my membership there is in my C.V. So other than Do No Harm, SEGM and AAPS, are there my other organizations of which you are a member that are similar in their beliefs regarding gender ideology or the treatment of gender dysphoria? No. MR. SELDIN: If we could take another break. It's possible I'm done. MS. YOUNGS: Okay. MR. SELDIN: Would you be amenable to ten minutes? Let's come back at 4:37 Eastern. MS. YOUNGS: Okay. (OFF RECORD AT 4:27 P.M.) (AT THIS TIME A SHORT RECESS WAS HELD OFF THE RECORD AFTER WHICH THE FOLLOWING PROCEEDINGS WERE HAD:) (ON RECORD AT 4:37 P.M.) 'MR. SELDIN: Dr. Weiss, thank you. Unless I have some	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25	STATE OF INDIANA) SS: COUNTY OF BOONE I, Wendi Kramer Sulkoske, Notary Public in said county and state, do hereby certify that the deponent DANIEL WEISS, M.D. was sworn to tell the truth in the aforementioned matter: That the deposition was taken on behalf of the Plaintiffs at the time and place heretofore mentioned, with counsel present as noted; That said deposition was taken down in Stenograph notes, reduced to typewriting under my direction, is a true record of the testimony given by said deponent; and that the reading and signing by the deponent were waived, the witness being present and consenting thereto. I do further certify that I am a disinterested person in this cause of action; that I am not a relative or attorney of any of the parties or otherwise interested in the event of this action, and am not in the employ of the attorneys for the respective parties.

Chair Manchester, Vice Chair Cutrona, Ranking Member Denson, and members of the House Families, Aging, and Human Services Committee

I am here to support the Save Adolescents from Experimentation Act, the SAFE Act.

My testimony is strictly my own and does not represent any health care organization in the State of Ohio.

I am a board-certified internist and endocrinologist. I have practiced in northern Ohio since 1986. I am also a Certified Physician Investigator. I have been the principal investigator for over 100 clinical trials involving both adults and children.

Physicians have 3 fundamental responsibilities: we must use our expertise to **diagnose** and to **care** for our patients. And we must be certain that our patients understand and fully **consent**.

Diagnosis of a medical condition is <u>not</u> delegated to the patient, because it requires expert medical evaluation. Physicians who see a child with distress, possibly related to gender, should not agree to the child's diagnosis any more than they would agree with a child who thinks he or she has diabetes or cancer.

Once the physician is confident in the diagnosis, he or she can weigh the best **care** or treatment for that patient. A cardinal principle is: "first do not harm".

Finally, physicians must obtain informed **consent**, especially for any experimental intervention. Ethical practice prohibits children from providing consent. Children cannot fully comprehend risks versus benefit, and at most can provide assent to a parental decision. Children must obtain consent from their legal guardian or parent for any medical treatment or surgery. Treatment for gender dysphoria should not be an exception to this requirement.

I stopped accepting new patients with gender dysphoria because I discovered that most had stories of traumatic childhoods and co-morbid depression. Most had inadequate psychologic

evaluation before they were "cleared" for treatment. Hormonal treatment did not resolve those underlying psychologic issues.

Parents are often told if they fail to go along with hormonal interventions for their child with gender dysphoria, he or she will commit suicide. However, the best evidence proves this to be completely false. A long-term study of adults in Sweden found that despite cross sex hormones and surgical reassignment surgery, there was a 19-fold higher suicide rate and a 3-fold higher overall mortality in transgender persons as compared to the control population.

The only study on hormonal treatment of gender dysphoria in minors is the so called the Dutch study. That study found no improvement in depression, anxiety or anger after treatment in a small group of 55 children.

To summarize, there are NO studies that demonstrate clear benefit with hormonal or surgical treatment for children with gender dysphoria. There is increasing evidence of harm with puberty blockers and cross sex hormones—damaging bone health, cardiovascular health and fertility. A paper published this year in the Endocrine Society's key journal described the evidence on hormonal interventions for "gender diverse adolescents" as sparse, of low quality and with potentially irreversible side effects.

And GnRH analogues, so called puberty blockers, are not FDA approved for treating gender dysphoria. All these facts mean that puberty blockers and cross sex hormones are experimental interventions for gender dysphoria. The SAFE Act aims to protect children from these experimental therapies.

There are an increasing number of people who were given hormonal or surgical treatment for gender dysphoria who later regret such treatment. I estimate that 75% of my adult patients failed to persist in their treatment with me. Recently, I saw a man who regretted having his testicles removed within one year of that surgery.

I strongly support the SAFE Act. The SAFE act is an act of harm reduction for children.

Daniel Weiss MD

My name is Dr. Daniel Weiss.

EXHIBIT

21

I am a board-certified internist and endocrinologist. I am also a senior fellow with the non-profit organization called Do No Harm. My commentary is mine alone and does not represent the views of any medical practice.

I practiced endocrinology in northeastern Ohio for 36 years. In December 2022, I moved to Utah and joined a medical practice there. I believe my clinical experience is meaningful in part because for 10 years I provided hormonal treatments for persons with gender dysphoria.

I no longer provide this care.

Why not? Because I discovered that most of these patients had stories of traumatic childhoods and co-morbid depression. Their psychologic evaluation was inadequate before they were "cleared" for treatment. Furthermore, opposite sex treatment did not resolve any of their underlying psychologic issues.

I later learned that there is no good scientific or clinical evidence to support hormonal or surgical interventions for minors with gender dysphoria. Instead, there is increasing evidence to show that such treatments for gender dysphoria cause harm. I will briefly summarize key data in the medical literature.

The most-cited_studies of hormonal treatment in minors report the outcomes using the so-called Dutch protocol. I encourage you to look at the references I have provided.

Multiple papers detail the many scientific flaws in the Dutch studies. Here are a few. There was no comparison group. The study subjects were highly selected. The study started with 111 children but only 55 were analyzed at its conclusion. Nonetheless the small group of children showed no improvement in gender distress, anxiety, or anger after opposite sex hormone treatment. The researchers used an unvalidated measurement tool and manipulated its results.

Daniel Weiss MD

It is little known that the series included a death as a complication of surgery. Importantly, independent UK researchers could not replicate the findings of the Dutch group.

A paper published last year in the Endocrine Society's key journal summarized the evidence on hormonal interventions for "gender diverse adolescents" as sparse and of low quality. In the key authoritative endocrinology textbook, just published in 2023, the chapter on Transgender Healthcare, written by a WPATH member, states that "long-term prospective outcome studies of the effects of GAHT (gender affirming hormone therapy) of any type are lacking. What data that do exist are mostly retrospective and have numerous limitations."

And gender dysphoria resolves in the vast majority of children without any interventions.

I have touched on the lack of data showing benefit. So, what about harm? Many studies show that puberty blockers and opposite sex hormones damage bone health, cardiovascular health, and fertility. There is emerging evidence of increased rates of breast cancer and other adverse effects.

Those who state that puberty blockers are readily reversible and harmlessly "pause" puberty can cite no published data on the reversibility of these drugs in this setting. The FDA has not approved any drug for treatment of gender dysphoria.

How about suicide? The largest study documented 4 suicides out of 15,000 adolescents being treated for gender dysphoria in the UK. It is not known whether this rate is any different than that seen in adolescents undergoing mental health treatment who do not have gender dysphoria.

The best data suggest that hormonal and surgical interventions <u>increase</u> the risk of suicide.

The Dutch study provided no data on suicide. In contrast, a long-term study of transgender persons in Sweden found a 19-fold overall higher suicide rate, 40-fold higher in females and a

Daniel Weiss MD

3-fold higher overall mortality despite treatment with opposite sex hormones and surgery as compared to the control population. In a study of over 8000 transgender person, two thirds of those who died by suicide were still receiving treatment at the gender dysphoria center. In an article this year in the NEJM there was a 45-fold increase in suicide with opposite sex hormonal therapy.

For more than a decade, long before opposite sex therapies became popular in the United States, European centers offered these treatments for gender confusion. Now, as increasing data show substantial harm, Finland, Sweden, Norway, France and the United Kingdom have discouraged or terminated opposite sex treatments for minors. Instead, they advise supportive psychotherapy for minors with gender confusion.

The United Kingdom's Gender Identity Development Service, started in 1989, is now closed. Hormonal interventions will only be provided as part of formal research program. They recognize the experimental nature of these treatments in those who have normal puberty.

Why haven't US physicians and surgeons learned from their European colleagues? I am uncertain but I ask how many doctors who justify this harm to minors have financial conflicts of interest? How many are employed at transgender clinics and how many perform lucrative surgeries?

Finally, it should be noted that strict international principles prohibit children from providing consent because children cannot fully comprehend risk versus benefit. The United States is a signatory to the United Nations Convention on the Rights of the Child. The *Declaration of the Rights of the Child* states that "the child, by reason of his physical and mental immaturity, needs special safeguards and care." These safeguards are uniquely important when it comes to an experimental intervention. The Declaration of Helsinki allows individual parents to consent to an experimental treatment for their child. Usually, this choice is made in an extraordinary

Document 58-6 PageID #: 3521

Daniel Weiss MD

circumstance, to save that child's life, and with the child's assent. Experimental treatments to change gender appearance should not be an exception to these requirements.

Please help protect the children of Ohio.

Thank you.

Daniel Weiss MD

Psychiatric co-morbidities in youth with gender dysphoria

Becerra-Culquie TA et. al. Mental health of transgender and gender nonconforming youth compared with their peers. Pediatrics 2018: 141: e20173845.

Over 60 % of transgender adolescents were diagnosed with depression, autism spectrum disorders, psychoses, substance abuse, anxiety or eating disorders

Kozlowska, K. et. al. Australian children and adolescents with gender dysphoria: clinical presentations and challenges experienced by a multidisciplinary team and gender service. Human Systems: Therapy, Culture and Attachments 2021; 1: 70-95

88% of these youth had comorbid mental health diagnoses and other indicators of psychological distress and adverse childhood events. 19% had a history of sexual abuse.54% were bullyed. What is the best approach to treating these youth?

Devor, H. Transexualism, dissociation and child abuse: an initial discussion based on nonclinical data. J Psychology and Human Sexuality 1994; 6: 49-72.

In depth interviews disclosed that sixty percent of the natal females disclosed one or more types of child abuse; more than 50% of that abuse was sexual.

Harm:

Mortality:

Dhejne C, et al. Long-term follow-up of transsexual persons undergoing sex reassignment surgery: cohort study in Sweden. PLoS One. 2011;6(2):e16885.

This long-term study found an overall 19-fold higher suicide rate (40 fold in female to male) and a 3-fold higher overall mortality in 324 transgender persons at 11 years after full transition, compared to the control population.

de Blok CJM. et al. Mortality trends over five decades in adult transgender people receiving hormone treatment: a report from the Amsterdam cohort of gender dysphoria. The Lancet Diabetes & Endocrinology. 2021;9(10):663-670.

This study documented increased rates of mortality in all persons receiving opposite sex hormone therapy.

Bone:

Biggs M. Revisiting the effect of GnRH analogue treatment on bone mineral density in young adolescents with gender dysphoria. J Pediatr Endocrinol Metab. Jul 27 2021;34(7):937-939.

Children treated with puberty blockers showed a marked reduction in bone density in those treated with GnRH analogues (puberty blockers); this change would be expected to increase the risk of fractures.

Cardiovascular:

Nota NM, et al. Occurrence of Acute Cardiovascular Events in Transgender Individuals Receiving Hormone Therapy. Circulation. 2019;139(11):1461-1462.

Document 58-6 PageID #: 3524

Daniel Weiss MD

This study found increased rates of heart attacks, strokes and blood clots in those treated with opposite sex hormone therapy.

Getahun D. et. al. Cross-sex Hormones and Acute Cardiovascular Events in Transgender Persons: A Cohort Study. *Ann Intern Med.* Aug 21 2018;169(4):205-213.

This study documents increased rates of blood clots as well as strokes and heart attacks in males given opposite sex hormone treatment

Fertility:

Baram S, et al. Fertility preservation for transgender adolescents and young adults: a systematic review. Hum Reprod Update. Nov 5 2019;25(6):694-716.

The authors raise concerns that opposite sex hormone therapies cause infertility, but offer no solutions to this problem.

Rodriguez-Wallberg K, et. al. Reproductive health in transgender and gender diverse individuals: a narrative review to guide clinical care and international guidelines. International J of Transgender Health. 2023; 24: 7-25

This paper details the likelihood of infertility "inherent in these interventions". They stress the many challenges and unknowns in fertility preservation in those receiving opposite sex therapy, especially in children. They note that many transgender persons "regret missed opportunities for fertility preservation".

Cancer:

de Blok CJM, et. al. Breast cancer risk in transgender people receiving hormone treatment: nationwide cohort study in the Netherlands. BMJ 2019; 365: l1652.

Males given opposite sex hormones experience a 46 fold increase in the occurrence of breast cancer.

Corso, G, et. al. Risk and incidence of breast cancer in transgender individuals: a systematic review and meta-analysis. European J of Cancer Preventioln 2023;

Reports a 22 fold increase in breast cancer in male to female transgender persons as compared to biolologic males.

Gurrala RR, et. al. The impact of exogenous testosterone on breast cancer risk in transmasculine individuals. Ann Plastic Surg 2023; 90: 96-105.

Breast cancer occurred 20 yrs earlier than expected in this population of females even though most had mastectomies before the diagnosis.

Wang, JC et. al. Factors associated with unsatisfactory Pap tests among sexually active trans masculine adults. LGBT Health 2023;

Those females who had received 1 year or more of testosterone were three and half times more likely to have an unsatisfactory Pap test, making early detection of cervical cancer much more difficult.

Breastfeeding:

Gribble, K. *et al.* Breastfeeding grief after chest masculinisation mastectomy and detransition: a case report with lessons about unanticipated harm. Frontiers in Global Women's Health 2023; Feb.

This case report describes the challenges faced by a woman who detranstions and who grieves over being unable to breastfeed her infant. Detransition is discussed and the importance of including in the informed consents before mastectomy the inability to breastfeed.

Brain:

Schneider MA, et. al. Brain maturation, cognition, voice pattern in a gender dysphoria case under pubertal suppression. Frontiers in Human Neuroscience Nov 2017; 11.

This patient showed an abnormal failure to increase brain white matter. In addition the patient experienced a reduction in IQ and memory during 22 months of puberty blockers.

Gutkind NE, et. al. Idiopathic intracranial hypertension in female-to-male transgender patients on exogenous testosterone therapy. Ophthalmic Plast Reconst Surg 2023.

Describes 4 patients, the youngest 19, with visual impairment, headaches and other symptoms caused by increased intracranial pressure. They postulate male hormone therapy as a cause.

Post-surgical complications

Van der Sluis WB, et. al. Genital gender-affirming surgery for transgender women. Best Practice and Research Clinical Obstetrics and Gynecology Dec 2022.

The surgical procedures vulvoplasty and vaginoplasty typically require a 5 day hospital stay. The authors describe the risk of severe complications, the possibility of repeat surgeries and the fact that there is no accepted validated questionnaire to assess postoperative satisfaction.

Ortengren, C. et. al. Urethral outcomes in metoidoplasty and phalloplasty gender affirming surgery and vaginectomy: a systematic review. Translational Andrology and Urology 2022; 11: 1762-1770.

The authors review reports of surgical outcomes including the ability to urinate while standing after surgery. Of those reporting this result, 25% of patients were unable to urinate while standing. Up to 63% had complications including urethral strictures and infections. No description was provided of patient satisfaction after surgery.

Kamal K, et.al. Addressing the physical and mental impacts of postsurgical scarring among transgender and gender diverse people. LGBT Health 2023

The authors describe the "dearth of peer-reviewed research" on the "repurcussions" of postsurgical scarring and the lack of coverage by insurance for "scar treatment".

Daniel Weiss MD

Potter, E. et. al. Patient reported symptoms and adverse outcomes seen in Canada's first vaginoplasty postoperative care clinic Neurourol Urodyn 2023; 42: 523-529

Pain, bleeding, sexual dysfunction and urinary symptoms were common (> 50%) in this series of 80 biologic males who had undergone surgery to create a vagina.

Document 58-6

Wang, AMQ, et. al. Outcomes following gender affirming phalloplasty: a systematic review and meta-analysis. Sexual Medicine Reviews 2022; 10: 499-512.

The authors describe a 76% complication rate after attempts to create a penis in biologic females. Goals of surgery include being able to urinate with standing, having sensation, and aesthetics, i.e being similar in appearance to biologic male genitalia. The objective the authors considered did not include having a penis that can function for intromission. Only 6% of those centers reporting results aesthetic results.

Suicide risk

Wiepjes CM, et. al. Trends in suicide death risk in transgender people; results from the Amsterdam Cohort of Gender Dysphoria study (1972-2017). Act Psychiatr Scand 2020; 141: 486-491.

This long-term study of 8263 transgender adults, (mean age of 25 at first visit to gender dysphoria center) showed that suicide deaths occur during every stage of gender transitioning. There were 49 suicides out of 8263 persons with average follow-up of 7.5 years. This number is a rate of 40/100,000 which may be compared to 11/100,000 in the general population. Two thirds of those who died by suicide were still receiving treatment at the gender dysphoria center. The average age at the time of suicide was 41. This study provided no additional psychiatric information.

Biggs, M. Suicide by clinic-referred transgender adolescents in the United Kingdom. Arch Sexual Behavior 2021; 51: 685-90.

In this study, of the Gender identity Development Service in the UK, 4 patients commited suicide out of 15,000. This rate was 5.5 times higher than the overall adolescent population without psychiatric diagnoses. The study reached no conclusion as to the best approach to prevent these suicides.

Chen, D. et. al. Psychosocial functioning in transgender youth after 2 years of hormones. N Engl J Med 2023; 388: 240-250.

There was no control group in this study of children, aged 12-20 (mean age 16) treated with opposite sex hormones over 2 years in 4 US transgender clinics. Psychiatric care was not described. The biologic males showed no improvement in depression, anxiety or life satisfaction. There were no reports of adverse physical events but 2 children, on treatment, committed suicide during this short term study. The rate of suicide in this group translates into a 45 fold higher rate than CDC reported suicide rates for those of comparable age in the general population.

Jackson, D. Suicide-related outcomes following gender-affirming treatment: a review. Cureus March 20, 2023. Vol 15.

Document 58-6 PageID #: 3527

Daniel Weiss MD

The author reviews those 23 studies that examine suicidal ideation and suicide attempts in persons before and after surgical and/or hormonal interventions. He finds various flaws in most of these studies. He points to the need for more research and informed consent for those considering these treatments.

Regret and Detransition

Littman L. Individuals treated for gender dysphoria with medical and/or surgical transition who subsequently detransitioned: a survey of 100 detransitioners. Arch. Sex Behavior. 2021; 50: 3353-3369.

This study recruited subjects with gender dysphoria and offered them a 115-question anonymous survey on several social media sites. The responses showed that 48% of the natal females had trauma within 1 year before onset of gender dysphoria. 55% felt they did not receive adequate evaluation from a doctor or mental health professional before opposite sex therapy 76% did not tell their treating physician that they had chosen to detransition. In 23%, the desire to "transition" was a response to difficulty in accepting themselves as gay, lesbian, or bisexual. Gender dysphoria started on average at age 11 and transition occurred on average at age 22. On average, detransition occurred 4 years later.

Roberts CM, et. al. Continuation of gender-affirming hormones among transgender adolescents and adults. J Clin Endocrinol Metab 2022; 107: e3937-e3943.

This study used the US Military Healthcare System database to determine the adherence rates for opposite sex hormone treatment in 952 persons with a mean age 19. 66% of this cohort were natal females. Over 4 years, 36% of the natal females discontinued treatment. Of those who started opposite sex treatment below the age of 18, 26% discontinued within 4 years.

Senate Committee on Human Services

HB 1254

Daniel Weiss MD

Opening Statement

Chairwoman Lee and Members of the Committee:

My name is Dr. Daniel Weiss.

I am a board-certified internist and endocrinologist. I am also a senior fellow with the non-profit organization, <u>Do No Harm</u>. My commentary is mine alone and does not represent the views of any medical practice.

I believe my clinical experience is meaningful, in part, because I have provided hormonal treatments for persons with gender dysphoria in the past.

I do not do so now.

Why not? Because I discovered that most of these patients carried stories of traumatic childhoods and co-morbid depression. Their psychologic evaluation was inadequate before they were "cleared" for treatment. Furthermore, opposite sex treatment did not resolve any of their underlying psychologic issues.

I later learned that there is no good scientific or clinical evidence to support hormonal or surgical interventions for minors with gender dysphoria. Instead, there is increasing evidence to show that such treatments for gender dysphoria cause harm. I will briefly summarize key data in the medical literature.

Page 114 of 122

The most-cited_studies of hormonal treatment in minors report outcomes using the so-called Dutch protocol. I encourage you to review the references I have provided.

Multiple papers detail the many scientific flaws in the Dutch studies: There was no comparison group. The study subjects were highly selected. The study started with 111 children but only 55 were analyzed at its conclusion. Nonetheless, the small group of children showed no improvement in gender distress, anxiety, or anger after opposite sex hormone treatment. The researchers used an unvalidated measurement tool and manipulated its results. It is also little known that the series included, as a complication of surgery, a patient death. Independent researchers in the United Kingdom attempted to replicate the findings of the Dutch group, but, revealingly, were unsuccessful.

A paper published last year in the Endocrine Society's key journal summarized the evidence on hormonal interventions for "gender diverse adolescents" as sparse and of low quality. In the key authoritative endocrinology textbook, just published in 2023, the chapter on Transgender Healthcare, written by a WPATH member, states that "long-term prospective outcome studies of the effects of GAHT (gender affirming hormone therapy) of any type are lacking. What data that do exist are mostly retrospective and have numerous limitations."

And gender dysphoria resolves in the vast majority of children without any interventions.

I have touched on the lack of data showing benefit. So, what about harm? Many studies show that puberty blockers and opposite sex hormones damage bone health, cardiovascular health, and fertility. There is emerging evidence of increased rates of breast cancer and other adverse effects.

Those who state that puberty blockers are readily reversible and harmlessly "pause" puberty can cite no published data on the reversibility of these drugs in this setting. The FDA has not approved any drug for treatment of gender dysphoria.

How about suicide? The largest study documented 4 suicides out of 15,000 adolescents being treated for gender dysphoria in the United Kingdom. It is not known whether this rate is any different than that seen in adolescents undergoing mental health treatment who do not have gender dysphoria.

The best data suggest that hormonal and surgical interventions <u>increase</u> the risk of suicide. The Dutch study provided no data on suicide. In contrast, a long-term study of transgender persons in Sweden found a 19-fold overall higher suicide rate. The rate was 40-fold higher in females and a 3-fold higher overall mortality, despite treatment with opposite sex hormones and surgery as compared to the control population. In a study of over 8000 transgender person, two thirds of those who died by suicide were still receiving treatment at the gender dysphoria center. In a New England Journal of Medicine article this year, suicide reportedly increased 45-fold with opposite sex hormonal therapy.

For more than a decade, long before opposite sex therapies became popular in the United States, European centers offered these treatments for gender confusion. Now, as increasing data show substantial harm, Finland, Sweden, France, and the United Kingdom have discouraged or terminated opposite sex treatments for minors. Instead, they advise supportive psychotherapy for minors with gender confusion.

Why have physicians and surgeons in the United States resisted the shift occurring among their European counterparts? I do not know the answer. However, I caution legislators to avoid all individual and institutional financial conflicts of interest while finalizing this bill.

In closing, it should be noted that strict international principles prohibit children from providing consent. This is because children cannot fully comprehend risk versus benefit. The United States is a signatory to the United Nations Convention on the Rights of the Child. The Declaration of the Rights of the Child states that "the child, by reason of his physical and mental immaturity, needs special safeguards and care." These safeguards are uniquely important when it comes to an experimental medical intervention. The Declaration of Helsinki allows individual parents to consent to experimental treatment for their child. Usually, this choice is made in an extraordinary circumstance, to save that child's life, and with the child's assent. Experimental treatments to change gender appearance should not be an exception to these requirements.

Post-surgical complications

Van der Sluis WB, et. al. Genital gender-affirming surgery for transgender women. Best Practice and Research Clinical Obstetrics and Gynecology Dec 2022.

The surgical procedures of vulvoplasty and vaginoplasty typically require 5 day hospital stay. The authors describe the risk of severe complications, the possibility of repeat surgeries and the fact that there is no accepted validated questionnaire to assess postoperative satisfaction.

Ortengren, C. et. al. Urethral outcomes in metoidioplasty and phalloplasty gender affirming surgery and vaginectomy: a systematic review. Translational Andrology and Urology 2022; 11: 1762-1770.

The authors review reports of surgical outcomes including the ability to urinate while standing after surgery. Of those reporting this result, 25% of patients were unable to urinate while standing. Up to 63% had complications including urethral strictures and infections. No description was provided of patient satisfaction after surgery.

Kamal K, et.al. Addressing the physical and mental impacts of postsurgical scarring among transgender and gender diverse people. LGBT Health 2023

The authors describe the "dearth of peer-reviewed research" on the "repercussions" of postsurgical scarring and the lack of coverage by insurance for "scar treatment".

Potter, E. et. al. Patient reported symptoms and adverse outcomes seen in Canada's first vaginoplasty postoperative care clinic Neurourol Urodyn 2023; 42: 523-529

Pain, bleeding, sexual dysfunction, and urinary symptoms were common (> 50%) in this series of 80 biologic males who had undergone surgery to create a vagina.

Wang, AMQ, et. al. Outcomes following gender affirming phalloplasty: a systematic review and meta-analysis. Sexual Medicine Reviews 2022; 10: 499-512.

The authors describe a 76% complication rate after attempts to create a penis in biologic females. Goals of surgery include being able to urinate with standing, having sensation, and aesthetics, i.e being similar in appearance to biologic male genitalia. The objective the authors considered did <u>not</u> include having a penis that can function for intromission. Only 6% of those centers reporting results aesthetic results.

Suicide risk

Wiepjes CM, et. al. Trends in suicide death risk in transgender people; results from the Amsterdam Cohort of Gender Dysphoria study (1972-2017). Act Psychiatr Scand 2020; 141: 486-491.

This long-term study of 8263 transgender adults, (mean age of 25 at first visit to gender dysphoria center) showed that suicide deaths occur during every stage of gender transitioning. There were 49 suicides out of 8263 persons with average follow-up of 7.5 years. This number is a rate of 40/100,000 which may be compared to 11/100,000 in the general population. Two thirds of those who died by suicide were still receiving treatment at the gender dysphoria center. The average age at the time of suicide was 41. This study provided no additional psychiatric information.

Biggs, M. Suicide by clinic-referred transgender adolescents in the United Kingdom. Arch Sexual Behavior 2021; 51: 685-90.

In this study, of the Gender identity Development Service in the UK, 4 patients committed suicide out of 15,000. This rate was 5.5 times higher than the overall adolescent population without psychiatric diagnoses. The study reached no conclusion as to the best approach to prevent these suicides.

Chen, D. et. al. Psychosocial functioning in transgender youth after 2 years of hormones. N Engl J Med 2023; 388: 240-250.

There was no control group in this study of children, aged 12-20 (mean age 16) <u>treated with opposite sex hormones over 2 years</u> in 4 US transgender clinics. Psychiatric care was not described. The biologic males showed no improvement in depression, anxiety, or life satisfaction. There were no reports of adverse physical events but 2 children, on treatment, committed suicide during this short-term study. The rate of suicide in this group translates into a 45-fold higher rate than the CDC reported suicide rates for those of comparable age in the general population.

Regret and Detransition

Littman L. Individuals treated for gender dysphoria with medical and/or surgical transition who subsequently detransitioned: a survey of 100 detransitioners. Arch. Sex Behavior. 2021; 50: 3353-3369.

This study recruited subjects with gender dysphoria and offered them a 115-question anonymous survey on several social media sites. The response showed that 48% of the natal females had trauma within 1 year before onset of gender dysphoria. 55% felt they did not receive adequate evaluation from a doctor or mental health professional before opposite sex therapy. Only 24% let their clinician know they had chosen to detransition. In 23%, the desire to "transition" was a response to difficulty in accepting themselves as gay, lesbian, or bisexual. Gender dysphoria started on average at age 11 and transition occurred on average at age 22. On average, detransition occurred 4 years later.

Roberts CM, et. al. Continuation of gender-affirming hormones among transgender adolescents and adults. J Clin Endocrinol Metab 2022; 107: e3937-e3943.

This study used the US Military Healthcare System database to determine the adherence rates for opposite sex hormone treatment in 952 persons with a mean age 19.66% of this cohort were natal females. Over 4 years, 36% of the natal females discontinued treatment. Of those who started opposite sex treatment below the age of 18, 26% discontinued within 4 years.
